The laws governing commercial motor vehicles are not easy to understand and it can take hours wading through them to find anything. Passing inspection requires a roadmap to which one must commit faithful execution over time. Insights from Inside, written courtesy of the experience of a transportation enforcement officer/CVSA inspector with a background as a licensed mechanic, provides that roadmap, along with tips and cost-saving suggestions for heavy truck drivers, owner/operators, and fleet managers. It also offers maintenance suggestions, insider insight, and strategies on how to pass CVSA Level 1 inspection during roadside stops with a commercial motor vehicle. While the book's focus is Ontario laws, there's some policy standardization throughout North America and the same inspection procedure and training for enforcement officers tasked with inspecting commercial motor vehicles, trailers, and buses reigns continent-wide—so its data points are wide

ranging. Armed with this book, drivers and fleet operators can know what to expect no matter in what jurisdiction an inspection is performed.

Since its introduction in 1998, the water-cooled Porsche 911 has earned a reputation as one of the world's greatest sports cars - equal to, if not better than, the legendary air-cooled 911 it replaced. The 911 is a true driver's car, and it offers its greatest driving rewards when properly maintained, tuned, and modified. One of the principal drawbacks to owning a Porsche is the relatively high cost of maintaining it. You can literally save

The book focuses on the effects of shock waves on vacancies and their clusters in fcc crystals. It is shown that high-speed cooperative atomic displacements represent a powerful tool for the purposeful modification of defect structures in crystalline bodies. The results are important for radiation material science, nano-engineering, the study of shock wave effects and the ultrasonic treatment of materials. Keywords: Computer Modelling of Nanopores, Molecular Dynamics, Fcc Metals, Defect Structures in Crystals, Radiation Material Science, Nano-Engineering of Materials,

households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

bars. Ironically, it's in a six-by-nine-foot cell that God begins to free this driven Christian leader from his prison of performance and success. In the end, Bo realizes that God's love is a gift, not something he must earn. But there's more to the story: Just before Bo enters prison, his wife, Gari, becomes incapacitated by a brain illness and enters her own prison of clinical depression. Readers will see how the couple struggled together as their world fell apart, yet ultimately grew closer to each other and God behind the bars of their trials. This story will not only inspire and encourage readers, it will show them how they, too, can find spiritual freedom in life's "prisons" if they choose to see God's hand in their lives. Popular Science gives our readers the information and tools to improve their technology and their world.
