associated with
investment strategies.

The 19 chapters
combine theory and
practice based on the
experience of the
authors in the asset
management industry.
The book starts off
with describing the key
activities involved in
asset management and
the various forms of
risk in managing a

the life cycle of a system, from the acquisition of materials to the manufacture, use, and final disposal of a product.

Technoeconomic analysis refers to cost evaluations, including production cost and life cycle cost. Often, in order to
