A Hundred Encounters

This deeply engaging, historically, and culturally informed book provides new perspectives on a wide range of writers, and at the same time provides a radically new development of many of the most pertinent issues in the field of postcolonial writing and theory. It constitutes a major new engagement between the "postcolonial" and a conception of the literary that is richly innovative in its deployment of psychoanalytic, deconstructive, and other approaches to the text. The book begins with some brief background to the issue of

decolonization and its contemporary effects. It is informed throughout by a clear sense of literary and political context, within which chosen texts--by well-known writers (Derek Walcott, Chinua Achebe, Edward Kamau Brathwaite) as well as less well-known ones (Joan Riley, Susan Power, Abdulrazak Gurnah) and writers not often seen in a postcolonial context (James Kelman, Seamus Deane, Hanif Kureishi)--can be situated. The chapters that follow are based around themes such as violent geographics; hallucination, dream and the exotic; mourning and melancholy; diaspora and exile; delocalization and the alibi. This profoundly new approach to the complexities of the

postcolonial allows the reader to appreciate some of the richness, but at the same time the political and cultural ambivalence, which underlies postcolonial writing.

Throughout the book David Punter continually questions, as one would expect from his many previous books, the definition and scope of the "postcolonial." It is seen throughout as a phenomenon not restricted to the ex- or neo-colonies but as a key characterisation of all our lives at the beginning of the twenty-first century. It is an indissoluble part of the development of national imaginings and, at the same time, an alibi for the emergence of a violently assertive "new world order" committed to the management and obliteration of

A smoldering debut novel. From the time she was a child, Mona Lisa knew she was different?but she never knew how different until a man of otherworldly beauty entered her life.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus

tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "O" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was

almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Graffiti writing was born in the streets of Philadelphia in the late 1960s. But it was in New York in the early 1970s that it became a full-fledged urban art, gradually taking over the landscape of the city, from its walls to its subway cars. This is a writing manual, a detailed examination of how graffiti writers have developed the twenty-six letters of the alphabet. It includes the contribution of ten of the international scene's most talented creators answer Woshe's questions about

In the future world of Scorch, America is run by a “corporacracy.” Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans’ fears of Big Brother.

Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are

Throughout history, how society treated its disabled and infirm can tell us a great deal about the period.

Challenged with any impairment, disease or frailty was often a matter of life and death before the advent of modern medicine, so how did a society support the disabled amongst them? For centuries, disabled people and their history have been overlooked - hidden in plain sight. Very little on the infirm and mentally ill was written down during the renaissance period. The Tudor

period is no exception and presents a complex, unparalleled story. The sixteenth century was far from exemplary in the treatment of its infirm, but a multifaceted and ambiguous story emerges, where society's 'natural fools' were elevated as much as they were belittled. Meet characters like William Somer, Henry VIII's fool at court, whom the king depended upon, and learn of how the dissolution of the monasteries contributed to forming an army of 'sturdy beggars' who roamed Tudor England without charitable support. From the nobility to the lowest of society, Phillipa Vincent-Connolly casts a light on the lives of

a better future, based on rigorous, trustworthy independent reporting that presents a fuller picture of truth. With a discerning eye, Censored 2020 focuses the public's attention on the most important but underreported news stories of 2018-2019. These stories expose the corporate news media's systemic blind spots while highlighting the crucial role played by independent journalists in providing the kind of news necessary for informed, engaged citizens. The book also examines this year's lowlights in "junk food news" and

test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.
