Python for Everybody is designed to introduce students to programming and software development through the lens of exploring data. You can think of the Python programming language as your tool to solve data problems that are beyond the capability of a spreadsheet. Python is an easy to use and easy to learn programming language that is freely available on Macintosh, Windows, or Linux computers. So once you learn Python you can use it for the rest of your career without needing to purchase any software. This book uses the Python 3 language. The earlier Python 2 version of this book is titled "Python for Informatics: Exploring Information". There are free downloadable electronic copies of this book in

This accessible book is an essential companion
for students on an initial teacher training course.
The book guides the reader through the new QTS
standards required to teach, and includes

coverage of recent legislation such as Every Child Matters. This user-friendly guide includes group exercises and key reading to help give students the confident start they need in the classroom. There is also an accompanying website for the book which includes effective lesson plans.

This book offers a practical solution to the challenges trainee teachers and practising teachers face when asked to address English and maths across the further education curriculum. Aimed firmly at non-specialist teachers of English and maths, each chapter has activities to raise

your own awareness of English or maths concepts, as well as examples of activities that you can use in your teaching to ensure English and maths are appropriately embedded. Key features include:

- Accessible explanations of English and maths concepts to support both you and your learners
- Tasks to get you thinking about the general principles of embedding English and maths
- Specific ideas for embedding English and maths in a range of vocational subject contexts
- Tips and ideas for your lessons
- General advice together with “Dos and don’ts”
- Helpful commentaries about suggested

teacher activities • Recommendations for further reading If you are training to teach in the education and training sector, this book offers a number of tasks and activities to help you address English and maths in your subject area and is an excellent resource to support the planning and teaching of your subject. "These experts in English and Maths have ensured that their advice is well conceived and carefully explained but also that it is practical. The 14-19 education reform programme aims to increase young people's participation in education and training beyond age 16 and raise their educational attainment. Central to the programme are new Diploma qualifications, being introduced between September 2008 and 2013, in 14 different occupational areas that offer a blend of academic and vocational learning. This report examines: giving all young people access to Diplomas; reducing complexity and communicating simply; and having the capability to deliver the reforms. The Department for Children, Schools and Families (the Department) has involved universities and employers in designing the Diplomas and developing their content. As

new qualifications, there is still much work to be done to convince parents, employers and universities that Diplomas are a credible alternative to existing qualifications. To help make the qualifications more understandable, the Department and its partners need to demonstrate clearly how Diplomas will help young people progress into further learning and employment. By 2013, the Department is aiming for all young people in England to have access to all 14 Diplomas at three different skill levels. The Department has spent £590 million on the programme. It has not yet established cost estimates built up from the local level for delivering Diplomas, and has only just begun surveying local

Literacy? That's someone else's job, isn't it? This is a book for all teachers on how to make explicit to students those things we can do implicitly. In the Teachers' Standards it states that all teachers must demonstrate an understanding of, and take responsibility for, promoting high standards of literacy, articulacy, and the correct use of standard English, whatever the teacher's specialist subject. In *The Secret of Literacy*, David Didau inspires teachers to embrace the challenge of improving students' life chances through improving their literacy. Cross-curricular approaches have much to offer the modern mathematics classroom. They can help teachers

to present mathematics as a growing, relevant discipline that is central to much of modern life, and help learners to make sense of what they are doing and why.

Teaching is a tough and challenging job and

society demands more from its teachers than ever before. This new edition is an essential companion for those training to teach providing an overview of important professional issues that all future teachers need to engage with in order to succeed in the classroom. Previously known as How to Achieve Your QTS, this Second Edition is equally valuable to those training to teach in both primary and secondary education and aims to give students the confident start they need in the classroom. Features new to this

edition include more balanced primary education coverage and four new chapters on: child protection issues, teaching pupils with English as an Additional Language, cross-curricular teaching issues and your first teaching post: applications, interviews and induction. The accompanying Website www.sagepub.co.uk/denby, has been updated to include additional material expanding on and complementing the contents of the book. This book is essential reading for professional studies modules on both primary

and secondary initial teacher education courses at both undergraduate and postgraduate level, and on university-based and school-based training courses. Neil Denby teaches at the School of Education and Professional Development, University of Huddersfield.
