Paediatrics at a Glance provides an introduction to paediatrics and the problems encountered in child health as they present in primary, community and secondary care, from birth through to adolescence. Thoroughly updated to reflect changes in understanding of childhood illness over the last 5 years, the 4th edition of this best-selling textbook diagrammatically summarises the main differential diagnoses for each presenting symptom, while accompanying text covers important disorders and conditions as well as management information. Paediatrics at a Glance: • Is an accessible, user-friendly guide to the entire paediatric curriculum • Features expanded coverage of psychological issues and ethics in child health • Includes more on advances in genetics, screening and therapy of childhood illness • Contains new videos of procedures and concepts on the companion website • Includes a brand new chapter on Palliative Care - an emerging area in the specialty • Features full colour artwork throughout • Includes a companion website at [www.ataglanceseries.com/paediatrics](http://www.ataglanceseries.com/paediatrics) featuring interactive self-assessment case studies, MCQs, videos of the procedures and concepts covered in the book, and links to online resources Paediatrics at a Glance is the ideal companion for anyone about to start a paediatric attachment or module and will appeal to medical students, junior doctors and GP trainees as well as nursing students and other health professionals.

Offers a range of sample comparative journal extracts enabling Foundation Year doctors and MRCPGP and MRCPsych candidates to practise their critical appraisal skills. This title includes extracts that cover the whole spectrum of critical appraisal, together with exercises for the reader to work through independently to improve their technique.

This title is directed primarily towards health care professionals outside of the United States. It provides a handbook for health professionals on the process of Guidelines preparation and implementation - from start to finish. It includes many real life examples of each step in the process as illustrated from existing Guidelines. Information is provided on how to access the extensive literature that is available throughout the world by inclusion of a comprehensive list of important sites - an extremely valuable and time-saving resource. An all-in-one handbook on the development and implementation of clinical guidelines Step-by-step approach Includes lots of examples and references to websites and other useful information Covers the following key topics: An explanation behind the different methodology used with regard to guidelines. How to get started, including assembling a guideline development group. Forming clinical questions and searching for evidence in the literature. Grading the evidence, including explanations of the different systems available. Forming recommendations. Consensus processes. Implementation and dissemination including the use of algorithms, integrated care pathways and audit tools. Appraisal tools. Economic considerations in guideline development. Legal issues.

Gone are the days when you present to colleagues with hand-drawn overheads. Presenting Health with PowerPoint shows how you can work through PowerPoint to create effective presentations. In an easy-to-use step-by-step format it takes you through the components of the European Computer Driving Licence the basic IT qualification and guides you through the text by showing what actually appears on the computer using screenshots toolbar icons mouse and keyboard actions. The accompanying CD-ROM provides downloadable resources and useful website links. Presenting Health with PowerPoint is designed for doctors nurses and managers at all levels throughout primary and secondary care who need not have prior knowledge of Microsoft PowerPoint.

DVD.

Fully revised, this second edition presents trainees with the latest guidance on preparation for OSCE examinations. Comprised of fourteen chapters, the book covers all the key learning points and provides an understanding of the basic concepts behind the OSCE and advice on appropriate response. The new edition includes many new cases and covers numerous topics including genetics, neurology, drugs and vaccines, neonatology, cardiovascular system, endocrinology and much more. Enhanced by nearly 240 clinical photographs and illustrations, the book also includes multiple choice questions to help students prepare for MRCPCH and US Specialty Board examinations. Key points Fully revised, new edition providing guidance on preparation for OSCE examinations Includes multiple choice questions to help revision for MRCPCH and US Specialty Board exams Enhanced by nearly 240 clinical photographs and illustrations Previous edition (9789350251553) published in 2010

This book is a concise learning guide dedicated to the full scope of pediatric history-taking and clinical examination, for use in OSCEs as well as clinical life. It guides the reader simply and methodically through what to ask when taking a history, and how to perform a comprehensive physical examination. The book contains more than 30 "History Stations" covering the most common pediatric cases, as well as 10 "Examination Stations" covering examinations of the different body system. It provides students and resident doctors worldwide with the necessary core information for pediatric history-taking and clinical examination, all in a brief and interesting format. The book adopts a reader-friendly format through a lecture-note style and the use of Key Points, Clinical Tips, Notes, Tables, and Boxes listing the most important features. It is also richly illustrated, demonstrating the correct way to perform clinical examinations. Written "by a resident, for residents and medical students," this book has been revised, foreworded, and peer-

reviewed by fourteen prominent authorities in the field of Pediatrics from various parts of the world (including the United States, United Kingdom, Australia, Italy, Canada, and India), and from different universities (Illinois, Pennsylvania, Washington, Oxford, Edinburgh, Keele, Melbourne, Toronto, Parma, and Florence Universities). These experts recommend this book for medical students, pediatric residents, and pediatric practitioners, as well as pediatricians.

This text provides practical advice on examining children and in implementing differential diagnosis. Taking a problem-based approach, and emphasizing common problems, HOSPITAL PAEDIATRICS guides the reader through the learning process easily and accessibly. Striking new format (2-colour throughout) makes the text even more accessible.

Essential Revision Notes in Medicine for Students

***Go Pass is a quick revision notes and is not considered by any means to be a textbook or a reference book for studying Pediatrics. The optimal benefit from this book will be achieved after a thorough reading in the Pediatric field, training and practicing clinical examination in the real life. Moreover Go pass is recommended to save effort and to have all topics reviewed in short time just before setting your exam. This book is designed as a study note which covers all the aspects of the MRCPCH clinical examination and other Pediatric clinical exams. It is also useful for medical students, general practitioners and young pediatricians who are planning to set any pediatric clinical examination. Go Pass is arranged in 6 main parts in a total of 250 full colored pages: 1-Clinical short cases 2-Development assessment 3-Communication skills 4-History taking 5-Review notes 6-ECG notes Wish you all the best of luck... Reflecting the latest exam formats, this book provides essential revision for those taking the Paediatric Membership exams - MRCPCH Papers 1a and 1b, and DCH diploma. Features over 500 completely up-to-date questions. Includes subject-based chapters for focussed revision. Includes all question formats likely to be encountered in the exam - BOF, MCQs and EMQs. Contains expanded answers to every question, helping students build understanding and confidence for success. Written by experienced, practising Paediatric Specialist Registrars, and edited by renowned author R Mark Beattie. Demonstrates how to prepare for their surgical clinical examination, And how to examine and take a history from a patient. This title has cases to work through that they***

*encounter on the wards and in the exam. It includes lists of frequently asked questions with clear answers.*

*With a heavily revised format in consideration of the recent DCH clinical examination changes, this new edition of the comprehensive revision guide provides the candidate with a definitive, one-stop revision resource. Familiarise yourself with the revised format of the examination, including revised timings Learn your revision needs through plentiful scenarios and worked examples Study using the wealth of detailed revision guidance, exam tips, diagrams, and practice cases Written by an experienced author team with extensive knowledge of the exam through its role teaching DCH courses, this title is currently the only revision guide that is focused on the clinical part of the DCH examination. Get Through DCH Clinical is essential reading and revision material for postgraduate candidates preparing for the clinical part of the DCH examination.*

The 100 Cases series provides a novel learning and revision tool that works by guiding the reader through each clinical case in a highly structured manner. Each scenario provides details of the patient's medical history and the key findings of a clinical examination, together with initial investigation results data for evaluation. Key questions then prompt the reader to evaluate the patient, and reach a decision regarding their condition and the possible treatment plan, while the answer pages reveal the processes a clinician goes through in such situations. The volumes are designed with the student in mind, and include features to aid self-directed learning, clinical reasoning and problem-solving. 100 Cases in Paediatrics covers the following subject areas: Respiratory, Cardiology, Endocrinology and diabetes, Gastroenterology, Nephrology, Infections, Dermatology, Haematology, Oncology, Bones and joints, Neurology, Child and Adolescent Psychiatry, Neonatology, Miscellaneous

The principal aim of this book is to provide a rigorous and challenging set of practice questions for candidates to revise and prepare for the DCH/MRCPCH Foundation of Practice exam, for the Royal College of Pediatricians, UK, and will prove a useful tool for preparation for the Diploma of Child Health. It is divided into five practice papers containing sixty stems with five multiple-choice true/false questions each. Detailed explanations of the answers have been provided to aid understanding and knowledge. This will be an invaluable asset to candidates aiming to reach the standard required for core specialist training, and for general practitioners with a special interest in paediatrics. It will also be useful for GP's, doctors and nurses wishing to maintain their basic knowledge in paediatrics, as part of their continuing professional development.

Communication Scenarios for the MRCPCH and DCH Clinical Exams

*An exam revision book consisting of 100 paediatric imaging pictures tests, including questions and explanatory answers and hints as to common errors made on exams; it will be aimed at MRCPCH (Part 2) candidates and DCH candidates; it might also be of interest to undergraduates to help them prepare for picture sections of their final exams. Features: 100 paediatric imaging questions – and explanatory answers; covers a wide spectrum of cases; includes a broad range of types of imaging – from x-rays and CT scans, to cystograms and MRI; unique in that all cases relate to children; and unique in the emphasis on imaging – scans and x-rays are notoriously difficult to interpret and a source of anxiety for exam candidates.*

*This guide is designed for doctors studying towards the Royal College of Paediatrics and Child Health's (RCPCH) Diploma in Child Health and includes a range of practice scenarios and practical tips for success.*

*Go Pass MRCPCH Clinical is the number ONE fully illustrated review notes for MRCPCH clinical exams, DCH and other Pediatric clinical examinations. In this second edition of the book, I added a whole chapter where you can find everything about Growth charts, I added examples for clinical short cases, and the most common history taking scenarios plus important points to consider. It is not considered by any means to be a textbook or a reference book for studying Pediatrics. However, it provides vital information in a simple, concise, and comprehensive format that suits all Pediatric clinical examinations. The optimal benefit from this book will be achieved after a thorough reading in the Pediatric field, training and practicing clinical examination in the real life. Moreover, Go pass is recommended to save effort and to have all topics reviewed in short time just before setting your exam. This book is designed as a study note which covers all the aspects of the MRCPCH clinical examination and other Pediatric clinical exams. *1500 Questions for the Dch/ Mrcpch Foundation of Practice Exam*

What are the indications for necrosectomy? How you perform an EUA for acute perianal sepsis? What do you understand by the term Early Goal-Directed Therapy (EGDT)? Remember: this is a consultant's exam, and giving a range of options is not good enough. You must tell the examiner what you as a consultant are going to do. The FRCS is a uniquely challenging prospect; highly detailed, wide-ranging and encompassing both theory and practice. Preparation for this exam can be very difficult, and resources tailored to it are scarce. As the consolidated notes of a recent successful candidate, this book is an essential resource when preparing for the viva. The wide variety of questions require you to define, diagnose or choose between treatment options, while MCQs and SBAs help you to objectively evaluate your progress - a unique supplement to your study plan. Answers provided are comprised of an invaluable combination of detailed written answers and lists that will remind you of key points and help you structure your preparation.

The MRCPCH clinical examination assesses whether candidates have reached the standard in clinical skills expected of a newly appointed specialist registrar, while the DCH recognises the competence of GPs and other health professionals in caring for children. Success in communication skills is vital to achieve overall success in these examinations. This revised and expanded Second Edition includes over a dozen new scenarios for both examinations, a new chapter on the general approach to effective communication, an expanded clinical exam mark sheet, anchor statements and exam circuit diagrams. Although written to aid candidates for the clinical MRCPCH and DCH examinations, this book will also be useful to paediatric trainees in their day-to-day clinical encounters.

Written by the same author team as the successful and well-regarded Concise Paediatrics for postgraduates, *Easy Paediatrics* is a textbook specifically written for medical students. *Easy Paediatrics* is structured in a systems-based fashion, with additional chapters on subjects such as history and examination, development, genetics, emergencies and surgery. The material is presented logically with presentations, clinical findings, investigations and management options, and useful boxes covering differential diagnoses, causes and complications are also included to complete the picture. Clinical photographs and illustrative diagrams are provided throughout to help the student visualise what they are reading about, and the book is enhanced by a companion website, which contains OSCE-style clinical

scenarios and MCQs for all the body systems, so the reader can test what they have learned. Presented in an easy-to-remember style, Easy Paediatrics gives the medical student everything they need to succeed in their paediatrics modules, without bombarding them with excess knowledge that will not be covered in their exams.

Go Pass MRCPCH Clinical is the number ONE fully illustrated review notes for MRCPCH clinical exams, DCH and other Pediatric clinical examinations. Communication Scenarios for the Mrcpch and Dch Clinical Exams

This book is "innovative and original in assisting the reader to apply the principles of science to paediatric practice". Professor Neena Modi, President, Royal College of Paediatrics and Child Health. The Science of Paediatrics, MRCPCH Mastercourse, provides essential background preparation for the MRCPCH Theory and Science examination. It contains an up-to-date review of the application of science to everyday paediatric clinical practice, whether it is interpreting clinical signs or investigations, prescribing drugs or identifying best management. Although this understanding is essential in order to make informed clinical decisions, it is difficult to obtain as it is not usually covered in clinical textbooks. Key features • MRCPCH exam-format questions embedded in each chapter to test understanding • Emphasis on embryology to explain many congenital abnormalities • An overview of the relevant anatomy and physiology • Focus on the application and interpretation of investigations • Examples of recent advances in science and clinical research that have benefited the children's care • All clinical specialties covered

by paediatric specialists. • Chapters covering evidence-based paediatrics, statistics, ethics and quality improvement.

Designed to help medical students through their exams. Built around the successful 'Essential Revision Notes for MRCP', this title focuses on what is essential learning for medical undergraduates and gives readers an 'all round' knowledge of medicine at this level.

This revision tool helps readers strengthen their existing knowledge of childhood disorders through Extended Matching Questions (EMQs) on topics frequently asked in Paediatrics examinations, ranging from neonatology to emergency medicine and public health. Detailed answers in each section build comprehension and knowledge. Many medical schools now examine undergraduates using EMQs, but they also feature highly in postgraduate examinations. This revision aid will therefore also be useful to those preparing for postgraduate examinations such as the Diploma of Child Health (DCH) and Membership of the Royal College of Paediatrics and Child Health (MRCPC), as well as foundation doctors on their first paediatric rotations and all those wishing to consolidate their knowledge and understanding of Paediatrics.

Updated focusing on the learning needs of the new format MRCPC Clinical examination. To maximise revision time, 3 parts represent the Clinical exam stations: Part 1 History Taking & Management Planning; Part 2 Communication Skills; Part 3 Clinical Stations. Written by paediatricians with experience of teaching and helping to run previous exams. The MRCPC Clinical Exam Made Simple

The new MRCPCH clinical examination aims to assess whether candidates have reached the standard in clinical skills expected of a newly appointed specialist registrar. Success in the communication skills stations is vital to achieve overall success. This book will help candidates with both the clinical MRCPCH and DCH examinations, and will also be useful to paediatric trainees in their day to day clinical encounters. 'It is a known fact that in the present set up of MRCPCH clinical examinations, extra points gained at clinical scenario stations can make a difference between passes and failures. The authors of this book have not yet forgotten the agonies of these examinations and participate actively in teaching others who are about to confront the same hurdle... 'An effective communication is both a science and an art, and depends on a number of factors including the environment and behaviour of the participants but eventually the success depends on the knowledge about the condition and overall skill of the person. This only comes from practice. The present book serves this purpose by providing a compendium of stimulating case scenarios, which should benefit particularly those undertaking clinical MRCPCH examination.'

## MRCP Paces Manual

A sound knowledge of basic sciences is vital for any doctor with an interest in ophthalmology, and is a significant part of all postgraduate examinations in the subject. Featuring 640 multiple choice questions, this is a comprehensive revision guide for candidates taking the basic sciences component of the FRCOphth and ICO examinations. It is highl

Postgraduates studying dermatology can face a lack of appropriate revision aids: reference books are often too exhaustive or out-of-date, while undergraduate and introductory texts lack the necessary detail and depth. This book is specifically designed for postgraduate examinations, and is the perfect accompaniment for the diploma in dermatology.

This is a clinical manual providing succinct, evidence-based guidelines to the diagnosis and management of approximately 100 common paediatric problems, as well as additional material on examination of children, milestone checks, immunisations, etc. Each clinical problem is covered in 1-3 pages of text, and the treatment recommendations are supported by references to the best available guidelines, websites and other reference material. The book helps to bridge the gap between primary and secondary care, so that it is clear when and where to manage the ill child - when to refer for hospital care, and when to manage within the primary care setting. A succinct manual for the treatment of common paediatric problems Each problem will be discussed according to a set template Treatment recommendations will be backed up with evidence (references to the best available guidelines and sources) The book will help bridge the gap between primary and secondary care management of problems

2008 BMA Medical Book Competition Awards: First Prize Paediatrics Prepared in conjunction with the Royal College of Paediatrics and Child Health (RCPCH), MRCPCH MasterCourse has been constructed as a comprehensive package for trainees facing professional examinations in paediatrics and child health. Career paediatricians sitting the full MRCPCH examination will require the boxed set. This comprises volumes 1 and 2, a DVD containing video clips of clinical scenarios, and PIN access to a website with self-assessment and further learning materials. This provides all the learning materials required for successful completion of the MRCPCH parts 1 and 2 and MRCPCH Clinical. For candidates sitting the Diploma in Child Health (DCH) exams and doctors with a primary-care interest in child health, Volume 1 will be sufficient. A complete multi-media course for the new MRCPCH examination. The written component are produced as attractive, full-colour books written in a problem-orientated style, with full-colour line drawings and colour photographs. Books contain references to video and audio clips on accompanying DVD that comes with the books to help with preparation for the MRCPCH Clinical. The related website offers self-testing questions (in exam style) and answers, links to important paediatric websites (guidelines, etc.), selected content from relevant journals, such as Current Paediatrics, periodic clinical updates etc. An essential purchase for all paediatric trainees in the UK and in other countries where the MRCPCH examination is held, as well as for GPs taking the DCH examination. (Volume 1 only). Planned and written with the latest syllabus of the MRCPCH in mind.
