The work "Feasibility Study and Future Projections of Suborbital Space Tourism at the Example of Virgin Galactic" deals with the topic space tourism, especially with the so-called suborbital space tourism a current trend of private businesses that offer commercial flights up to the edge of space. This edge of space, named "Karman Line" due to its founder Theodore von Karman, is defined by the FAI (Federation Aeronautique Internationale) to be at an altitude of approximately 100 km. The author conducts a detailed feasibility study about this phenomenon at the example of the Anglo-American business Virgin Galactic, and sets up future projections based on the results of this study. After a general introduction into the topic (history, motives for going to space, stages of space tourism etc.) the author addresses the focal points of the feasibility study. In detail, this includes an analysis of the Virgin Galactic approach and its most promising competitors (Space Adventures, Benson Space Company, Space Access, Incredible Adventures, Rocketplane Limited, Starchaser Industries, and Blue Origin), as well as an

analysis of the several spaceships and its manufacturers. Subsequently, the regulatory framework is illustrated at the example of the FAA (Federal Aviation Administration). In the end, results from market research projects are evaluated in order to explain the demand for suborbital flights. The study comes to the conclusion that the industry is still in an early pioneer phase, but nevertheless shows an enormous potential to grow.

*This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses*

**Policies, Timothy B. Krebs and Arnold Fleischmann introduce a framework that focuses on the role of institutions in establishing the political "rules of the game," the representativeness of city government, the influence of participation in local democracy, and how each of these features influences the adoption and implementation of public policies. Part 1 lays the groundwork for the rest of the book by exploring the many meanings of "urban," analyzing what local governments do, and providing a history of American urban development. Part 2 examines the organizations and procedures that are central to urban politics and policy making: intergovernmental relations, local legislatures, and the local executive branch. Part 3 looks at elections and voting, local campaigns, and non-voting forms of participation. The four chapters in Part 4 focus on the policy process and the delivery of local services, local government finances, "Building the City" (economic development, land use, and housing), and policies affecting the quality of life (public safety, the environment, "morality" issues, and urban amenities). Krebs and Fleischmann bolster students' learning and skills with guiding questions at the start of each chapter, which ends with key terms, a**

Niche Tourism examines one of the fastest growing areas within the tourism sector. This book provides an integrated picture of speciality/niche tourism as a whole looking at both the 'macro' and 'micro' niche area. It has a comprehensive theoretical framework, and discusses initiatives, policies and strategies adopted internationally. With an emphasis on linking theory to practice, it is underpinned by up-to-date international case studies from around the world. Divided into 3 parts, it covers a variety of aspects under the headings of special interest tourism, tradition and culture base tourism and activity-based tourism.**

*For many people, holidays are an increasingly central feature of contemporary western society. The tourism industry has expanded rapidly since 1950, but this book poses the significant question of consequent environmental impacts: are environments being benefited or damaged, by the tourist who visit them? A well-balanced introductory text, this topical book on the relationships between tourism, society and the environment, examines 'tourism' and 'environment' in detail, and gives a historical overview of the growth of the tourism industry. It discusses how the tourism industry markets physical and cultural environments to be consumed by the tourist, and the consequences of the tourism they then attract. It explores: \* how the economics of tourism can be adopted in a positive way to aid conservation \* whether the concept of sustainability can be applied to*

*tourism \* provides a critique of the 'new' forms of tourism, that have developed in recent years. An extensive range of international case studies from both the developed and developing world are used to illustrate the theoretical ideas presented, and to aid the student, it includes end of chapter summaries, further reading guides and boxed vignettes focusing on contemporary environmental issues and debates. This book profiles preliminary findings on the impact of COVID-19 on the travel, tourism and hospitality sector. Starting with a narrative relating COVID-19 to the global development agendas, the book proceeds with a focus on global tourism value chains and linkages between COVID-19 and the Sustainable Development Goals (SDGs). Other perspectives addressed in separate chapters include impacts of COVID-19 on various industries within the global tourism value chain including aviation, airports, cruise ships, car rentals as well as ride and share car services, hotels, restaurants, sporting, pilgrimage and religious tourism, gaming and entertainment, and the stock market. The book also includes chapters on corporate, philanthropic and public donations, as well as tourism economic stimulus packages. It then concludes with a chapter focusing on building back a better tourism*

This 2013 Article IV Consultation highlights that The Zambian economy has performed well in recent years, with strong growth and modest inflation, and has high growth potential. The government has resolved to step up development by scaling up investment in infrastructure. The current fiscal stance is unsustainable. To address risks of large arrears accumulations and additional central bank financing in 2013, it will be important for the authorities to adhere to their plans to reduce low-priority investment spending, and contain goods and services spending. IMF Staff recommends firmly addressing the fiscal slippages in 2014 and continuing to reduce fiscal deficits over the medium term.
