For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Nursing: Solved Question Papers for General Nursing and Midwifery

The new edition of Nursing Care Planning Made Incredibly Easy is the resource every student needs to master the art of care planning, including concept mapping. Starting with a review of the nursing process, this comprehensive resource provides the foundations needed to write practical, effective care plans for patients. It takes a step-by-step approach to the care planning process and builds the critical thinking skills needed to individualize care in the clinical setting. Special tips and information sections included throughout the book help students incorporate evidence-based standards and rationales into their nursing interventions.

English for Nurses provides a perfect solution to the needs of nursing undergraduates. Based on the INC syllabus, it is an indispensable resource for B.Sc. Nursing students. Students of M.Sc. Nursing and those going for NCLEX, TOEFL and IELTS will also find it tremendously useful. The book has been written keeping in mind the requirements of the modern Indian nurses to converse well in English. As they serve in different national and international locations, English is their only window to the outside world. This book provides comprehensive study material and practice exercises on English language the way it is used in day-to-day operations in the hospital environment. Salient Features • Comprehensive, exhaustive and well-structured coverage • Lucid presentation with easy language for ease of comprehension • Ample number of examples, tables and other learning aids • All the essential elements of communication in modern-day nursing practice like nursing reports, records, etc. discussed, analysed and exemplified • Examples from real-life health care communications provided • Exhaustive end-of-chapter exercises • Solutions for all objective type exercises given What's New in the Second Edition • More examples have been added in the chapters • Exercises have been increased in several chapters • Several chapters like Narration and Voice have been revised for better clarity of the concept • Chapters like Essay Writing and Comprehension have been revised to include more health care scenarios
