Achieving Success: Never Give Up!

Essential Mapwork Skills for the Caribbean is written to support the teaching of geographical skills at CSEC and CAPE level. Essential Mapwork Skills for the Caribbean provides 32 brand new case studies, offering Caribbean focussed coverage of key themes, issues and topical events to develop students' key geographical skills.

Pertussis, or whooping cough, is a respiratory disease caused primarily by infection with the bacterium *Bordetella pertussis*. It remains among the leading causes of death amongst vaccine-preventable diseases worldwide and recent years have seen its alarming re-emergence in many regions (including the U.S. and much of Europe), despite sustained high levels of vaccine coverage. The causes of the resurgence remain contentious, in part due to inherent complexities of the pathogen's biology, in part due to pronounced variation in the treatment and prevention strategies between different countries and regions, and in part due to long-standing disagreement amongst scientific researchers studying pertussis. This edited volume brings together expert knowledge from disparate fields with the overall aim of synthesizing the current understanding of this critically important, global pathogen.

Developed exclusively with the Caribbean Examinations Council, this Study Guide provides you with support to maximise your performance in CSEC Physical Education and Sport. Written by teachers,

examiners and experts in the field, it covers all the elements of the syllabus in the examination in an easy-to-use double-page-spread format and a range of features designed to enhance study. Features include activities and tips, as well as examination practice and sample answers to build assessment confidence.

Written by experienced teachers who bring a refreshing approach to traditional A-Level material. Advanced Chemistry will inspire and support chemistry students. Questions give opportunities to practise recall and analytical skills, and 'Maths boxes' give mathematical support. Key terms are highlighted and there are full colour illustrations.

The book is organized around Richard Sagor's four-stage process developed from his many years of experience training hundreds of educators. The four stages are: clarifying visions/targets; articulating theory; implementing action and collecting data; reflecting on data and planning informed action; The book includes numerous tables, charts, handouts, forms, and worksheets to demystify and simplify the action research process. Short examples drawn from the author's experience working on-one-on with teachers on their action research projects are also included, from raising reading proficiency to increasing the problem solving capacity of faculty members. The author shows how teacher teams can work collaboratively to identify and research problems related to the school's goals. Appropriate for use by individual teachers and teacher teams, as well as by pre-service teachers in teacher education courses. Principals, counsellors, and other educators will also find the action research process useful for school improvement.

Fully meets the requirements of the latest CSEC syllabus - Complete coverage of the core options, plus the options in communications, tourism and consumer affairs, including co-operatives - Practical guidance on how to approach the School-Based Assessment and on the alternative to the School-Based Assessment - Activities develop Social Studies skills and exam practice questions help students prepare for their exam

"This book covers the basics of traditional educational testing, measurement, and evaluation theory and

methodology, as well as sociopolitical issues and trends influencing the future of that research and practice"--Publisher's description.

Fuzzy Models and Algorithms for Pattern Recognition and Image Processing presents a comprehensive introduction of the use of fuzzy models in pattern recognition and selected topics in image processing and computer vision. Unique to this volume in the Kluwer Handbooks of Fuzzy Sets Series is the fact that this book was written in its entirety by its four authors. A single notation, presentation style, and purpose are used throughout. The result is an extensive unified treatment of many fuzzy models for pattern recognition. The main topics are clustering and classifier design, with extensive material on feature analysis relational clustering, image processing and computer vision. Also included are numerous figures, images and numerical examples that illustrate the use of various models involving applications in medicine, character and word recognition, remote sensing, military image analysis, and industrial engineering.

In A Level syllabuses students must undertake personal investigative work based on first-hand and secondary data. This element of the exam accounts for between 16.7 and 20 per cent of the total mark in the case of all examining boards. Fieldwork itself has also changed in recent years, moving away from the traditional fieldwork day/week attended by the whole class, to personal investigation where students select an enquiry and are responsible for assessing methodologies, gathering data and writing up a report. This text tackles these areas, giving particular guidance to self-study. It explores skills and techniques, constructing questionnaires, using statistical analysis and gives advice on selecting a title. Sections relate to all the main themes of the syllabus. Human civilizations' longest lasting artifacts are not the great Pyramids of Giza, nor the cave paintings at Lascaux, but the communications satellites that circle our planet. In a stationary orbit above the equator, the satellites that broadcast our TV signals, route our phone calls, and process our credit card transactions experience no atmospheric drag. Their inert hulls will continue to drift around Earth until the Sun expands into a red giant and engulfs them about 4.5 billion years from now. The Last Pictures, co-published by Creative Time Books, is rooted in the premise that these communications satellites will ultimately become the cultural and material ruins of the late 20th and early 21st centuries, far outlasting anything else humans have created. Inspired in part by ancient cave paintings, nuclear waste warning signs, and Carl Sagan's Golden Records of the 1970s, artist/geographer and MacArthur "Genius" Fellow Trevor Paglen has developed a collection of one hundred images that will be etched onto an ultra-archival, golden silicon disc. The disc, commissioned by Creative Time, will then be sent into orbit onboard the Echostar XVI satellite in September 2012, as both a time capsule and a message to the future. The selection of 100 images, which are the centerpiece of the book, was influenced by four years of interviews with leading scientists, philosophers, anthropologists, and artists about the contradictions that characterize

contemporary civilizations. Consequently, The Last Pictures engages some of the most profound questions of the human experience, provoking discourse about communication, deep time, and the economic, environmental, and social uncertainties that define our historical moment. History of Tofu and Tofu Products (965 CE to 2013)

Demonic possession was a spiritual state that often had physical symptoms; however, in *Demonic Possession and Lived Religion in Later Medieval Europe*, Sari Katajala-Peltomaa argues that demonic possession was a social phenomenon which should be understood with regard to the community and culture. She focuses on significant case studies from canonization processes (c. 1240-1450) which show how each set of sources formed its own specific context, in which demonic presence derived from different motivations, reasonings, and methods of categorization. The chosen perspective is that of lived religion, which is both a thematic approach and a methodology: a focus on rituals, symbols, and gestures, as well as sensitivity to nuances and careful contextualizing of the cases are constitutive elements of the argumentation. The analysis contests the hierarchy between the 'learned' and the 'popular' within religion, as well as the existence of a strict polarity between individual and collective religious participation. Demonic presence disclosed negotiations over authority and agency; it shows how the personal affected the communal, and vice versa, and how they were eventually transformed into discourses and institutions of the Church; that is, definitions of the miraculous and the diabolical. Geographically, the volume covers Western Europe, comparing Northern and Southern material and customs. The structure follows the logic of the phenomenon, beginning with the background reasons offered as a cause of demonic possession, continuing with communities' responses and emotions, including construction of sacred caregiving methods. Finally, the ways in which demonic presence contributed to wider societal debates in the fields of politics and spirituality are discussed. Alterity and inversion of identity, gender, and various forms of corporeality and the interplay between the sacred and diabolical are themes that run all through the volume.

As far as you know, IELTS candidates will have only 60 minutes for this IELTS Reading part with a total of 40 questions. Therefore, it is absolutely necessary that you invest time in practicing the real IELTS reading tests for this module. Beside Cambridge IELTS Practice Tests series published by Oxford University Press, "101 IELTS Reading Past Papers with Answers" ebook aims to develop both test-taking skills and language proficiency to help you achieve a high IELTS Reading score. It contains 101 IELTS Reading

Tests which were in the real IELTS tests from 2016 to early 2019 and an Answer Key. Each test contains three reading passages which cover a rich variety of topics and give a lot of practice for a wide range of question types used in the IELTS Exam such as multiple choice questions, short-answer questions, sentence completion, summary completion, classification, matching lists / phrases, matching paragraph headings, identification of information - True/False/Not Given, etc. When studying IELTS with this ebook, you can evaluate at the nearest possibility how difficult the IELTS Reading section is in the real exam, and what the top most common traps are. Moreover, these tests are extracted from authentic IELTS bank source; therefore, you are in all probability to take these tests in your real examinations. The authors are convinced that you will find IELTS Reading Past Papers Test with Answer extremely helpful on your path to success with the International English Language Testing System. Don't just trust to luck in your IELTS exam - the key is practice! IELTS Material.COM

This text focuses on the contemporary economic, social, geographical, environmental and political realities of the Caribbean region.

Historical aspects of the Caribbean, such as slavery, the plantation system and plantocracy are explored in order to explain the contemporary nature of, and challenges faced by, the Caribbean. The book is divided into three parts, dealing respectively with: the foundations of the Caribbean, rural and urban bases of the contemporary Caribbean, and global restructuring and the Caribbean: industry, tourism and politics.

For CXC students who want to prepare fully for their exams, CXC Study Guides are a series of titles that provide students with additional support to pass the exam. CXC Study Guides are a unique product that have been written by experienced examiners at CXC and carry the board's exclusive branding.

A Guide to the Clinical Care of Women with HIV

A motivational, heartwarming treasure of stories and experiences succinctly describes my work. Nestled between the covers are words of power, truth and hope; all real life experiences that serve as a guide to those who seek success. The key strand woven in the messages within echoes that, "regardless of your beginning, when God is included your destiny is one with a difference". Many stories have been told from across the world, this book tells the stories of those so close to us; the stories from the heart of our Caribbean people. "Achieving Success: Never Give Up! Serves to give readers encouragement in different ways!

Develops students' photographic and map interpretation skills in context. From award-winning author Simon Ross, Essential Mapwork Skills 3 builds on the popular features and classroom practicality of this well-liked series. The unique collection of case study-based activities uses a variety of thematic, topographical and topological maps, as well as accompanying aerial, ground and satellite photographs.

This book presents an in-depth study of English as spoken in two major anglophone Caribbean territories, Jamaica and Trinidad. Based on data from the International Corpus of English, it focuses on variation at the morphological and syntactic level between the educated standard and more informal educated spoken usage. Dagmar Deuber combines quantitative analyses across several text categories with qualitative analyses of transcribed text passages that are grounded in interactional sociolinguistics and recent approaches to linguistic style and identity. The

discussion is situated in the context of variation in the Caribbean and the wider context of world Englishes, and the sociolinguistic background of Jamaica and Trinidad is also explored. This volume will be of interest to students and researchers interested in the fields of sociolinguistics, world Englishes, and language contact.

Written by members of the Editorial Board of the Institute of Physics, *Advanced Physics* makes A-level physics accessible to all students, with Maths boxes throughout to support concept development. Questions give opportunities to practise recall and analytical skills, and there are high quality diagrams and full colour illustrations throughout.

This new atlas contains comprehensive coverage of the countries and oceans of the Caribbean and includes up-to-date statistics. It includes clear thematic, topographic maps of all the Caribbean Islands and uses satellite images to enhance and clarify map details. Easy to use features include a multi-access contents page, clear explanations of graphics and flags of the Caribbean at a usable size.

Study Guides for CAPE have been developed and written by CXC to provide CAPE candidates in schools and colleges with resource materials to help them prepare for their exams. Matching the topics in the syllabus, the student-friendly structure and content enable students to develop their skills and confidence as they approach the examination.

The impact of economic geography both within and beyond the wider field of geography has been constrained in the past by its own limitations. Drawing together the work of several eminent geographers this superb collection assesses the current state of knowledge in the sub discipline and its future direction. In doing so, the contributors show how economic geographers have offered explanations that affect places and lives in the broader context of the global economy. Offering a discussion of theoretical constructs and methodologies with the purpose to show the need to combine different approaches in understanding spatial (inter) dependencies, contributors also demonstrate the need to engage with multiple audiences, and within this context they proceed to examine how geographers have interfaced with businesses and policy. This excellent collection moves economic geography from a preoccupation with theory towards more rigorous empirical research with greater relevance for public policy. With excellent breadth of coverage, it provides an outstanding introduction to research topics and approaches.
