entrepreneurship from the perspective of competition in emerging markets. Featuring contributions by scholars from different fields of interest, it provides a mix of theoretical developments, insights and research methods used to uncover the unexplored aspects of competitiveness in emerging markets in an age characterized by disruptive technologies.

This book reflects the tremendous changes in the telecommunications industry in the course of the past few decades – shorter innovation cycles, stiffer competition and new communication products. It analyzes the transformation of processes,

applications and network technologies that are now expected to take place under enormous time pressure. The International Telecommunication Union (ITU) and the TM Forum have provided reference solutions that are broadly recognized and used throughout the value chain of the telecommunications industry, and which can be considered the de facto standard. The book describes how these reference solutions can be used in a practical context: it presents the latest insights into their development, highlights lessons learned from numerous international projects and combines them with well-founded research results in

As organisations rush to adopt Cloud Computing at a rate faster than originally projected, it is safe to predict that, over the coming years, Cloud Computing will have major impacts, not only on the way we conduct science and research, but also on the quality of our daily human lives. Computation research, education, and business communities have been exploring the potential benefits of Cloud Computing and

the changes these imply. Experts have predicted that the move to the cloud will alter significantly the content of IT jobs, with cloud clients needing fewer hands-on skills and more skills that administer and manage information. Bill Gates was recently quoted: "How you gather, manage, and use information will determine whether you win or lose." Cloud Computing impacts will be broad and pervasive, applying to public and private institutions alike.

Focusing on democracy as a vital dimension in teaching music, the essays in this volume have particular relevance to teaching music as democratic practice in both public schooling and in teacher education. Although music educators have much to learn from others in the educational field, the actual teaching of music involves social and political dimensions unique to the arts. In addition, teaching music as democratic practice demands a pedagogical foundation not often

examined in the general teacher education community. Essays include the teaching of the arts as a critical response to democratic participation; exploring democracy in the music classroom with such issues as safe spaces, sexual orientation, music of the Holocaust, improvisation, race and technology; and music teaching/music teacher education as a form of social justice. Engaging with current scholarship, the book not only probes the philosophical nature of music and democracy,

but also presents ways of democratizing music curriculum and human interactions within the classroom. This volume offers the collective wisdom of international scholars, teachers, and teacher educators and will be essential reading for those who teach music as a vital force for change and social justice in both local and global contexts. It highlights contributions originally prepared for the XVII World Congress of Criminology and for the 2015 Cybercrime Conference in Oñati, Spain which have been selected, reviewed, and adapted for inclusion in this volume. The work features international contributors sharing the latest research and approaches from a variety of global regions. The

The second part explores illegal trafficking of people, drugs, and other illicit goods as a global phenomenon, aided by the ease of international travel, funds transfer, and communication. Finally, international approaches to crime detection prevention are presented. The work provides case studies and fieldwork that will be relevant across a variety of disciplines and a rich resource for future research. This work is relevant for researchers in criminology and criminal justice, as well as related fields such as international and comparative law, public policy, and

economic stimulant as well as opportunities to promote national identity, gain greater international recognition and exercise a form of 'soft power.' However, there has also been on-going controversy about the value, impact and legacy of global mega events in these cities and nations. This book provides a critical examination of the ambition for spectacle that has emerged across the East and Global South. The chapters explore the theoretical and conceptual issues associated with mega-events and new forms of globalization, from the critical political economy of mega-events in a changing world order to the contested social and

economic legacies of mega-events and the widespread opposition that increasingly accompanies these events. The book also explores questions of urban development and governance, the role of new communications technologies in global economic expansion, the high security State, and the growing global influence of international non-governmental organizations. This book offers a rich collection of original theoretical contributions and global case studies from leading international scholars from the social sciences and humanities. It offers a fresh and unique interdisciplinary perspective that

exploring the development of the mediated communication industry, mediated communication regulations, and societal interactions and effects. This reference work will look at issues such as free expression and government regulation of media; how people choose what media to watch, listen to, and read; and how the influence of those who control media organizations may be changing as new media empower previously unheard voices. The role of media in society will be explored from international, multidisciplinary perspectives via approximately 700 articles drawing on research from communication and media studies, sociology, anthropology, social psychology, politics, and business.
