Studies of the city, and of women's experiences of the city, have focused primarily on modern times, especially as modernism was defined in large part by urban life. Italy, however, has a long history of urban-centered culture, and women have been a vocal part of that culture since the Renaissance. This

volume, therefore, looks at the art and literature of both earlier and more modern periods to investigate the meanings of the city for Italian women, the intensely gendered meanings (for both sexes) of those city spaces that excluded women, and the conditions that permitted a limited permeability of

*Two aspects to the
combination of
"women" and "city" are
salient to these
investigations. One
involves their
metaphorical
relationship. Urbs, citta,

second aspect of
connection involves
social realities. What
