Compiled by three of the most influential authors in the field, *CLASSICS OF ORGANIZATION THEORY*, Eighth Edition is a collection of the most enduring works in organization theory. To help students grasp important themes, perspectives, and theories, the authors describe what organization theory is, how it has developed, and how its development has coincided with events and changes in other fields. This highly acclaimed reader is not simply a retelling of the history of organization theory; its evolution is told through the words of the distinguished theorists themselves. The readings in this edition have been thoroughly reviewed and updated. In this fourth edition of his ground-breaking work, Herbert A. Simon applies his pioneering theory of human choice and administrative decision-making to concrete organizational problems. To commemorate the fiftieth anniversary of the book's original publication, Professor

Simon enhances his timeless observations on the human decision-making process with commentaries examining new facets of organizational behavior. Investigating the impact of changing social values and modern technology on the operation of organizations, the new ideas

featured in this revised edition update a book that has become a worldwide classic. Named by Public Administration Review as "Book of the Half Century," Administrative Behavior is considered one of the most influential books on social science thinking, and was referred to

by the Nobel Committee as "epoch-making." Written for managers and other professionals who wish to understand the decision-making processes at the heart of organization and management, it is also essential reading for students in business and management, economics,

sociology, psychology computer science, government, and law.

This book provides a critical overview of analytical methods used for the determination of pesticide residues and other contaminants in food and environmental samples by modern instrumental analysis. It contains up-to-date material including recent trends in sample preparation, general methods used for pesticide analysis and quality assurance aspects, and chromatographic and immunoassay

methods. The rest of the book describes particular analytical methods used for the determination of pesticides in food and soil, water and air. In addition, the levels of these chemicals found in food, their regulatory aspects and the monitoring of pesticides in the environment are described.
