The Handbook of Inclusive Education advocates the importance of inclusive education. It presents a collection of various models, practices, experiences, first-hand accounts and success stories from India, where inclusive education has been implemented. It also identifies and analyzes challenges to the Indian education system, while offering possible strategies and solutions for all education systems implementing inclusion policies. The book is divided into three parts. Part one gives an overview of the concept and practice of inclusive education and also discusses legal and policy aspects. Part two describes innovative practices in the implementation of inclusive education for children with a wide range of disabilities,

such as: - Hearing Impairment - Visual Impairment - Orthopedic Impairment - Learning Disability - Cerebral Palsy - Intellectual Impairment - Autism Spectrum Disorders. Part three discusses current developments in the fields of inclusive education and describes what a `real inclusive school should be like.

This book contains a general introduction to the education of academically able students. It provides a solid background of basic knowledge and a survey of research and theory for educational theorists, student teachers, practising teachers, administrators and planners. It offers insights into relevant practical problems as well as guidelines for classroom practice. The significance of this

**Grading is one of the most hotly debated topics in education, and grading practices themselves are largely based on tradition, instinct, or personal history or philosophy. But to be effective, grading policies and practices must be based on trustworthy research evidence. Enter this book: a review of 100-plus years of grading research that presents the broadest and most comprehensive summary of research on grading and reporting available to date, with clear takeaways for learning and teaching. Edited by Thomas R. Guskey and Susan M. Brookhart, this indispensable guide features thoughtful, thorough dives into the research from a distinguished team of scholars, geared to a broad range of stakeholders, including teachers, school leaders, policymakers, and researchers. Each chapter addresses a different area of grading research and**

**describes how the major findings in that area might be leveraged to improve grading policy and practice. Ultimately, Guskey and Brookhart identify four themes emerging from the research that can guide these efforts: - Start with clear learning goals, - Focus on the feedback function of grades, - Limit the number of grade categories, and - Provide multiple grades that reflect product, process, and progress criteria. By distilling the vast body of research evidence into meaningful, actionable findings and strategies, this book is the jump-start all stakeholders need to build a better understanding of what works—and where to go from here.**
