Exclusive to this edition—a new update on the conviction and sentencing of the Barefoot Bandit Colton Harris-Moore. A teenage outlaw wanted in nine states for more than eighty crimes. For two years he outran authorities - often barefoot. At every step of the way, a frenzied public cheered him on... He looked like a typical American teenage boy. But Colton Harris-Moore was something else: a disturbing neighborhood nuisance at the age of ten, a troubled felon at twelve, wanted at fifteen, and the subject of a cross-country and international fugitive manhunt by the time he could register to vote. He stole boats, luxury cars, laptops, credit cards, and planes, despite no formal flight training, then embarked on an astonishing two-year crime spree that crossed international borders, fueled a titillated media, and eluded law enforcement. A twenty-first century Billy the Kid, Harris-Moore hid in the woods and lived on candy bars, snack food, and at least one stolen organic blueberry pie. As his crime spree continued and his notoriety grew, he was celebrated online, on T-shirts, and on Web sites and a Facebook Fan Club. Only one thing was increasingly clear: Harris-Moore wasn't going to give himself up easily. His fans wouldn't have had it any other way. This is the Barefoot Bandit's life story - his youth, his crimes, and his capture - the incredible true account of a digital-age wild child who may have run out of getaways, but found something much more valuable: a peculiar and very American brand of fame.

Panda Quartile - Empress of a strange other-dimensional Earth - becomes stuck in our own world after a cosmic accident during a shopping trip. Unable to return for 6 months, she poses as a university student to pass the time, and makes friends with neighbour Jo Dribble. Panda's naivete(c) and enthusiasm to experience Earth lead them to a series of daft adventures together..."

An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.
