

## *Global Solutions Company Profile*

Emerging economies are expected to be in the driver's seat of the global economy in the medium and long term. Large multinational corporations will account for much of this activity. In this textbook, Andrei Panibratov explains how emerging market firms accumulate and exploit market knowledge to develop competitive advantages whilst operating globally. Chapters dedicated to the key emerging economies - Brazil, Russia, India and China (BRIC) - are enhanced by detailed case studies of large firms' activities. The book is divided into four parts, focusing on the following: An outline of the relevant terminology and the context of the international strategy of emerging market firms, providing an introductory foundation for the whole book. A guide to the evolution of perspectives regarding international strategy, designed to illustrate the changes and trends in the recent academic research on internationalization. A country-by-country illustration of the internationalization of BRIC economies and firms, providing an overall picture of each country's global integration, outward investments, and strategies. The concepts and practices behind the strategies employed by different firms. Written by an established international business scholar, this book is essential reading for students of international strategy who wish to understand the importance of the emerging economies.

Inhaltsangabe: Introduction: Coming together is beginning. Keeping together is process. Working together is success. Henry Ford. Raising global competition, increasing customer demand, requests to deliver just-in-time, and an increasing pressure to cut costs are only a few examples to express the need for more flexibility, speed and agility of organizations. Companies in different industry segments can achieve this requirement by flexible organizational structures, a knowledgeable and motivated workforce, and the application of technology and communication media. In this context the composition of teams plays an important role because it has proven to be a fast and comprehensive way to solve problems, to fulfill customer demand, and to develop new products and processes. Over the past decade the construct of teams has further developed into so called virtual teams. Virtual teams are teams which include team members who work together remotely from various locations around the globe. Lipnack and Stamps (1997) characterize virtual teams as the peopeware for the 21st century. The modality of working in virtual teams becomes more popular as the world's population becomes more connected. Research proposes that virtual teams are as effective as traditional teams. Virtual teams offer the opportunity to meet the challenges of cost effectiveness, product quality, and speed in an international setting that is driven by customer orientation and a rapidly changing economy. Furthermore, people with the most experience and knowledge for a specific business topic can be brought together no matter where they are located in the world. In a virtual team setting, modern communication technology plays an important role because it brings together the virtual team members that are located in various places around the globe. Formerly, members of a traditional team had many opportunities to meet in-person to discuss business and project issues. But with team members working from distributed locations, meeting in-person is hindered. In such cases a team depends heavily on communication technology that offers some kind of substitution for meeting in-person. Video conferencing has long been known as one option to meet distributed team members

face-to-face. Baker (2002) concludes in his study that video conferencing is the best way of communication in virtual teams. Because traditional video conferencing had its limitations, vendors lately have introduced telepresence [...]

This is the first report of the WIPO Patent Landscape Report series in the area of disabilities. It presents research on various assistive devices and technologies, includes an analysis on the geographical distribution of patent protection of these technologies, and features business data on major patent portfolios as well as a round-up of key innovators. Additionally, the report touches on technologies serving the same goals as the Marrakesh Treaty and the Accessible Book Consortium (ABC), namely those facilitating access of visually and hearing impaired persons to published works.

How do political ideologies and urban landscapes intersect in the context of globalization? This volume illuminates the production of ideologies as both discursive and spatial phenomena in distinct contributions that ground their analysis in cities of the Global North and South. From Sydney to Singapore, Hong Kong to Hanoi, Las Vegas to Macau, conventional public spaces are in decline as sites of ideological dissent. Instead, we are witnessing the colonisation of urban space by market globalism (today's dominant global ideology) and securitised surveillance regimes. Against this backdrop, how should we interpret the proliferation of metaphors that claim to communicate the essence of global transformation? In what ways do space and language work together to normalise the truth claims of powerful ideological players? What kinds of social forces mobilise to contest the cooptation of language and space and to pose alternative local and global futures? This volume poses these questions against the collapse of old geographical scales and cartographic techniques for identifying the contours of civil society. The city acts as an entry point to a new spatial analytics of contemporary ideological forces. This book was published as a special issue of Globalizations.

Volume II: Regional, Geopolitical Perspectives and Crisis Management

Pirates, rebels and mercenaries

Federal Tax Litigation

Women and Management: Global Issues and Promising Solutions [2 volumes]

Global Sourcing of Information Technology and Business Processes

From Business Analysis to Operational Planning

The books in this set, originally published between 1968 and 1992 introduce the reader to the lines of thought in the literature on economic geography and tie these various aspects together to the concept of the economy. As well as providing a comprehensive overview of the Western European economy since the Second World War, and including specific studies and assessments of the British and Italian economies, these volumes examine the economic factors that have shaped cities and patterns of urbanization.

Innovating Professional Services provides a practical and detailed guide for change agents and leaders in professional service firms who are seeking to transform their firm's performance through innovation. The book covers business innovation in its broadest sense as it is relevant to the professional services sector. This includes process innovation - the re-engineering of services and internal support processes to reduce cost and increase value to clients. It also includes the development of new services, market-position innovation and also business model innovation. Ross draws heavily on his practical experience in working with leading law firms and business and consulting firms over the past ten years in which he and his firm have applied best practice techniques and methods to create measurable improvements. Detailed techniques such as the

Lean, process mapping, waste identification, service experience mapping and value profiling are explained. The book also details effective approaches for making the required changes in professional service firms. Multiple case studies are used to help demonstrate the opportunities - and challenges - of driving major improvement through innovation. The book can be used by leaders and change agents in law firms, accountants, consultants, architects, financial services and engineering services to explore the opportunities for innovation in their firms and then to construct and implement a transformation programme to embed innovation in their organisations.

This edited book is intended for use by students, academics and practitioners who take interest in outsourcing and offshoring of information technology and business processes. The book offers a review of the key topics in outsourcing and offshoring, populated with practical frameworks that serve as a tool kit to students and managers. The range of topics covered here is wide and diverse. The sourcing models available to client firms are discussed in great depth and the decision-making processes and considerations regarding the sourcing model and sourcing settings are examined. Vendor capabilities as well as client capabilities are studied in depth and links are offered to the various sourcing models. Issues pertaining to knowledge and expertise are also discussed throughout the book. Last but not least, the book examines current and future trends in outsourcing and offshoring, paying particular attention to the role that CIOs will play in shaping their sourcing strategies. The book is based on a vast empirical base brought together through years of intensive research by the leading researchers of outsourcing and offshoring. June 2010 Ilan Oshri Julia Kotlarsky Organization Global Sourcing Workshop is an annual gathering of academics and practitioners. Praise for LEARNING PRACTICAL FINTECH FROM SUCCESSFUL COMPANIES

"Throughout my career I've seen the world of finance transformed by technology, from the earliest days of online lending to the current innovations happening with blockchain and cryptocurrency. I believe we're at a critical point in history where a new Internet of Value is starting to emerge, and I'm excited to see so many talented entrepreneurs tackling problems in global

finance today." —CHRIS LARSEN, Cofounder and Executive Chairman of Ripple  
"Blockchain technology is changing the way the world does business. This book offers an inside look at how institutions from all corners of financial services and other areas of commerce are collaborating with software firms like R3 to re-engineer the infrastructure that enables money, goods, and information to flow around the globe." —DAVID RUTTER, Founder, Chief Executive Officer of R3

"When we think about FinTech, we often think about New York, Silicon Valley, and London, but this book tackles the awakening dragon that is Asian FinTech. Do yourself a huge favor and read this book. Asia is where the real FinTech evolution is happening." —BRETT KING, Author of Augmented and BANK 4.0, Host of the Breaking Banks Radio Show, Founder of Moven

For every woman still bumping the glass ceiling and every man who cares, these volumes recount challenges female leaders face—and strategies that will smooth the path to managerial positions in corporate America and worldwide.

- Prepares both women and men to meet the challenges of today's global workforce
- Shares up-to-date research about women leaders worldwide, including strategies for success
- Provides an overview of gendered organizations to help readers understand organizational dynamics that prevent women from reaching their leadership potential
- Discusses generational differences in perceptions of women leaders and managers
- Offers best practices to assist organizations

This publication presents the latest innovations and achievements of academic communities on Decision Support Systems (DSS). These advances include theory systems, computer-aided methods, algorithms, techniques and applications related to supporting decision making. The aim is to develop approaches for applying information systems technology to increase the effectiveness of decision making in situations where the computer system can support and enhance human judgments in the performance of tasks that have elements which cannot be specified in advance. Also it is intended to improve ways of synthesizing and applying relevant work from resource disciplines to practical implementation of systems that enhance decision support capability. The resource disciplines include: information technology, artificial intelligence, cognitive psychology, decision theory, organizational theory, operations research and modeling. Researchers come from the Operational Research area but also from Decision Theory, Multicriteria Decision Making methodologies, Fuzzy sets and modeling tools. Based on the introduction of Information and Communication Technologies in organizations, the decisional process is evolving from a mono actor to a multi actor situation in which cooperation is a way to make the decision.

Perspectives and Challenges

## Dynamics, Analysis, Growth

### The Digital Economy

#### International Approaches

Small and medium-sized enterprises (SMEs) play a critical role in rejuvenating and sustaining the modern economy, generating substantial employment and serving as important innovation engines for the global economy. *Global Perspectives on Small and Medium Enterprises and Strategic Information Systems: International Approaches* aims to spread research conducted on SMEs internationally and place it at the disposal of academics, practitioners, consultants, the vendor community, and policymakers. The goal of this book is to highlight the challenges faced by SMEs and how they are coping with the adverse environment through skillful use of IT and technologies such as Web 2.0, Enterprise Resource Planning (ERP), e-commerce, open source software, Business Process Digitization (BPD), and other emerging technologies.

This volume redefines the genre of sector studies. The first part of the book compares the experiences of Britain and France in the very volatile world of high-tech industries during the 1980s. The macroeconomic regulation approach is carried over a microeconomic level in the empirical chapters through an analysis of studies of firms, each chapter written by authors well-placed to give a pan-European perspective.

□ New York Times bestseller □ The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the *Drawdown* book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, *Vox* "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate

change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

This carefully-researched book covers exciting trends in consulting in such fields as marketing, information technology, management, logistics, supply chain, manufacturing, health care and more. Includes complete details on the prestigious management consulting sector, plus our analysis of the information technology consulting business. This reference tool includes thorough market analysis as well as our highly respected trends analysis. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts for business and industry leaders, industry associations, Internet sites and other resources. This book also includes statistical tables, an industry glossary and thorough indexes. The corporate profiles section of the book includes our proprietary, in-depth profiles of the 275 leading companies in all facets of consulting. Here you'll find complete profiles of the hot companies that are making news today, the largest, most successful corporations in the business. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

**Network Business Series Justify Your Network Investment** The definitive guide to IPv6 decision making for non-technical business leaders Every year, organizations rely on

Internet applications and services more deeply—and every year, Internet infrastructure grows more powerful and complex. As the limitations of traditional IPv4 addressing become increasingly apparent, many decision makers recognize that a transition to IPv6 is needed far sooner than anticipated. *Global IPv6 Strategies* gives non-technical decision makers the information to plan and execute an orderly, efficient migration to IPv6—and reap the business benefits. This book's authors offer practical scenarios, proven best practices, and real-world case studies drawn from their unsurpassed experience helping enterprises and service providers move to IPv6. Writing for non-technical decision makers, they systematically review the costs, benefits, impacts, and opportunities associated with IPv6 migration. Their insights and strategies can help you address both the technical side of IPv6 and the rarely discussed organizational issues that can make or break your transition. Patrick Grossetete, manager of Product Management at Cisco®, is responsible for key Cisco IOS® software technologies including IPv6 and IP Mobility. A member of the IPv6 Forum Technical Directorate, he has been honored with the IPv6 Forum Internet Pioneer Award. Ciprian P. Popoviciu, PhD, CCIE® No. 4499, technical leader at Cisco, focuses on architecting, designing, and testing large IPv6 network deployments for service providers and enterprises worldwide. Grossetete and Popoviciu co-authored *Deploying IPv6 Networks* (Cisco Press). Fred Wettling manages architecture and strategic planning for Bechtel. Wettling is a member of the IEEE, North American IPv6 Task Force, and IPv6 Forum; directs the IPv6 Business Council; chaired the Network Applications Consortium (NAC); and served on the President's National Security Telecommunications Advisory Committee Next Generation Network Task Force.

Understand how efficient IP communications are rapidly becoming even more central to business and economic growth. Get past the "IPv4 vs. IPv6" myths that prevent effective decision making and planning. Objectively assess the constraints of existing IPv4 infrastructures—and learn how IPv6 can overcome them. Develop and analyze the business case for IPv6—with help from real-world, never-before-published case studies. Identify hidden business opportunities IPv6 can unleash. Choose the optimal IPv6 adoption strategy for your enterprise or organization. Learn realistic best practices for planning successful migrations. This volume is in the Network Business Series offered by Cisco Press®. Books in this series provide IT executives, decision makers, and networking professionals with pertinent information about today's most important technologies and business strategies. Category: Networking Technology Covers: IPv6

Based on the author's decades of years of experience in oil refining, *Catalytic Naphtha Reforming Process* conveys essential information on key concepts, operations, and practices of catalytic naphtha reforming technologies and associated oil refining processes. The book reviews collective technical and operational advancements with respect to efficient use of catalysts and catalytic reformers in oil refining and incorporates key advancements from recent developments in catalytic reforming technologies and processes. High octane reformat gasoline blendstock production via the use of high performing continuous catalyst regenerative processes is emphasized for regulated, environmentally friendly gasoline. The benefits of timely, effective process unit monitoring are covered in this book. Some of the principal objectives of this book include the need to emphasize more proactive approaches in the planning, operations and maintenance of catalytic reforming units and oil refineries. A number of recommendations are provided for enhancing the operations, reliability, and productivity of catalytic reformers and oil

refineries.

Online Business Sourcebook is the only evaluative guide to electronic business database products and services. The arrangement of products and services within the Sourcebook is by thematic chapter, to make it easy to review all products on a specific topic: Online hosts and aggregators; The Internet; Company directories; Company financials; Investment analysis; Shareholder analysis; Credit; Mergers and acquisitions; Business and financial news; Business opportunities; Grants, advice and source of finance; Legislation and regulations; Prices; Market data; Industries; Economics and finance; International trade; Business management literature; Trademarks, trade names and brands; Recent highlights. Within most chapters, products are arranged by geographic coverage. Incorporated are three indexes: names; country/regions and subjects.

How can America's information technology (IT) industry predict serious labor shortages while at the same time laying off tens of thousands of employees annually? The answer is the industry's flexible labor management system--a flexibility widely regarded as the modus operandi of global capitalism today. Global "Body Shopping" explores how flexibility and uncertainty in the IT labor market are constructed and sustained through concrete human actions. Drawing on in-depth field research in southern India and in Australia, and folding an ethnography into a political economy examination, Xiang Biao offers a richly detailed analysis of the India-based global labor management practice known as "body shopping." In this practice, a group of consultants--body shops--in different countries works together to recruit IT workers. Body shops then farm out workers to clients as project-based labor; and upon a project's completion they either place the workers with a different client or "bench" them to await the next placement. Thus, labor is managed globally to serve volatile capital movement. Underpinning this practice are unequal socioeconomic relations on multiple levels. While wealth in the New Economy is created in an increasingly abstract manner, everyday realities--stock markets in New York, benched IT workers in Sydney, dowries in Hyderabad, and women and children in Indian villages--sustain this flexibility.

The Fast Track Set Up Guide is a step by step comprehensive resource to help entrepreneurs set up a business in Dubai, Abu Dhabi & the Northern Emirates of the United Arab Emirates (UAE) all on their own. Learn the rules of the road directly from experts, from brick and mortar establishments to freehold zones to virtual offices, this guide takes you through everything you need to know to get started immediately and save thousands of dollars in the process.

This open access book focuses on Switzerland-based medium-sized companies with a longstanding export tradition and a proven dominance in global niche markets. Based upon in-depth documentation and analysis of 36 Swiss companies over their entire history, an expert team of authors presents several parallels in the pathways and success factors which allowed these firms to become dominant and operate from a high-cost location such as Switzerland. The book enhances these insights by providing detailed company profiles documenting the company history, development, and how their relevant global niche positions were reached. Readers will benefit from these profiles as they compile a diverse selection of industries, mainly active within the B2B sector, with mostly mature companies (60 years to older than 100 years since founding) and different types of ownership structures including family firms. 'Masterpieces of

Swiss Entrepreneurship' brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere. Findings are based on detailed bottom-up research of 36 companies -- without any preconceived notions. The book is both conceptual and practical. It fosters understanding for different choices in development pathways and management practices. Matti Alahuhta, Chairman DevCo Partners, ex-CEO Kone, Board member of several global listed companies, Helsinki, Finland Start-up entrepreneurs need proven models from industry which demonstrate the various paths to success. "Masterpieces of Swiss Entrepreneurship" provides deep insights highlighting these models and the important trade-offs entrepreneurial teams must consider when choosing the path of high growth or of maximum control, as they are often mutually exclusive. Gina Domanig, Managing Partner, Emerald Technology Ventures, Zurich Learn the fundamentals of Intranets--today's hottest topic in computing. This text examines key Intranet issues, including maintaining a secure environment, maximizing performance, groupware that works, and the "real" hardware and software requirements. Step-by-step instructions presents the information readers need to know. Learn from Intranet design that work and from those that don't. The CD-ROM illustrates the power of Intranets, and contains complete sample programs. *Global Problems, Global Solutions: Prospects for a Better World by JoAnn Chirico approaches social problems from a global perspective with an emphasis on using one's sociological imagination. Perfect for instructors who involve students in research, this text connects problems borne by individuals to regional, global, and historical forces, and stresses the importance of evidence in forming*

*opinions and policies addressing social issues. The book introduces readers to the complexities of the major problems that confront us today such as violent conflict, poverty, climate change, human trafficking and other issues that we encounter in our lives. It book concludes with a chapter on politics and government, underscoring the need for good governance at all levels—and cooperation among many layers of government—to build a better world.*

*Huawei Goes Global provides a much-needed, comprehensive, and scholarly examination of the business environment and the striving global operations of China's technology giant. With theoretical research, case studies, data analysis, and empirical studies, this two-volume work tells a fascinating story of internationalization in an emerging economy. As one of the most powerful Chinese companies in the global economy, the largest global telecommunications-equipment producer and a leading consumer-electronics manufacturer, Huawei is a great example of the globalization of the Chinese enterprises in the twenty-first century. In Volume I, scholars critically examine the rise of Huawei as a Chinese global enterprise from the political economy and public policy perspectives, as well as Huawei's development strategies, innovations, and talent management. In Volume II, multiple authors carefully study the growth of Huawei from regional and geopolitical perspectives, and its corporate communication and crisis management. Within the framework of the trade conflicts between China and the US, controversies over economic sanctions, intellectual-property disputes, and espionage and cyber security concerns, this groundbreaking work makes an important contribution to both academic literature and the ongoing public discourse on Huawei. Volume II is available here:*

*<https://www.palgrave.com/gp/book/9783030475635>*

*Information technologies (IT) shape economic space, but we have no clear map of the cyber economy since the "digital revolution" began in the early 1970s. The Digital Economy offers an up-to-date, critical synthesis that links the various aspects of the digital or cyber economy from the perspective of real firms. A geographic approach emphasizes how IT has made businesses less dependent on locational constraints, and the tangible effects on places and regions are placed at the core of the analysis. Case studies of companies, including Amazon, Dell, Li & Fung, and Volvo,*

*demonstrate that the geography of digitally-driven production is the outcome of both dispersion and agglomeration dynamics. Global corporations are shown to have footprints that ignore - to some degree - distance and time, yet creative and coordinating activities remain anchored in urban innovative ecosystems such as Silicon Valley and Bangalore. These trends have been made possible by the development of a worldwide and integrated telecommunications network, whose unequal presence dictates the capabilities of places and communities to be connected to the global economy. However, the threat of the digital divide must not be overstated. In cities, rural areas, and emerging countries, local development is wrapped up in human capital, rather than technology. This engaging and accessible text describes and explains the patterns and dynamics of today's digital economic space. The effects on places and regions and the people in them are at the core of the authors' analysis, illustrated by many real examples. This book will be useful to anyone studying business and management, geography and information and communication studies.*

*This law book offers an insider's perspective on both the legal issues and practical considerations involved in handling a federal tax controversy.*

*Global Strategy in the Service Industries*

*Transforming Value and Efficiency*

*The contribution of telepresence to support distance management*

*05 Company Book - INFORMATION TECHNOLOGIES*

*Online Business Sourcebook*

*A Casebook on Asia's Global Market Leaders*

*"Describes specific steps any business can take to implement sound, practical, climate-related corporate policies." - cover.*

*This casebook demonstrates that the future of global business lies in how well the multinational landscape is charted and how the importance of Asian market leaders is deeply embedded in it. It offers international management students and researchers an extensive guide to the business history, strategy development, and foreign market entry modes used by emerging Asian multinationals. The cases focus on well-known companies such as Lenovo, Alibaba, Infosys, Huawei, Panasonic, and Rakuten. These companies, all of which generate huge revenues in their own countries (e.g. in China, India, South Korea, Taiwan, Vietnam), are now becoming increasingly sophisticated and striving to become global brands,*

**while also enjoying the active support of their governments in terms of their international business. Readers will learn about the current multinational landscape in Asia, the management challenges, and the future implications for traditional western companies seeking to retain their market share. Chapters on corporate entrepreneurship, human resource management and intercultural competence, and current branding trends in Asia will provide a cutting-edge update on international business strategy for students and practitioners alike.**

**Global service-based firms are often 'born global,' and these organizations have developed integrated global strategies based on industry relationships, in order to thrive in new environments. Focusing on these global strategies, this textbook explores the workings of modern service businesses, presenting theoretical management concepts alongside illustrative examples. Original case studies from a range of global sectors, including Starbucks and Facebook, as well as broader studies, such as healthcare in Japan, provide practical insights into the art of thriving as a global business. Written by a leading expert in the field, this multidisciplinary text is a vital read for all scholars and students wishing to view strategic relationships from the focal point of service industries.**

**Global Business Leadership discusses the urgent issues facing global business leaders and presents seven strategies found necessary for successful intercultural business ventures. It provides business professionals and students with insight into the failure of businesses to prepare leaders for stepping into complex cultural contexts. The Geoleadership Model developed by Dr. Wibbeke is applied to global business situations using cases taken from leading companies such as Google and eBay. The book uses a case study format to present salient issues related to intercultural leadership and then principles of the model are applied to the case in discussion format. The concepts of care, communication, consciousness, change, capability and others are analyzed in relation to how each concept is seen in different parts of the business world. Each chapter concludes with a "bottom line" example of how each Geoleadership concept directly affects business results. Global Business Leadership also provides instruction about entry into cultural contexts, negotiating, preventing and managing cultural-based local-global conflict, and preparing global leaders to increase intercultural awareness and sensitivity. Dr. Wibbeke founded and managed the leading Internet website (Web of Culture) for cross-cultural information on the Internet and shares such global experiences with other would-be globetrotters.**
