This necessity for a simple guide-book has been felt by many. Let us give our own experience. We procured a list of works on fungi, and looked for

Fungi Study Guide

some volume
not too deep
for our
comprehension
nor too costly
for our purse.
Among those we
found were
"Handbook for
Students"
(Taylor);
"Edible and

(Cooke), and a
pamphlet by
Professor

Peck,

"Mushrooms and
Their Uses."

This seemed to
be the one
that we could
comprehend

most easily,
and so, armed
with it, and
another
pamphlet by
Professor
Underwood,
called
"Suggestions
to Collectors
of Fleshy
Fungi," which

contained a simple key, we started out to make discoveries. We afterward procured some publications of Mr. C. G. Lloyd, which were of great assistance,

and lastly a
glossary
published by
the Boston
Mycological
Society, a
necessary
addition to
our library.
We found
Professor
Peck's book

was confined
to edible
mushrooms, and
it soon became
too limited to
satisfy our
craving for
further
knowledge-it
incited a
longing to
know something

of inedible
fungi. The
rest is soon
told. We were
advised to get
either a copy
of Stevenson's
"British
Fungi" or of
Massee's
works. We did
so, but found

them too
advanced to be
readily used
by the
unlearned.
Then the idea
arose, How can
we help others
in their
difficulties?
This little
book is the

answer. It
will not be of
use to
advanced
students, they
will only
criticise and
discover how
much has been
left unsaid;
but the
beginner is

more easily
satisfied with
the extent of
information
gained, and if
a taste for
knowledge is
encouraged the
object of this

attained. This

account for
the use of
simple terms.

this study is
a most
fascinating
one. We all
long for
pleasant
subjects of
thought in our
leisure hours,

and there can be nothing more diverting and absorbing than the investigation of the beautiful and familiar plants around us. When we leave the

noisy streets
of a city and
go into the
quiet fields
and woods the
contrast is
very great. A
walk for

We cannot be assured of pleasant companions, nor is there always a fine view or picturesque scenery to reward us during our strolls, but

there are
plants to be

when these
fail us, then
the bright-

may arrest our
attention. The
discovery of
new specimens,

the learning
