Study & Master Physical Sciences Grade 11 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical Sciences. The comprehensive Learner's Book:

- explains key concepts and scientific terms in accessible language and provides learners with a glossary of scientific terminology to aid understanding.
- provides for frequent consolidation in the Summative assessments at the end of each module
- includes case studies that link science to real-life situations and present balanced views on sensitive issues
- includes 'Did you know?' features providing interesting additional information
- highlights examples, laws and formulae in boxes for easy reference.

First published in 1991, this book consists of 13 articles that were originally published in the journal *Anxiety Research*. They address the topic of anxiety and self-focused attention from a variety of perspectives, representing recent advances in social, clinical and personality psychology at the time. As a whole, the book poses a stimulating theoretical challenge to traditional anxiety research, which had been dominated by psychometric issues, clinical case studies and stable personality constructs. The contributors share the view that anxiety is an emotional state of distress dependent upon specific antecedent cognitive processes such as self-awareness, perceived role discrepancy or unfavourable expectancies.

Study & Master Physical Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical Sciences.

*This book discusses "tourism and hospitality" from different perspectives and disciplines. In addition, this book, considering the tourism and hotel management terminology, is expected to be a source book for the theoretical and practical scientific studies in the fields which is in close relationship such as gastronomy, recreation and marketing.*

*This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.*

*Index of Specifications and Standards*

*PISA Take the Test Sample Questions from OECD's PISA Assessments*

*The Marine Corps Gazette*

*Revue de L'ingénierie*

Monthly, with annual cumulations. Comprehensive, current index to periodical medical literature intended for use of practitioners, investigators, and other workers in community medicine who are concerned with the etiology, prevention, and control of disease. Citations are derived from MEDLARS tapes for Index medicus of corresponding date. Arrangement by 2 sections, i.e., Selected subject headings, and Diseases, organisms, vaccines. No author index.

"Recollections of a Pioneer" is an autobiographical account by J. Watt Gibson, which primarily focuses on the author's participation in the American Civil War. The book was written at the solicitation of many Gibson's friends and acquaintances who urged that his recollections of that period ought to be preserved. It covers the author's first journey to California in the late 1840s, gold mining, crossing the plains with cattle and his experiences during and after the Civil War, and ends with his return to Missouri and getting married in 1868.

Neuro-oncology is a rapidly growing field concerned with scientific developments and applications related to neuroscience, neuropsychology, cancer and oncology. Neuro-oncological disorders include cancers that directly affect the central nervous system (such as brain tumours and brain metastases, and non-CNS cancers with treatments that cause neurocognitive impairment. To date, the biological mechanisms and neuropsychological aspects of brain tumour and cancer have been the dominant focus in neuro-oncology literature. The psychosocial aspects of care, people's understanding of their diagnosis and symptoms, and how they cope with their illness has a major influence on their emotional well-being and quality of life. The development and evaluation of psychological and supportive care interventions for people with brain tumour is an area of emerging research and of high interest to health professionals working in the field. This Research Topic aims to enhance understanding of the psychological and social consequences of brain tumour and other cancers impacting neurocognitive function. It also aims to showcase new developments in assessment and psychosocial intervention approaches.

Examines the holocaust from a German perspective, providing and analyzing the facts and political decisions which led to the murder of millions of Jews and other ethnic groups during the Nazi regime
