China is certainly doing its best to keep the world mesmerized by its e- nomic achievements. The Chinese economic growth story that begun 30 years ago has in terms of dynamics and duration long since surpassed all those “ economic miracles ” which have brought Germany, Japan, and the South East Asian Tigers into the top–league of the industrialized world. The rapid expansion of the Chinese economy has gone along with a fu- fledged re-integration of China into the global economic system. In the course of the last 30 years China has become a major player in the global economy and today is on a trajectory towards even greater prominence. In recent years, the Chinese economy seems to have reached an imp- tant threshold line of economic development and global integration. In the first quarter century of reform and global opening, Chinese enterprises have been largely confined to a ‘ passive ’ role in the global division of - bor. Foreign enterprises as the proprietors of greatly superior business models, production technologies, management models as well as very competitively established brands have been integrating Chinese players in their value chains and global operations. Lacking the necessary production technologies, products as well as marketing knowledge to successfully - dress OECD-consumers, Chinese enterprises have been hardly able to - ter the global markets without such guidance. Now, this constellation is changing.

International Marketing: Second Asia–Pacific Edition is a thorough revision reflecting contemporary developments in international marketing. The text maintains the strengths of the original Global Marketing Management text by Masaaki Kotabe and Kristiaan Helsen, and is presented in an engaging and accessible style. The book aims to help Australasian students understand contemporary international marketing activities and issues in an increasingly competitive marketplace. The use of real-world examples of both small and medium-sized enterprises (SMEs) and multinational corporations (MNCs) operating in the Asia–Pacific region provides a strong theoretical and conceptual foundation of international and global marketing perspectives. A key underlying theme of the text is that while it may not be possible for all organisations in the Asia–Pacific region to market their products and services on a truly global scale, organisations that operate in any marketplace need to understand and be aware of competition from both local SMEs and MNCs that are increasingly attempting to operate globally.

Get the Global Edge in Marketing "The conceptual framework developed in this book will facilitate an in-depth study of international marketing issues. . well-thought out and structured analysis of several important concepts. A comprehensive set of tools are presented so that students can analyze and understand the global marketplace. The examples are application oriented and focus on interesting business practices. Country coverage is extensive. The global perspectives inserts are a major strength of the book. It provides unique and novel insights on the strategies of multinational corporations in a wide range of situations and countries."--D. Maheswaran, New York University "This text definitely portrays modern teaching concepts in global marketing - much more holistic examination of the marketing function." - Hildy Teegen, The George Washington University "It is truly global, comprehensive, and cross-functional. Extensive coverage of sourcing strategy, GATT/WTO/FTAs, and culture's role across all elements add new dimensions. The increased coverage of segmentation has long been overdue in this field and is well-handled in this text. The work is current, up-to-date, and portrays modern teaching concepts in global marketing. Many of the examples are unique to this text and serve as refreshing changes from the tired war stories that often appear again and again elsewhere." - Scott Swan, The College of William & Mary "The authors' tone and style shall appeal to our students. They write in a clear and comprehensive style. . The authors have researched well and presented appropriate and interesting examples to illustrate the text. The cases cover extensive geographical areas; functional areas such as product, pricing, promotion and advertising, technology, retailing, etc. add to the students' learning experience." - K.C. Dhawan, Concordia University/Montreal.

Steenkamp introduces the global brand value chain and explains how brand equity factors into shareholder value. The book equips executives with techniques for developing strategy, organizing execution, and measuring results so that your brand will prosper globally. What sets strong global brands apart? First, they generate more than half their revenue and most of their growth outside their home market. Secondly, their brand equity is responsible for a massive percentage of their firm’s market value. Third, they operate as single brands everywhere on the planet. We find them in B2C and B2B industries, among large and small companies, and among established companies and new businesses. The stewards of these brands have a set of skills and knowledge that sets them apart from the typical corporate marketer. So what’s their secret? In a world that is globalizing, but not yet globalized, how do you build a powerful global brand that resonates universally but also accommodates local nuances? How do you ensure that it is dynamic and flexible enough to change at market speed? World-class marketing expert Jan-Benedict Steenkamp has studied global brands for over 25 years on six continents. He has distilled their practices into eight tools that you can start using today. With case studies from around the world, Steenkamp’s book is provocative and timely. Global Brand Strategy speaks to three types of B2C and B2B managers: those who want to strengthen already strong global brands, those who want to launch their brands globally and get results, and those who need to revive their global brand and stop the bleeding.

Microsoft Windows Server is a multi-purpose server designed to increase reliability and flexibility of a network infrastructure. Windows Server is the paramount tool used by enterprises in their datacenter and desktop strategy. The most recent versions of Windows Server

also provide both server and client virtualization. Its ubiquity in the enterprise results in the need for networking professionals who know how to plan, design, implement, operate, and troubleshoot networks relying on Windows Server. Microsoft Learning is preparing the next round of its Windows Server Certification program with exams covering the new version of the software, Windows Server 2012. The exams and certification path change significantly from the previous version of Windows Server. This provides an opportunity for the MS line to capitalize on the dual disruption of brand-new software and brand-new certifications.

Global Marketing Management prepares students to become effective managers overseeing global marketing activities in an increasingly competitive environment. The text s guiding principle, as laid out clearly and methodically by authors Kotabe and Helsen, is that the realities of international marketing are more multilateral. The 5th Edition further addresses some peculiar phenomenon being observed in global marketing today. Whether they choose to pursue marketing careers, all students learn how marketing managers can affect other business functions for effective corporate performance on a global basis and how to work effectively with others for the same corporate goal. Global Marketing Management brings timely coverage in various economic and financial as well as marketing issues that arise from the acutely recessionary market environment.

Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the USA angle, going on to address IB issues from other countries' perspectives, what we call the “Reverse Perspective.” The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Cases include: Air Arabia, Gap, Diebold Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics
