osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity

and service providers The critical role of standards for smart grid has already been realized by world-wide governments and industrial organizations. There are hundreds of standards for Smart Grid which have been developed in parallel by different organizations. It is therefore necessary to arrange those standards in such a way that it is easier for readers to easily understand and select a particular standard according to their requirements without going into the depth of each standard, which often spans from hundreds to thousands of pages. The book will allow people in the smart grid areas and in the related industries to easily understand the fundamental standards of smart grid, and quickly find the building-block standards they need from

vulnerable people find themselves and the ways in which others help create, sustain, and eradicate such social dynamics. Vladimir Shlapentokh and Eric Beasley demonstrate that people can gain power over each other and then abuse this power because of unequal resource conditions. The authors define resources as the means necessary for satisfaction or achievement of needs or goals such as wealth, physical strength, intellectual capacity and information, sexual attractiveness, and status. This volume is different from existing social science books on inequality and vulnerability, which address relations between people of different social positions, races, genders, ages, and places of residence confronting each other in political, economic, and

Final Report of the Truth and Reconciliation Commission of Canada, Volume One: Summary

*How do the moral panics that have plagued school education since it's nineteenth-century beginnings impact current school education policy? Research has shown young people to be particularly vulnerable to moral panics and, with the rise of social media, the impact of moral panics on school education is growing exponentially. Increasingly, they are reaching into the highest levels of national governments and, so powerful are their effects, some politicians choose to orchestrate them for their own political ends. For many educational administrators, the management of*

First developed by British and Canadian sociologists such as Stanley Cohen (1972), moral panic theory has evolved substantially since its early focus on adolescent deviant behaviour, and is now a part of common media talk. This book addresses the need for a single monograph on the topic, with reference to historical moral panics such as those associated with sexuality education, but also wider societal moral panics such as those associated with obesity. In *Jezebel Unhinged* Tamera Lomax traces the use of the jezebel trope in the black church and in black popular culture, showing how it is pivotal to reinforcing men's cultural and institutional power to discipline and define black girlhood and womanhood. Drawing on writing by medieval thinkers and travelers, Enlightenment theories of race, the commodification of women's bodies under slavery, and the work of Tyler Perry and Bishop T. D. Jakes, Lomax shows how black women are written into religious and cultural history as sites of sexual deviation. She identifies a contemporary black church culture where figures such as Jakes use the

jezebel stereotype to suggest a divine approval of the "lady" while condemning girls and women seen as "hos." The stereotype preserves gender hierarchy, black patriarchy, and heteronormativity in black communities, cultures, and institutions. In response, black women and girls resist, appropriate, and play with the stereotype's meanings. Healing the black church, Lomax contends, will require ceaseless refusal of the idea that sin resides in black women's bodies, thus disentangling black women and girls from the jezebel narrative's oppressive yoke.

consequences of its impact upon society. The global financial crash and economic downturn was the catalyst for change and, against a backdrop of advice from experts adverse to Keynesian economics, the ideology of austerity grew and became the dominant thinking to steer economies out of recession. This comprehensive volume draws upon both quantitative and qualitative research methodologies to provide a varied and contextually rich insight into sport, policy, and politics in an era of austerity. The authors cover a wide range of issues in a variety of organisational contexts and geographies, including sports

Kevin Rudd and Tony Abbott have resumed battle for leadership of the nation. Here, in one volume, are their definitive portraits by Australia's pre-eminent biographer and investigative journalist. *Power Trip* shows the making of Kevin Rudd, from the formative tragedy of his life the death of his father to his years as Wayne Goss's right-hand man, his relentless work in federal Opposition and finally his record as prime minister. Throughout Rudd's life, Marr finds recurring patterns: a tendency to chaos, a mania for control, a strange mix of heady ambition and retreat and what

has so far been an unbreakable bond with the public. In *Political Animal*, Marr examines the question that Australians are asking of Tony Abbott: what kind of man is he and how might he run the country? Part fighter and part charmer, Abbott is deeply religious and deeply political. What happens when his values clash with his absolute determination to win? That is the great puzzle of a career that began as a wild university politician in the 1970s and seeks culmination in the prime ministership. *Rudd v. Abbott* is an essential companion for voters as they consider who should take control of Australia's future. "David

### The Making of Tony Abbott

From a leading financial economist, a searching examination of the ethics of modern finance. In 2001, Goldman Sachs structured a complex financial contract so that its client, the government of Greece, would appear to have far less debt than it actually did. When news of this transaction came out years later, the inevitable question arose: Even though Goldman ' s actions were legal, were they ethically wrong? Is modern finance itself inherently unethical? In *Something for Nothing*, financial economist Maureen O ' Hara explains that one of the key innovations of modern finance is its reliance on arbitrage, the practice of taking advantage of a price difference between two or more markets to generate profits and remove inefficiencies. When done correctly, arbitrage can

create value at little or no cost (in effect, getting “ something for nothing ” ); but it can also be an exploitative tool. In a lucid, insightful discussion of the ethics of arbitrage in modern finance, O ’ Hara reveals how the rules can often be stretched into still-legal yet highly unethical business practices.

Examining key cases in clear and persuasive prose, O ’ Hara illuminates various aspects of financial ethics, from the Goldman Greek transaction to Lehman Brothers ’ attempt to cover up its debt, JPMorgan Chase ’ s maneuvers in California ’ s energy markets, Bernie Madoff ’ s trading strategies in the 1980s, high-frequency trading practices, and toxic loans in France. Ultimately, O ’ Hara turns to philosophy and religion to argue for a new, humanistic approach to ethics in the financial industry. She makes a strong case for a way

forward: fewer rules and more standards to foster a morally responsible outlook. Fearlessly raising the questions at the moral heart of our financial system, *Something for Nothing* is a masterful treatise on the ethics of modern finance.

This volume of *Transport and Sustainability* focuses on how spatial and social mobilities are intertwined in the reproduction of spatial and social inequities in Latin American cities.

**violence and negation. Initiating and describing a theory and method of reading the metaphors and materiality of "the wake," "the ship," "the hold," and "the weather," Sharpe shows how the sign of the slave ship marks and haunts contemporary Black life in the diaspora and how the specter of the hold produces conditions of containment, regulation, and punishment, but also something in excess of them. In the weather, Sharpe situates anti-Blackness and white supremacy as the total climate that produces premature Black death as normative.
