UPSC, IAS Mains General Studies Solved Papers (2005-2015) Tags: UPSC, IAS, IPS, IFS, CSAT, Civil Services, UPSC PORTAL, Civil Seva, Union Public Service Commission.

Over the past quarter century, the people of the Arabian Peninsula have witnessed a revolutionary transformation in higher education. In 1990, there were fewer than ten public universities that offered their Arabic-language curricula in sex-segregated settings to national citizens only. In 2015, there are more than one hundred public, semi-public, and private colleges and universities. Most of these institutions are open to expatriates and national citizens; a few offer gender integrated instruction; and the language of instruction is much more likely to be in English than Arabic. Higher Education Revolutions in the Gulf explores the reasons behind this dramatic growth. It examines the causes of the sharp shift in educational practices and analyses how these new systems of higher education are regulated, evaluating the extent to which the new universities and colleges are improving quality. Questioning whether these educational changes can be sustained, the book explores how the new curricula and language policies are aligned with official visions of the future. Written by leading scholars in the field, it draws upon their considerable experiences of teaching and doing research in the Arabian Gulf, as well as their different disciplinary backgrounds (linguistics and economics), to provide a holistic and historically informed account of the emergence and viability of the Arabian Peninsula's higher education revolutions. Offering a comprehensive, critical assessment of education in the Gulf Arab states, this book represents a significant contribution to the field and will be of interest to students and scholars of Middle East and Gulf Studies, and essential for those focused on higher education.

This book aims to develop professional and practical microcontroller applications in the ARM-MDK environment with Texas Instruments MSP432P401R LaunchPad kits. It introduces ARM Cortex-M4 MCU by highlighting the most important elements, including: registers, pipelines, memory, and I/O ports. With the updated MSP432P401R Evaluation Board (EVB),

MSP-EXP432P401R, this MCU provides various control functions with multiple peripherals to enable users to develop and build various modern control projects with rich control strategies. Micro-controller programming is approached with basic and straightforward programming codes to reduce learning curves, and furthermore to enable students to build embedded applications in more efficient and interesting ways. For authentic examples, 37 Class programming projects are built into the book that use MSP432P401R MCU. Additionally, approximately 40 Lab programming projects with MSP432P401R MCU are included to be assigned as homework.

Nowhere in the world is university education expanding as rapidly as in the six-member state of the Gulf Cooperation Council. In two generations the region has gone from having the Middle East's least educated population to boasting a younger generation whose educational achievements are approaching Oraginisation for Economic Co-operation and Development (OECD) standards. This unique study, with contributions by key decision makers, charts this dramatic development, exploring the challenges faced and placing accomplishments within the social, economic and political context of the region.

Engineering Agricultural and Medical Common Entrance Test (EAMCET) is an entrance examination conducted in some Engineering and Medical Colleges by Jawaharlal Nehru Technological University every year. The new edition of Arihant's "Andhra Pradesh EAMCET Engineering 19 Years' Solved Papers [2019-2001]" has been prepared as per the latest question papers of the examination. This book provides the best study material to the candidates who were preparing for this examination. It gives the complete coverage to the syllabus by providing the last 19 years question papers from 2001 to 2019 in which in which web links are provided for EAMCET Solved Papers [2014-2001] so that students can download it and study from anywhere at any point of time. Moreover, solution of each question is well explained with details which helps the candidates to understand better. Thorough practice done from this book ensures good ranking and selection in the top colleges and institutions. **A comprehensive collection of contributions from the Middle East and Japan, dealing with pressing problems concerning sustainability in arid zones, this time with the accent on environmental science and engineering. The symposium brought together researchers and field engineers who discussed issues such as sulphur utilization in agriculture and construction engineering, renewable energy sources, and hazardous and waste-water treatment technologies. At a broader level, compliance with the Kyoto Protocol was on the agenda, with lively debate on global warming issues, which are of particular relevance to the ecology of arid lands.**

This volume explores the challenges to diversification in Gulf countries, which can no longer rely on profits from hydrocarbons to fund national expenditures. It elaborates on the problem of weak institutions, lack of coordination between policy makers and executors, limited investment in research and development, and a workforce that is too poorly skilled to compete in the private sector. In addition to analyzing issues in areas such as education, labor, business, and trade, the contributors underscore the importance of using global best practices to overcome fundamental weaknesses in the Gulf Cooperative Council's economic structure that limit opportunities for economic diversification. This is the second volume in Economic Diversification in the Gulf Region.

This is the first book to examine the actual impact of physical and social engineering projects in more than fifty countries from a multidisciplinary perspective. The book brings together an international team of nearly two hundred authors from over two dozen different countries and more than a dozen different social, environmental, and engineering sciences. Together they document and illustrate with case studies, maps and photographs the scale and impacts of many megaprojects and the importance of studying these projects in historical, contemporary and postmodern perspectives. This pioneering book will stimulate interest in examining a variety of both social and physical engineering projects at local, regional, and global scales and from disciplinary and trans-disciplinary perspectives.

The latest research innovations and enhanced technologies have altered the discipline of materials science and engineering. As a direct result of these developments, new trends in Materials Science and Engineering (MSE) pedagogy have emerged that require attention. The Handbook of Research on Recent Developments in Materials Science and Corrosion Engineering Education brings together innovative and current advances in the curriculum design and course content of MSE education programs. Focusing on the application of instructional strategies, pedagogical frameworks, and career preparation techniques, this book is an essential reference source for academicians, engineering practitioners,

researchers, and industry professionals interested in emerging and future trends in MSE training and education.

Andhra Pradesh EAPCET Engineering (2021-2001) Solved Papers For 2022 Exam

Official Journal of the Paper Industry Technical Association

*This book constitutes thoroughly revised and selected papers from the 5th International Conference on Model-Driven Engineering and Software Development, MODELSWARD 2017, held in Porto, Portugal, in February 2017. The 20 thoroughly revised and extended papers presented in this volume were carefully reviewed and selected from 91 submissions. They contribute to the development of highly relevant research trends in model-driven engineering and software development such as methodologies for MDD development and exploitation, model-based testing, model simulation, domain-specific modeling, code generation from models, new MDD tools, multi-model management, model evolution, and industrial applications of model-based methods and technologies.*

*The sharp increase in oil revenues since 2002 has left the Arab Gulf States with billions of petro-dollars. But how will these countries fare in the post-oil era? The rulers of these states are taking serious measures to ensure the survival of their economies, and indeed their regimes, in a world with scarce mineral resources. This volume explores the extent to which these countries have been and will be able to prepare for the future by transforming themselves into serious international destinations for tourism, finance, healthcare and education. It also considers the implications of failure for the future survival of their regimes. This study will provide food for thought for academi, policy makers and general readers. 'An incisive enquiry into an exciting region, the authors leave no stones unturned. It is bold in its examination of both the history and the crucial changes being wrought throughout the Gulf. The book, which has been fashioned with both detailed knowledge and academic rigour, will be of huge advantage to anyone seeking a practical chart to the region. The contributors have not been restrained in drawing examples of the Gulf States over-reaching themselves to danger points in the economic downturn. The severe lessons learned have been studiously researched. The fresh opportunities, political, economic, social and technological, are concisely considered. No matter where your interests lie, this is a solid foundation from which to build a 'Way Ahead' policy for the region.'* Charles Wilson, Director of The Consultancy, an international human resources business with Gulf experience

*After the oil discoveries of the early 1930s, Bahrain rapidly became an oil exporting country with a relatively high income per capita. More recently Bahrain has succeeded in diversifying its oil dominated economy by developing regional banking and other services, and a variety of light and heavy industries. Various circumstances have combined to make Bahrain a leader among the Arab Gulf States in the transformation of traditional Arabic tribal societies into modern social and economic structures. This book, first published in 1985, in exploring the past, present and possible futures of Bahrain and the Gulf, attempts to describe the nature of this transformation. It estimates to what extent Bahrain has merely an outward appearance of modernity, and explores the conflicts between the compelling power of modern values and the pervasive traditional religions. Bahrain is not typical of the Arab countries of the Gulf; it may, however,*

serve as a gauge of their current position and likely future. It will therefore be valuable to those interested in gaining more insight into the history and politics of the Middle East during this period of rapid change.

The New Post-Oil Arab Gulf

Government Reports Announcements & Index

*The formation of human capital--the knowledge, skills, and health that people accumulate over their lifetimes--is critical for the six Gulf Cooperation Council (GCC) countries. Human capital contributes not only to human development and employment but also to the long-term sustainability of a diversified economic growth model that is knowledge based and private sector driven. This approach is critical, given that income from oil and gas will eventually decline and that the nature of work is evolving in response to rapid technological changes, in turn demanding new skill sets. The GCC governments have demonstrated their strong political will for this shift: four of them are among the first countries to join the World Bank's Human Capital Project—a global effort to improve investments in people as measured by the Human Capital Index. The GCC countries face four main challenges: • Low levels of basic proficiency among schoolchildren • A mismatch between education and the labor market • A relatively high rate of adult mortality and morbidity • A unique labor market, in which wages in the public sector are more generous than in the private sector and government employment of nationals is virtually guaranteed To address these challenges, this report outlines four strategies in a “whole-of-government” approach: • Investing in high-quality early childhood development • Preparing healthier, better educated, and skilled youth for the future • Enabling greater adult labor force participation • Creating an enabling environment for human capital formation These strategies are based on best practices in other countries and feature some of the GCC countries' plans, including their national “Visions,” to take their economies and societies further into the twenty-first century. With the COVID-19 pandemic, the GCC countries face additional challenges that may worsen some preexisting vulnerabilities and erode human capital. In response, the GCC governments have taken multiple measures to protect their populations' health and their economies. Any country's decision to reopen its economy needs to closely consider public health consequences to avoid a resurgence of infections and any further erosion of its human capital. The COVID-19 crisis underscores that the need to accelerate and improve investment in human capital has never been greater. Once the GCC countries return to a “new normal,” they will be in a position to achieve diversified and sustainable growth by adopting, and then tailoring, the strategies presented in this report.*

*Sustainability is a topic of great interest today, particularly for the Gulf Cooperation Council (GCC) countries, which have witnessed very rapid economic and demographic growth over the past decade. The observed growth has led to unsustainable consumption patterns of vital resources such as water, energy, and food, highlighting the need for an urgent shift towards green growth and sustainable development strategies. Sustainability in the Gulf covers the region's contemporary development challenges through the lens of the UN's Sustainable Development Goals (SDGs), which place sustainability at the centre of the solution to the current environmental, economic, and social imbalances facing GCC countries. The book presents multiple analyses of Gulf-specific sustainability topics, examining the current status, challenges, and opportunities, as well as identifying key lessons learned. Innovative and practical policy recommendations are provided, as well as new conceptual angles to the evolving academic debates on the post-oil era in the Gulf. Through chapters covering sector-related studies, as well as the socio-economic dimensions of the sustainability paradigm, this volume offers valuable insights into current research efforts made by the GCC states, proposing a way forward based on lessons learned. This is a valuable resource for students, academics, and researchers in the areas of Environmental Studies, Political Economy, and Economics of the GCC states.*

*Systems Engineering for Business Process Change: New Directions is a collection of papers resulting from an EPSRC managed research programme set up to investigate the relationships between Legacy IT Systems and Business Processes. The papers contained in this volume report the results from the projects funded by the programme, which ran between 1997 and 2001. An earlier volume, published in 2000, reported interim results. Bringing together researchers from diverse backgrounds in Computer Science, Information Systems, Engineering and Business Schools, this book explores the problems experienced by IT-dependent businesses that have to implement changing business processes in the context of their investment in legacy systems. The book presents some of the solutions investigated through the collaborations set up within the research programme. Whether you are a researcher interested in the ideas that were generated by the research programme, or a user trying to understand the nature of the problems and their solutions, you cannot fail to be inspired by the writings contained in this volume.*

The Cooperation Council for the Arab States of the Gulf (GCC) has been at the epicenter of global energy markets because of its substantial endowment of hydrocarbons. Yet countries in the region have also stated their intent to be global leaders in renewable energy. This collection explores the drivers for the widespread adoption of renewable energy around the GCC, the need for renewable energy and the policy-economic factors that can create success. All six countries within the GCC have plans to include renewable energy power generation in their energy mix for various

reasons including: a growing demand for electricity because of increasing populations, an increasing government fiscal deficit due to inefficient subsidies, the need to diversify the economy and global pressure to meet climate change requirements. However, the decision of when and by how much to introduce renewable energy is fraught with complications. In this book, a stellar cast of regional policy and academic experts explore the reasons behind these renewable energy plans and the potential impediments to success, whether it be the declining cost of producing energy from hydrocarbons, an infrastructure which needs to be updated, social acceptance, lack of financing and even harsh weather. Weighing up all these factors, the book considers the route forward for renewable energy in the Gulf region. The Economics of Renewable Energy in the Gulf offers an excellent examination of the adoption of renewable energy in the area. It will be of great interest to academic researchers and policy makers alike, particularly those working in the areas of energy economics, public policy and international relations.

Long a recipient of migrants from its surrounding areas, the Arabian Peninsula today comprises a mosaic of communities of diverse ethnic, cultural, linguistic and religious origins. For decades, while the Gulf Cooperation Council (GCC) states have housed and employed groups of migrants coming and going from Asia, Africa and the West, they have also served as home to the older, more settled communities that have come from neighbouring Arab states. Arab Migrant Communities in the GCC is a unique, original work of scholarship based on in-depth fieldwork shedding light on a topic both highly relevant and woefully understudied. It focuses on the earlier community of Arab immigrants within the GCC, who are among the politically most significant and sensitive of migrant groups in the region. Through its multi-disciplinary lenses of social history, cultural studies, economics, and political science, the book presents original data and provides analyses of the settlement and continued evolution of migrant Arab communities across the GCC, their work in and assimilation within host societies and labour markets, and their political, economic, social and cultural significance both to the GCC region and to their countries of origin.

Abstrakte Bankgarantien sind im internationalen Wirtschaftsverkehr ein unverzichtbares Zahlungssicherungsmittel für komplexe Bauvorhaben und andere Großprojekte. Sie versprechen im Bedarfsfall sofortige Liquidität und lassen sich auf erstes Anfordern abrufen, ohne dass Einwände aus dem Grund-, oder Deckungsgeschäft die Auszahlung verhindern können. Diese unmittelbare Verwertungsmöglichkeit birgt jedoch zwangsweise ein erhöhtes Risiko einer ungerechtfertigten oder missbräuchlichen Abrufung. Das vorliegende Werk untersucht rechtsvergleichend den Missbrauch von Bankgarantien (sog. demand guarantee/independent guarantee/standby letter of credit) im südafrikanischen, englischen sowie deutschen Recht. Unter Auswertung aktueller Gerichtsentscheidungen sowie des Schrifttums werden die praxisrelevanten Missbrauchsfallgruppen analysiert und Wege zur Risikominimierung bzw.

-vermeidung aufgezeigt. Das Werk ist gleichermaßen für die Praxis und Wissenschaft geeignet und leistet einen wichtigen Beitrag zur Auflösung des Spannungsfeldes von Rechtssicherheit und materieller Gerechtigkeit im internationalen Wirtschaftsverkehr.

A comparative legal study of their use and abuse from a South African, English and German perspective

Raw Materials for Pigments, Fillers & Extenders

Familiarity with guarantees and how they function under various national jurisdictions are essential for principals, guarantors and beneficiaries of international contracts. This enormously useful handbook provides a practical overview of the guarantee regime in eight European countries, with country-by-country contributions from regional expert practitioners and academics. For each country report follows the same structure, from preliminary discussion on the provisions of a guarantee to its negotiation, drafting and enforcement. Focusing on specific issues to consider at every stage, each chapter provides detailed information and guidance on the following: . who can issue guarantees; . limitations as to the type of obligations which may be subject to a guarantee; . the protection of the contracting parties; . formal requirements which need to be complied with; . stamp duties or other tax implications of implied terms; . legal framework applicable to joint and several obligations; . modification of the situation; . conditions for release; . actions to be taken to ensure a valid release; . opening of bankruptcy proceedings against the principal; . court enforcement; . incorporation of uniform rules. Each chapter includes references and model guarantee forms that readers can use to draft their own documents. Invaluable to corporate counsel and law firms with an international practice, this peerless handbook will prove the difference in business in trade negotiations across Europe, among European nations themselves as well as with their global partners.

This volume constitutes the thoroughly refereed post-conference proceedings of the First EAI International Summit, Smart City 360°, Bratislava, Slovakia and Toronto, ON, Canada, in October 2015. The 77 carefully reviewed papers include eight conferences: The program covered the Conference on Sustainable Solutions beyond Mobility of Goods (SustainableMoG 2015), the MOBIDANUBE program which strengthens research in the field of mobility opportunities and within Danube strategy, and the conference on Social Inclusion and Community Aspects of Smart Cities (SmartCityCom 2015). In parallel the SmartCity360 Toronto included five conferences addressing smart mobility (SUMS), sustainable cities (S2CT), smart grids (SGSC), wearable devices for health and wellbeing (SWIT Health), and big data (BigDASC).

***This is the first book ever to examine the architecture and urbanism of the Persian Gulf as a complete entity, dealing equally with conditions on the eastern Iranian shoreline as in Arabic countries on the western side. By inviting a range of architects and scholars to write about historical and contemporary influences on 14 cities along both Gulf coastlines, the book traces the changes in architecture and human settlement in relation to environmental factors and particularity of place. It provides an innovative contribution to the study of architecture and globalisation through a detailed investigation of this particular region, investigating how buildings and cities are being shaped as a result. A set of thematic essays at the end offer important insights into issues of globalisation, urbanism and***

***environmental design, drawing from the experience of the Persian Gulf. The outcome is a unique record of the Gulf in the early-21st century at a point when global capitalism is making major inroads and yet questions of architectural design, climate change, ecological sustainability, cultural identity and so-called 'Facebook Democracy' are likewise shaking up the Middle Eastern region. The book thus offers a fresh reading of the architecture and urbanism of a fascinating and often contradictory region, while also showing how globalisation can be analysed in a more engaged and integrated manner. Since the outbreak of the Arab Spring the Middle East is going through a turbulent phase as violence, internal conflicts and civil wars are ravaging a number of countries. Even relatively stable Gulf monarchies are not untouched by the impact of popular demand for change. For India, the Persian Gulf is an extended neighbourhood and the region of vital importance receives scant attention. In the light of the Arab Spring, Iranian nuclear deal and the rise of ISIS, it has become impossible for India to be indifferent to the changing internal dynamics. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.***
