

Geometry Second Semester Study Guide

In 2009, Ron and June worked with their oldest grandson, Trey, to add structure into his life that would allow him to control the negative characteristics of Attention Deficit Disorder (ADD) including distractibility, inattention, impulsivity, and restlessness. While researching ADD, Ron was introduced to the positive characteristic of, "HYPERFOCUS". This allows people with ADD to focus intently, with passion, creativity, and enthusiasm on things they are interested in. Ron also realized that the tools and structure he has spent his entire career teaching to others were all based on the same principles needed by people with ADD. They require permanent structure, and perhaps medication, to overcome the negative characteristics and benefit from the positive characteristic of Hyperfocus and creativity: Setting long-term goals for 15-years out. Breaking these goals down into 3-year increments. Setting goals for the current year by months. Preparing a calendar for the current month. Preparing a "To Do" list for what has to be done today. Becoming motivated and focused on the "To Do" list, in order of priority, knowing that you will be successful in reaching your life goals and dreams.

Basic Analysis II: A Modern Calculus in Many Variables focuses on differentiation in R^n and important concepts about mappings from R^n to R^m , such as the inverse and implicit function theorem and change of variable formulae for multidimensional integration. These topics converge nicely with many other important applied and theoretical areas which are no longer covered in mathematical science curricula. Although it follows on from the preceding volume, this is a self-contained book, accessible to undergraduates with a minimal grounding in analysis. Features Can be used as a traditional textbook as well as for self-study Suitable for undergraduates in mathematics and associated disciplines Emphasises learning how to understand the consequences of assumptions using a variety of tools to provide the proofs of propositions Offers information on more than six thousand K-12 courses and programs offered through correspondence or electronic delivery systems in the United States.
