With Chris Tregrove and Peter Lawrence In 1967 Peter 'Dougal' Butler became a roadie for The Who and their mercurial genius drummer Keith Moon. Soon he would be Moon's personal assistant, chauffeur, and all-purpose wingman. The ride lasted a tumultuous ten years, ending just prior to Moon's untimely death in 1978. Full Moon is Butler's memoir of that ride: essential reading for Who fans, and a masterclass in the mayhem caused by rock 'n' roll excess. 'The most candid insight into the Who star's life.' Daily Star 'Written in a wonderful fast, racy style, Runyonesque and full of good jokes.' Girl About Town 'A welcome change from the usual bland rock book reportage... Butler clearly has a deep and lasting affection for Moon.' Andy Gill, NME 'Certainly outrageous, sometimes funny, but mostly a sad account of life with a talented neurotic.' Daily Mirror

"Civilian control over the military is widely hailed as among the biggest successes of India's democracy. This is a rarity, especially among post-colonial states, and is rightfully celebrated. But has this come at a cost? In The Absent Dialogue, Anit Mukherjee argues that the pattern of civil-military relations in India has hampered its military effectiveness. Indian politicians and bureaucrats have long been content with the formal and ritualistic exercise of civilian control, while the military continues to operate in institutional silos, with little substantive engagement between the two. In making this claim, the book closely examines the variables most closely associated with military effectiveness -- weapons procurement, jointness (the ability of separate military services to operate together), officer education, promotion policies, and defense planning. India's pattern of civil-military relations -- best characterized as an absent dialogue -- adversely affects each of these processes. Theoretically, the book adopts the 'unequal dialogue' framework proposed by Eliot Cohen but also argues that, under some conditions, patterns of civil-military relations maybe more closely resemble an 'absent dialogue.' Informed by more than a hundred and fifty interviews and recently available archival material, the book represents a deep dive into understanding the power and the limitations of the Indian military. It sheds new light on India's military history and is essential reading for understanding contemporary civil-military relations and recurring problems therein. While the book focuses on India, it also highlights the importance of civilian expertise and institutional design in enhancing civilian control and military effectiveness in other democracies"--

An unknown writer lands in Sydney for the first time. He knows nobody and has only one goal ... For ten days, his mission is to wander through the city on foot, determined always to record what he sees. Writing on beaches and park benches, in cafes and restaurants, and in long retrospective reveries in his hotel room, he clings relentlessly to his task, reflecting on the cityscape and its denizens, on its public art and neighborhoods. Day by day, page by page, he builds his portrait of a magical city by the sea, digressing into fantastic absorptions, spinning into concentric meditations, but always taking you, dear reader, with him ... and making his experience yours.

"Overview Many of the stunning natural landscapes that bless tropical areas of Asia are now transformed into major tourist destinations, as showcased in this enticing volume. Combining landscape design and building concepts of simple materials, consummate craftsmanship, and moods of humor, surprise, and drama, the works are the product of an intense collaboration between the landscaper architects, Bensley Design Studios, and Bunnag Architects, both firms based in Bangkok. As shown in lavish photo spreads, each project was guided by a reverence for pristine sites, tropical climate, and rich cultural heritage. The book also documents techniques employed by both practices in bringing these tropical paradises from dream to reality."--Publishers description.

With all the distractions that are part of our waking hours, it is no wonder that the simplest sounds of an ordinary day are overlooked and taken for granted. Sounds like the crackling of ice, raindrops on a rooftop, the rumble of an approaching storm, and even turning the page of a book are so commonplace that we seldom-if at all-take time to appreciate them. Yet, when the ability to hear these everyday sounds is taken away—as in Marsha Engle's case—we are humbly reminded of their value. As she was slowly losing her hearing, Marsha collaborated with professional photographer William Huber to capture these ordinary sounds in stunning photographs, and they have collected them here in this unique and breathtaking book for both the hearing and hearing impaired to enjoy. 100 Sounds to See is a tribute to the beauty of hearing and a gentle reminder to the hearing world to listen to and appreciate everyday sounds.

Walter is worried - and for good reason. The Kid is in big trouble. Her family may have to sell the farm if the library goes broke and Emily's mom finds herself out of work. But what's a barn cat to do? Given his druthers, Walter would prefer stalking the garbage pails of the Wild Weekenders. And as a pretty tough guy, why should he care about The Kid? But he does. Walter's friend, teacher and editor, Thurman, must find a way to help Walter save the farm and his own "brownsand" empire beneath the barn. But what can a barn cat and an over-educated barn rat do? Given his druthers, Thurman would prefer to spend his days happily reading old newspapers smuggled from the dark, moldy basement of the village library. Fortunately, our friends have a friend in low places. You never know what good old Cousin Ted will turn up down there.Along the way, these three unlikely friends encounter many an adventure. And, along the way, they learn some important life lessons.

DK Eyewitness Travel Guide Bali and Lombok

Mass tourism is one of the most striking developments in postwar western societies, involving economic, social, cultural, and anthropological factors. For many countries it has become a significant, if not the primary, source of income for the resident population. The Mediterranean basin, which has long been a very popular destination, is explored here in the first study to scrutinize the region as a whole and over a long period of time. In particular, it investigates the area's economic and social networks directly involved in tourism, which includes examining the most popular spots that attract tourists and the crucial actors, such as hotel entrepreneurs, travel agencies, charter companies, and companies developing seaside resort networks. This important volume presents a fascinating picture of the economics of tourism in one of the world's most visited destinations.
