

Gerontological Nursing And Healthy Aging 1st Canadian Edition

Praise for the first edition: “This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics.” Score: 90, 4 Stars —Doody’s Medical Reviews “[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice.” —The Gerontologist “The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills.” —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to “gray area” situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. **New to the Second Edition:** A completely new section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client’s needs infused throughout exercises

Binder-Ready Edition: This loose-leaf copy of the full text is a convenient, accessible, and customizable alternative to the bound book. With this binder-ready edition, students can personalize the text to match their unique needs! Gain the nursing skills you need to provide wellness-based care for older adults! Ebersole and Hess' Gerontological Nursing & Healthy Aging, 6th Edition uses a holistic approach to describe compassionate care along a continuum of wellness. Designed to promote healthy aging regardless of the patient's situation or disorder, this text provides best-practice guidelines in covering physical, psychosocial, spiritual, and cognitive health. New to this edition are Next Generation NCLEX®-style case studies, updates on measuring clinical judgment, expanded coverage of core competencies, and more. Written by gerontological nursing experts Theris Touhy and Kathleen Jett, this concise text provides a solid foundation in every aspect of healthy aging. Focus on health and wellness provides the evidence-based information and strategies needed to promote healthy aging. Key concepts, learning activities, and discussion questions in every chapter emphasize the information needed to enhance care. Recommended competencies from the AACN and the Hartford Institute for Geriatric Nursing are integrated throughout. Discussion of disease processes is placed in the context of healthy adaptation, nursing support, and responsibilities. Easy-to-use information on nursing techniques and communication appears with the associated disorders, symptoms, and situations. Tips for Best Practice and Resources for Best Practice boxes provide insight into proven methods of nursing care. Discussions of nursing and interprofessional actions help students learn to enhance wellness, maintain optimal function, and prevent unnecessary disability. Coverage of age, cultural, racial, and gender differences highlights these important considerations in caring for older adults. **NEW!** Updates reflect the NCSBN Clinical Judgment Model. **NEW!** Next Generation NCLEX® (NGN)-style case studies provide optimal preparation for the Next Generation NCLEX Examination. **NEW!** Specialized information addresses the unique needs of older adults such as atypical disease presentation, geriatric syndromes, neurocognitive disorders, quality of life with chronic illness, legal and ethical issues, and mental health challenges such as depression and substance abuse. **NEW!** Coverage of competencies of expanding nursing roles in the care of older adults addresses the continuum of care. **NEW!** Gerontological expertise is incorporated into nursing actions and complements other nursing texts (including med-surg, community health, mental health, and assessment books) used in programs without a freestanding gerontological nursing course. **NEW!** Expanded content includes information on COPD guidelines, medication use and misuse, Alzheimer's Disease, wound care guidelines, diagnosis and treatment of sleep-disordered breathing, joint replacement, caregiver strain, hospice and transitional care, and more.

Written by leading international experts, this book helps students and practitioners to better understand and cater for the needs of our ageing population. It examines: how services can be provided to meet the expectations and needs of a growing population of ageing citizens within a cost-

effective, social justice and positive ageing framework how resources allocated to aged care can be distributed equitably to better meet the demands associated with housing, retirement, service provision and care how health promotion principles can contribute to a healthy older population. Investigating current critical debates in health and social science, the book explores innovative new approaches to aged care and ageing. By using international examples and a multidisciplinary approach, this comprehensive textbook provides a broad understanding of ageing from a social perspective and analyzes concepts of ageism, healthy ageing and positive ageing.

As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. Retooling for an Aging America calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides. Educators and health professional groups can use Retooling for an Aging America to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.

Ebersole & Hess' Gerontological Nursing & Healthy Aging - Pageburst E-Book on Kno (Retail Access Card)

The Nurse's Role in Promoting Optimal Health of Older Adults

Geriatric Nursing

Ebersole & Hess' Gerontological Nursing & Healthy Aging

This money-saving package is a must-have for nursing students! It includes Ebersole & Hess's Gerontological Nursing & Healthy Aging, 3rd edition and an electronic version of the textbook that allows students to search, highlight information, take notes, share notes and more. This package makes it simple for students to make the most of their study time and get more use out of their textbooks!

GERONTOLOGIC NURSING provides comprehensive coverage of health promotion, gerontologic concepts and issues, and medical-surgical problems associated with the older adult. Divided into seven parts, each chapter follows a consistent organization including learning objectives, emergency boxes, client and family teaching boxes, research boxes, key points, special insights, and new health promotion and nutrition boxes. The second edition also includes a new chapter on health promotion, expanded chapters on nutrition and functional assessment, and a dedicated MERLIN which provides the student and instructor with additional up-to-date tools and resources to enhance and expand their content knowledge. Highlights fundamental aging theories to provide a basis for biological and psychosocial aspects of quality nursing care. Provides complete and comprehensive coverage of assessment recapping normal, deviations from normal and abnormal findings. Uses a 5-step nursing process format to provide the consistent framework for presentation of nursing care. Features care plans with clinical situations for those disorders most prevalent in the elderly. Includes a separate chapter on cultural influences and integrates cultural awareness boxes throughout to focus on specific customs related to how a nurse might care for the aging client. Includes separate chapters focusing on acute, home and long term care to provide a complete discussion of care in each of these settings. Provides detailed coverage of pain, infection, cancer, chronic illness, loss, death and dying, and substance abuse to explain potentially complex aspects of aging and the related care. Provides a consistent chapter pedagogy including learning objectives, summary, key points, and critical thinking exercises. Includes Client/Family teaching boxes that emphasize key aspects of practice and teaching for self-care. Highlights Home Care Tips Boxes to promote practical, effective care for the home-bound older client. Integrates Insight boxes that provide realistic vignettes on caring for the elderly and helpful hints from today's practicing gerontological nurses. Provides Emergency Treatment boxes that alert the student to danger signs and list immediate interventions. Includes research boxes with abstracts of current research and implications for practice. Provides a nuts-and-bolts guide to blood-product administration for adult and pediatric patients. Outlines and explains transfusion reactions. Describes the effect of different types of fluids used in resuscitation. Includes formulas used in fluid administration. Provides the most up-to-date information about oxygen delivery devices. Presents information on how to help a Spanish-speaking child identify his/her level of pain. Includes the pediatric coma scale. Features the pediatric trauma score which is used to help evaluate the severity of injury. Provides information about domestic violence in the Mental Health Conditions chapter. Includes a section on the role of the Sexual Assault Nurse Examiner (SANE) and the latest findings on sexual assault. Presents additional information on mammalian bites and anaphylactic shock. Highlights major points of care for quick reference with bold or italicized text. Presents pediatric and adult content separately in the reference section of the book for fast and easy access. Includes stroke and hypothermia algorithms. Covers the latest information on conscious sedation according to JCAHO standards, including a table on deep sedation. Features several new and updated tables which include the following information: conversion of Centigrade and Fahrenheit, updated normal lab values, updated medication tables, etc. (Includes a FREE MERLIN website at: www.harcourthealth.com/MERLIN/Lueckenotte/)

A new and updated version of this best-selling resource! Jones and Bartlett Publisher's 2011 Nurse's Drug Handbook is the most up-to-date, practical, and easy-to-use nursing drug reference! It provides: Accurate, timely facts on hundreds of drugs from abacavir sulfate to Zyxip; Concise, consistently formatted drug entries organized alphabetically; No-nonsense writing style that speaks your language in terms you use everyday; Index of all generic, trade, and alternate drug names for quick reference. It has all the vital information you need at your fingertips: Chemical and therapeutic classes, FDA pregnancy risk category and controlled substance schedule; Indications and dosages, as well as route, onset, peak, and duration information; Incompatibilities, contraindications; interactions with drugs, food, and activities, and adverse reactions; Nursing considerations, including key patient-teaching points; Vital features include mechanism-of-action illustrations showing how drugs at the cellular, tissue, or organ levels and dosage adjustments help individualize care for elderly patients,

patients with renal impairment, and others with special needs; Warnings and precautions that keep you informed and alert. Equip yourself with the skills to meet the needs of an aging Canadian population. Ebersole and Hess' *Gerontological Nursing and Healthy Aging in Canada, Second Edition* is a concise, gerontological nursing text that follows a wellness-based, holistic approach to older adult care. Featuring the most up-to-date CGNA guidelines, this new edition identifies potential problems and gives you the means to address complications, alleviate discomfort, and assist older adults to help them lead healthy lives. Plus, it contains a variety of learning features that focus your attention on statistics, legislation, practice guidelines, standards of care, and examples relevant to Canadian practice. Focus on health and wellness throughout the book highlights all aspects of the aging process. Core competencies identified by the CGNA integrated throughout book. Careful attention to age, cultural, and gender differences are integrated throughout book to help you care for different population groups. Expanded assessment guidelines and tools incorporated throughout as tables, boxes, and forms, including the latest scales and guidelines for proper health assessment. Activities and discussion questions at the end of every chapter ensure you understand the material and know how to use it in clinical situations. NEW! Enhanced coverage regarding the safety of nurses and clients emphasizes important information for you to consider while working in a clinical setting. NEW! UNIQUE! Latest CGNA guidelines/standards included to ensure you have access to the most up-to-date knowledge and understanding of gerontological nursing. NEW! Additional coverage on disease process and treatment for the older adult covers current findings on timely issues. NEW! Evidence-informed Practice boxes summarize research findings that confirm effective practices and identify practices with unknown, ineffective or harmful effects. NEW! UNIQUE! Gerontology coverage adequately addresses questions on the NCLEX®-RN.

Toward Healthy Aging

Ebersole and Hess' Gerontological Nursing and Healthy Aging, Canadian Edition - E-Book

Gerotranscendence

Essentials of Gerontological Nursing

Ebersole and Hess' Toward Healthy Aging

Given the 2006 GREAT GERONTOLOGY AWARD for outstanding contribution to gerontological research by the Swedish Gerontological Society Received a VALUE GROUND AWARD from the journal Aldreomsorg (Old Age Care) Expanding upon his earlier writings, Dr. Tornstam's latest book explores the need for new theories in gerontology and sets the stage for the development of his theory of gerotranscendence. This theory was developed to address what the author sees as a perpetual mismatch between present theories in social gerontology and existing empirical data. The development towards gerotranscendence can involve some overlooked developmental changes that are related to increased life satisfaction, as self-described by individuals. The gerotranscendent individual typically experiences a redefinition of the Self and of relationships to others and a new understanding of fundamental existential questions: The individual becomes less self-occupied and at the same time more selective in the choice of social and other activities. There is an increased feeling of affinity with past generations and a decreased interest in superfluous social interaction. The individual might also experience a decrease in interest in material things and a greater need for solitary "meditation." Positive solitude becomes more important. There is also often a feeling of cosmic communion with the spirit of the universe, and a redefinition of time, space, life and death. Gerotranscendence does NOT imply any state of withdrawal or disengagement, as sometimes erroneously believed. It is not the old disengagement theory in new disguise. Rather, it is a theory that describes a developmental pattern beyond the old dualism of activity and disengagement. The author supports his theory with insightful qualitative in-depth interviews with older persons and quantitative studies. In addition, Tornstam illustrates the practical implications of the theory of gerotranscendence for professionals working with older adults in care settings. A useful Appendix contains suggestions of how to facilitate personal development toward gerotranscendence. For Further Information, Please Click Here!

Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. *Gerontological Nursing: Competencies for Care, Second Edition* is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. It is the first of its kind to have more than 40 contributing authors from many different disciplines. Some of the key features include chapter outlines, learning objectives, discussion questions, personal reflection boxes, and case studies.

Ebersole & Hess' *Gerontological Nursing and Healthy Aging* is the only gerontological nursing text that follows a wellness-based, holistic approach to older adult care. Designed to facilitate healthy aging regardless of the situation or disease process, this text goes beyond simply tracking recommended treatments to address complications, alleviate discomfort, and help older adults lead healthy lives. Featuring evidence-based practice boxes, safety alerts, expanded tables, and careful attention to age, gender, and cultural differences, "Ebersole & Hess' *Gerontological Nursing and Healthy Aging*" is the most complete text on the market. Equip yourself with the skills to meet the needs of an aging Canadian population. Ebersole and Hess' *Gerontological Nursing and Healthy Aging in Canada, Second Edition* is a concise, gerontological nursing text that follows a wellness-based, holistic approach to older adult

care. Human Needs and Nursing Response

Gerontological Nursing and Healthy Aging

Promoting Positive Ageing

Ebersole and Hess' Gerontological Nursing and Healthy Aging in Canada - E-Book

Gerontological Nursing & Healthy Aging

Gerontological Nursing & Healthy Aging provides thorough coverage of promoting healthy aging when caring for older adults. The intent throughout the book is to facilitate the healthiest adaptation possible for any older adult, regardless of the situation and disease process. The majority of the book is devoted to discussing the significant problems that may occur and methods that nurses may use to make these problems more bearable, to solve some, and to help the elder find the best possible resolution towards healthy aging. Incorporates healthy aging strategies to maximize the healthiest behaviors of clients/patients with dementia and their caregivers. Disease processes are discussed in the context of healthy adaptation, nursing support & responsibilities to help the reader gain an understanding of their client's experience. Focus on health and wellness establishes a positive perspective to aging. Careful attention to age, cultural, and gender differences are integrated throughout to help the nurse understand these important considerations in caring for older adults. Each chapter provides a consistent organization including learning objectives, research & study questions/activities. Assessment guidelines are incorporated throughout as tables, boxes, and forms to provide useful tools for practice. Activities and discussion questions at the end of every chapter provide situations to expand student knowledge and understanding. Appendices and resource lists assist in further exploration of material. Text correlates with federal guidelines for Healthy People 2010 to assist the student in integrating knowledge about healthy aging considerations. Expanded content on pharmacologic and nonpharmacologic pain management in Chapter 15 and integrated within appropriate content sections. Completely revised Culture and Aging chapter includes discussions of health disparities and working with interpreters to help identify nursing care interventions appropriate for ethnic elders. New author team with Theris Touhy and Kathleen Jett adds a wealth of experience related to gerontological nursing education and research.

Learn a positive, uniquely Canadian approach to older adult care. Canada's rapidly aging population will place an unprecedented burden on the health care system and on tomorrow's nurses. It is critical that health care professionals be properly equipped to address the needs and comfort of your older adult patients and clients. Ebersole and Hess' Gerontological Nursing and Healthy Aging, First Canadian Edition includes statistics, legislation, practice guidelines, standards of care, and examples relevant to Canadian practice. Chronic disorders are presented in the framework of health promotion and illness prevention. Canadian demographics and statistics Canadian practice guidelines Canadian law Roles of Canadian health care providers CNA code of ethics Canadian drug names Canadian lab values Canadian research findings Canadian assessment tools Canadian screening guidelines

TOWARD HEALTHY AGING is based on Maslow's conceptual framework of human needs from the basic to the transcendental. With a focus on wellness and healthy aging, this fifth edition emphasizes the individuality of the aged and the humanistic and spiritual potential for further development in late life. Disease processes are discussed in the context of healthy adaptation, nursing support and responsibilities. The text is organized from the basic to the complex in terms of understanding the aged and their needs. Extensive current references, nursing care plans, case studies, student activities, research questions, resources, and appendixes are included in each chapter. * Focuses on health and wellness to establish a positive perspective to aging. * Discusses disease processes in the context of healthy adaptation, nursing support and responsibilities to help the reader gain an understanding of their client's experience. * Integrates considerations for age, cultural, and gender differences throughout to help the nurse understand these important aspects of caring for older adults. * Provides a consistent chapter organization including objectives, nursing care plans, research questions, and study questions/activities to make information easy to find and use. * Includes case studies at end of every chapter to expand student knowledge and understanding. * Features a separate chapter on laboratory values including comparisons and implications for the aged. * Integrates federal guidelines for Healthy People 2000 that reflect current practice about healthy aging considerations. * Includes appendixes and resource lists to assist the student in further exploration of material.

Designated a Doody's Core Title! Named an Outstanding Academic Title for 2006 by CHOICE "Those who are interested in the care of older individuals will find this book thoughtful, exciting, and useful...Highly recommended." --CHOICE Learn the history of the development of geriatric nursing as a specialty, as well as the current state of geriatric nursing, from the stories of pioneers in this field. Through the history of those who laid the foundations for the profession to the geriatric nurse leaders who continue the specialty today, see first-hand how geriatric nursing began, evolved, and continues to flourish. Covering the scope of the specialty:

How to become a geriatric nurse Geriatric nursing organizations and publications Standards of practice Certification and licensure Future directions This text provides both inspirational stories of nursing and practical information on how you can find resources, develop ideas, and access research in order to become a successful geriatric nurse.

Ebersole and Hess' Gerontological Nursing and Healthy Aging

This money-saving package is a must-have for nursing students! It includes Ebersole's Gerontological Nursing and Healthy Aging 2nd edition text and an electronic version of the textbook that allows students to search, highlight information, take notes, share notes and more. This package makes it simple for students to make the most of their study time and get more use out of their textbooks! Essentials of Gerontological Nursing presents the best practices needed to care for older adults. Its brief, yet comprehensive, grasp of issues in elder care is a refreshing addition to the current literature, which is more commonly focused on theory than on clinical practice. Designed primarily for students in gerontological nursing courses in BSN and graduate programs, the book provides: Essential clinical information and "best practices" needed to care for older adults Current research and new patient approaches in gerontological nursing Overviews of rarely discussed issues, such as elder abuse, cultural considerations, and restraint alternatives Clinical specifications and practical applications Content designed to fit into a one-semester course Essentials of Gerontological Nursing is everything the nursing student needs to know when caring for older adults.

This is a Pageburst digital textbook; With a strong focus on health and wellness, this gerontological nursing text offers you a holistic perspective to caring for older adults. Designed to facilitate the healthiest adaptation possible, this text identifies potential problems that may occur and the means to address complications, alleviate discomfort, and help older adults lead healthy lives. Disease processes are discussed in the context of healthy adaptation, nursing support, and nursing responsibilities to help you gain an understanding of your clients' experience. Focus on health and wellness establishes a positive perspective to aging. Careful attention to age, cultural, and gender differences are integrated throughout to help you understand these important considerations when caring for older adults. Healthy aging strategies maximize the healthiest behaviors of clients with dementia and their caregivers. Consistent chapter organization includes learning objectives, research, and study questions/activities to make information easy to find and use. Incorporates assessment guidelines throughout provide useful tools for practice. End-of-chapter activities and discussion questions help you expand your knowledge and understanding of the content. Resource lists provide you with additional means to explore ways to care for the older adult. Incorporates the core competencies identified by the AACN and the Hartford Foundation Institute for Geriatric Nursing. Healthy People 2010 boxes assist you in integrating knowledge about healthy aging considerations. Evidence-Based Practice boxes summarize research findings that confirm effective practices or identify practices with unknown, ineffective, or harmful effects. Expanded sexuality-related content includes older adults living with AIDS and STDs. Genetics section reflects the emergence of the role of genetics in gerontological assessment.

This first edition Australian text aligns nursing care principles and practice to the unique requirements of older people. Written by leading academics and clinicians, Gerontological Nursing: A holistic approach to the care of older people covers the essential skills of gerontological care with a focus on chronic diseases, neurocognitive disorders, mental health, quality of life and healthy ageing, palliative care and bereavement, safety issues, and the role of the caregiver. As nurses play an ever more critical role in supporting the needs of an ageing population, this essential text will enable nursing students to navigate the complexities of older people's healthcare, promote healthy ageing, and help people to live well. End of chapter practice scenarios with questions Tips for best practice Focus on contemporary models of care and clinical governance Inclusion of most common chronic diseases affecting older adults including dementia, depression and delirium Dedicated chapter on Safety and Security Expert contributors from multiple Australian and New Zealand universities Aligned to the Australian Aged Care Quality Standards as well as international standards and guidelines An eBook included in all print purchases Additional resources on Evolve eBook on VitalSource Instructor resources: PowerPoints MCQs Chapter worksheets

100+ Narratives for Learning

Gerontological Nursing

A Developmental Theory of Positive Aging

Aging Well

Ebersole and Hess' Gerontological Nursing & Healthy Aging

As the fastest growing population sector worldwide, older adults are seen in almost every care setting in which clinicians practice. Developed as a resource for advanced practice nurses in any setting, Case Studies in Gerontological Nursing for the Advanced Practice Nurse presents readers with a range of both typical and atypical cases from real clinical scenarios. The book is organized into six units covering cases related to ageism, common health challenges, health promotion, environments of care, cognitive and psychological issues, and issues relating to aging and independence. Each case follows a similar format including the patient's presentation, critical thinking questions, and a thorough discussion of the case resolution through which students and clinicians can enhance their clinical

reasoning skills. Designed to promote geriatric clinical education through self-assessment or classroom use, *Case Studies in Gerontological Nursing for the Advanced Practice Nurse* is a key resource for all those dedicated to improving care for older adults.

This book is a UK adaptation of a Mosby US text, Ebersole & Hess: *Toward Health and Aging: Human Needs and Nursing Response*. It outlines the theoretical foundations which underpin caring for elderly people, before moving on to consider the specific physiological and psychological problems that the elderly face and that those caring for them have to deal with. The latest research, theory and discussions of current practice are integrated throughout the book. The book acknowledges the diversity of older peoples' lives and the environment they inhabit in the UK. It also adopts a theoretical framework "Maslow's Hierarchy of Needs". This states that each individual has an innate hierarchy of needs that motivates all human behavior. These human needs have different priorities. When people achieve fulfillment of elementary needs, they strive to meet those on the next level until the highest order of needs is reached. Maslow's model is widely known and has been found particularly helpful in facilitating a holistic view of older people. * Adopts Maslow's Hierarchy of Needs model, helpful in facilitating a holistic view of older people. * Provides bridge between theoretical foundations of care and actual care provision. * Incorporates 115 illustrations which enhance the text and clarify concepts. * Provide Case Studies for real-life learning. * Includes Chapter Introductions and Chapter Summaries which point out main concepts and provide a useful revision tool. * Features Further Reading lists with the most current book and journal articles for additional information. Not available in the U.S

Ebersole & Hess' *Gerontological Nursing and Healthy Aging* is the only gerontological nursing text that follows a wellness-based, holistic approach to older adult care. Designed to facilitate healthy aging regardless of the situation or disease process, this text goes beyond simply tracking recommended treatments to address complications, alleviate discomfort, and help older adults lead healthy lives. Tips for Best Practice boxes feature summarized lists of evidence-based nursing interventions for practice. Healthy People boxes reference the goals cited in Healthy People 2020. NEW! Additional coverage of frailty in older adults helps you to understand the precautions you need to take when working with this population. NEW! Increased information on Health Literacy assists you in learning the right terms to promote healthy aging. NEW! Added information on herbs/supplements includes essential oils and green tea.

Ebersole and Hess' *Gerontological Nursing & Healthy Aging* Ebersole and Hess' *Gerontological Nursing & Healthy Aging* Elsevier Health Sciences

Provide holistic, compassionate nursing care for older adults! Based on evidence-based protocols, *Toward Healthy Aging, 11th Edition* helps you master gerontological nursing skills with an approach that focuses on health, wholeness, and the potential in aging. In promoting healthy aging, the text emphasizes caring and respect for the person. Special sections provide an honest look at the universal experience of aging. Written by gerontological nursing experts Theris A. Touhy and Kathleen F. Jett, this classic text helps you learn to apply scientific research, build critical thinking skills, and prepare for success on the NCLEX® exam and in clinical practice. Promoting Healthy Aging: Implications for Gerontological Nursing sections help you apply concepts to assessments and interventions. A Student Speaks and An Elder Speaks sections at the beginning of every chapter provide perspectives of older people and nursing students. Nursing Studies provide practice examples designed to assist you in assessment, planning, interventions, and outcomes to promote healthy aging. Learning objectives in every chapter introduce important content and define learning goals and expectations. Key concepts provide a concise review of the most important points found in each chapter. Critical Thinking Questions and Activities help you apply concepts and build clinical judgment skills. Safety Alerts emphasize QSEN competencies and safety issues related to care of older adults. Tips for Best Practice boxes summarize evidence-based nursing interventions for practice. Research Highlights boxes summarize important research studies in the field of gerontology Research Questions include suggestions and ideas for pursuing nursing research. Healthy People boxes reference the goals cited in Healthy People 2020. NEW! Next Generation NCLEX® (NGN) examination-style case studies at the end of chapters include questions to help you prepare for the NGN exam. NEW! Completely updated content helps you develop clinical judgment skills, identified by the NCSBN and the AACN as a key attribute of professional nursing. NEW! Updated topics include COPD guidelines, theories of aging, medication use and misuse, palliative care, wound care guidelines, genomic research, and LGBT family relationships and sexuality in older adults.

With a strong focus on health and wellness, this gerontological nursing text offers you a holistic perspective to caring for older adults.

Designed to facilitate the healthiest adaptation possible, this text identifies potential problems that may occur and the means to address complications, alleviate discomfort, and help older adults lead healthy lives. Disease processes are discussed in the context of healthy adaptation, nursing support, and nursing responsibilities to help you gain an understanding of your clients' experience. Focus on health and wellness establishes a positive perspective to aging. Careful attention to age, cultural, and gender differences are integrated throughout to help you understand these important considerations when caring for older adults. Healthy aging strategies maximize the healthiest behaviors of clients with dementia and their caregivers. Consistent chapter organization includes learning objectives, research, and study questions/activities to make information easy to find and use. Incorporates assessment guidelines throughout provide useful tools for practice. End-of-chapter activities and discussion questions help you expand your knowledge and understanding of the content. Resource lists provide you with additional means to explore ways to care for the older adult. Incorporates the core competencies identified by the AACN and the Hartford Foundation Institute for Geriatric Nursing. Healthy People 2010 boxes assist you in integrating knowledge about healthy aging considerations. Evidence-Based Practice boxes summarize research findings that confirm effective practices or identify practices with unknown, ineffective, or harmful effects. Expanded sexuality-related content includes older adults living with AIDS and STDs. Genetics section reflects the emergence of the role of genetics in gerontological assessment.

Awarded a 2012 AJN Book of the Year Award! Why focus on the negative aspects of growing old while most older adults are leading positive, fulfilling, and active lives even while dealing with the changes associated with aging and chronic illnesses? Promote healthy aging; learn what it means to age successfully; and develop the tools and resources that can optimize well-being during the later years in life with the guidance you'll find inside. The author, a nationally recognized expert in the field of gerontology addresses the physical, psychosocial, and spiritual needs of older adults based on a holistic, mid-range nursing theory of successful aging. Contributions from healthcare professionals in exercise physiology, nutrition, pharmacy and elder law help you understand how these disciplines work together to benefit patients.

As the most comprehensive resource on health promotion and maintenance for older adults and their families and caregivers, *Toward Healthy Aging, 7th Edition* includes the most current information you need to provide effective holistic care, promote healthy lifestyle choices, and address end-of-life issues. Grounded in the core competencies recommended by the AACN in collaboration with the Hartford Institute for Geriatric Nursing and using Maslow's hierarchy of needs, this book includes complete coverage of both common and uncommon conditions in the older adult. *Towards Healthy Aging* also highlights key aging issues with sections devoted to basic physiologic needs, safety and security, the need to belong, self-esteem, and self-actualization. A strong focus on health and wellness emphasizes a positive approach to aging. Disease processes are discussed in the context of healthy adaptation, nursing support, and responsibilities. Careful attention to age, cultural, and gender differences are integrated throughout to help you remember these important considerations when caring for older adults. Up-to-date content on AIDS provides important information on addressing this growing concern among older adults. Consistent chapter organization with objectives, case studies, critical thinking questions, research, and study questions make information easy to find and use. Assessment guidelines are incorporated throughout in helpful tables, boxes, and forms for quick access. Case studies at the end of most chapters explore realistic patient care scenarios to help you expand your knowledge and understanding. Resource lists and appendices provide opportunities for further research and study. With over 200 illustrations, the full-color design is engaging and easy to read. Healthy People 2010 boxes address healthy aging considerations. Evidence-Based Practice boxes help you incorporate the latest research findings into practice and advise you on how to avoid potentially harmful practices. A Nutritional Needs chapter includes the most current nutritional guidelines for older adults to help you better address patients' nutritional needs. Includes the latest scales and guidelines for assessing the gerontologic patient in the Health Assessment in Gerontological Nursing chapter. Expanded coverage of end-of-life issues helps you meet the needs of older adults and their families and caregivers during this difficult transition. Economics of aging discussions help you better understand the financial challenges your patients may face. The latest pharmacologic and nonpharmacologic pain management information helps you reduce pain and discomfort for your patients and helps you provide more effective care.

Contemporary Issues in Gerontology

Nursing Older People

Retooling for an Aging America

Growth of a Specialty

GERONTOLOGICAL NURSING, 3/e is a comprehensive, research-based, and up-to-date guide to nursing care for older adults in all settings. It brings together essential information about normal and pathological changes associated with aging; healthy aging; common diseases of aging; and key psychosocial, cultural, and public health issues. Reflecting today's emphasis on evidence-based practice and appropriate delivery of scarce healthcare resources, this text presents new best practices and QSEN standards throughout, promoting more effective assessment, diagnosis, planning, and outcome evaluation. The text's multidisciplinary approaches help nurses "add life to years," not just extend life. Its coverage of acute and chronic diseases includes nursing implications, atypical presentation, functional implications, pharmacology, evaluation, etiology, risk factors, and complications; the text also includes a full chapter on multisystem diseases. This book supports safe, effective, and appropriate practice in the home, hospitals, long-term care, and hospice settings.
