The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

The integration of technology into educational environments has become more prominent over the years. The combination of technology and face-to-face interaction with instructors allows for a thorough, more valuable educational experience. Intelligent Web-Based English Instruction in Middle Schools addresses the concerns associated with the use of computer-based systems in teaching English as a foreign language, proving the effectiveness and efficiency of technological integration in modern classrooms. Highlighting cases based on current practices in four diverse schools, this book is a vital reference source for practitioners and researchers interested in the educational benefits of educational technologies in language acquisition.

**Postcolonial Polysystems: The Production and Reception of Translated Children's Literature in South Africa is an original and provocative contribution to the field of children's literature research and translation studies. It draws on a variety of methodologies to provide a perspective, both product- and process-oriented, on the ways in which translation contributes to the production of children's literature in South Africa, with a special interest in language and power, as well as post- and neocolonial hybridity. The book explores the forces that affect the use of translation in producing children's literature in various languages in South Africa, and shows how some of these forces precipitate in the selection, production and reception of translated children's books in Afrikaans and English. It breaks new ground in its interrogation of aspects of translation theory within the multilingual and postcolonial context of South Africa, as well as in its innovative experimental investigation of the reception of domesticating and foreignising strategies in translated picture books.**

Language Education**

The issues raised by the role of language in education are some of the most important and contentious faced by education systems across the globe. Language is embedded in the concepts of nationhood and identity, and is therefore directly linked to the very social and political fabric of a country. In a climate of increasing globalisation, development and mobility of populations, nations around the world are concerned with the tension between cultivating a sense of cultural and linguistic cohesion and making use of the linguistic diversity that exists in every country and region. This book

examines the implications and impacts, the dilemmas and potential for language education in relation to education systems and wider society. Split into three key parts, it considers: \*current issues in language education, including the role of language in maintaining power and inequalities, in encouraging participation and inclusion and in challenging the status quo; \*different approaches to language education around the world; \*the potential for language to provide opportunities for the disadvantaged, illustrated by case studies of three cities. This recent volume of the internationally respected World Yearbook of Education continues the tradition of offering a wide range of international perspectives from leading commentators on a universal concern. The material amassed here will be essential reading for teacher educators, education researchers and school leaders across the world.

Come with us now to the first day of class to teach English in China. Both students and teacher's hearts pound with anticipation as students file into the room, chatting and pretending not to notice the foreign teacher standing behind his desk. But they can't help glancing at him anyway for a first look. Laughter mingles with the sound of books and chairs clanking together. A buzzer sounds in the hall, and Bill Burkett, affectionately known in China by his students as "Mr. Bill," begins. A Manual for Teaching English in China takes us from the first day's buzzer through the first weeks, months, and semesters of teaching English in China, sharing numerous stories, laughs, interesting facts, and many effective ways of teaching ESL. A Manual for Teaching English in China is packed with Bill Burkett's practical ideas, methods, and teaching techniques that can actually be used to teach ESL anywhere. Bill Burkett recently returned from a seven year stint of teaching English in the universities and training schools of Henan, China. An internationally renowned public speaker, Burkett has lived in 46 nations in the last 43 years. He developed a strong interest in linguistics which was fueled by his close association with interpreters. In Chinese classrooms where he taught English, he conducted active research, experimenting and taking student polls. He concentrated on eliminating speech impediments and strong accents. His education, experiences, and research shaped his philosophy of teaching English as a Second Language and formed the basis of his first ESL book, A Manual for Teaching English in China. Following the manual is Secrets to Better English which reveals a proven method of teaching ESL without accent. Although Burkett's doctorate is in philosophy, his love is making a difference in his students' lives by teaching diction and the skills of speech.

This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed

practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.
