Preparation for the Next-Generation MCAS Tests for 2016–2017! This extensive skill-building quiz book contains over 200 pages of quizzes targeting over 50 mathematics skills! Each quiz focuses on one specific skill, with questions progressing from simple to more complex. Students will develop a thorough understanding of each skill, while also gaining experience with all the types of tasks found on the new Next-Gen MCAS tests. Divided into Convenient Topics – Covers every skill listed in the Massachusetts Curriculum Frameworks – Includes sections for operations and algebraic thinking, number and operations, fractions, measurement, data, and geometry – Each section contains a focused quiz for each individual skill – Each quiz includes a range of question types and increasing rigor to develop a thorough understanding of the skill – Targeted format allows test preparation to be easily integrated into student learning Prepares Students for the Next-Generation MCAS Assessments – Covers all the skills assessed on the Next-Gen MCAS mathematics tests – Provides practice completing all the question types found on the test – Includes multiple choice, multiple select, short answer, technology enhanced, and open response question types – Prepares students for questions that involve explain their thinking, justifying answers, or describing mathematical concepts – More rigorous questions prepare students for the higher difficulty of the new assessments – Guided tasks teach students what is expected in answers Key Benefits – Develops a thorough understanding by focusing on one skill at a time – Reduces test anxiety by allowing ongoing test practice – Individual quizzes allow gaps in knowledge to be targeted – Ensures students are comfortable with a range of question formats – Prepares students for all the question types found on the MCAS tests – Provides revision and test practice as the student learns

"Where are you from?" An easy question for most to answer, but a very tough one for Third Culture Kids (TCKs). These children grow up outside their parents' home cultures, neither belonging entirely to their home culture nor to their host culture. They face unique challenges in establishing their identity and a sense of belonging, especially when returning to their home country. An increasing number of Singaporean families are living overseas for various reasons, and their children are growing up as TCKs. On returning to Singapore, these Singaporean TCKs will have to cope with a variety of re-entry stresses when adjusting to Singapore culture, making new friends, and continuing their education in the Singapore education system. Many existing books about the TCK experience are written from the perspective of other cultures, chiefly the US. This book addresses some factors unique to the Singapore environment and provides Singaporean parents with suggestions to smooth their children's re-entry to Singapore. With experience drawn from the real-life experiences of the authors' children and others they know personally, this book will be helpful to families of TCKs through the whole process: preparing to leave Singapore, while overseas, and, especially, when they return.

Learning Mathematics - Class 8 has been written by Prof. M.L. Aggarwal in accordance with the latest syllabus of the NCERT and Guidelines issued by the CBSE on Comprehensive and Continuous Evaluation (CCE). The subject matter has been explained in a simple language and includes many examples from real life situations. Questions in the form of Fill in the Blanks, True/False statements and Multiple Choice Questions have been given under the heading 'Mental Maths'. Some Value Based Questions have also been included to impart values among students. In addition to normal questions, some Higher Order Thinking Skills (HOTS) questions have been given to enhance the analytical thinking of the students. Each chapter is followed by a Summary which recapitulates the new terms, concepts and results.

This new edition of the best-selling STP Mathematics series provides all the support you need to deliver the 2014 KS3 Programme of Study. These new student books retain the authoritative and rigorous approach of the previous editions, whilst developing students' problem-solving skills, helping to prepare them for the highest achievement at KS4. These student books are accompanied by online Kerboodle resources which include additional assessment activities, online digital versions of the student books and comprehensive teacher support.

Spectrum(R) Word Problems for grade 8 includes practice for essential math skills, such as real world applications, multi-step word problems, variables, ratio and proportion, perimeter, area and volume, percents, statistics and more. Spectrum(R) Word Problems supplement to classroom work and proficiency test preparation. The series provides examples of how the math skills students learn in school apply to everyday life with challenging, multi-step word problems. It features practice with word problems that are an essential part of the Common Core State Standards. Word problem practice is provided for essential math skills, such as fractions, decimals, percents, metric and customary measurement, graphs and probability, and preparing for algebra and more.

In this book, world-renowned theatre artist Pamela Howard OBE shows how her life has always been part of the art of making theatre. Part memoir, part a personal account of artistic creation, it is a work of art in its own right. Its 12 chapters, accompanied by original drawings, offer insights

into Pamela Howard's creative world and the journey through life of a celebrated artist, ranging from her early life and influences, to her time at art college and the inspiration she gained from travelling the world. Following the trajectory of her life, the 12 'dreams' are poised between

memory and history and give an account of an artist's growth, resilience, working patterns, and life-changing encounters with remarkable personalities and artists, as well as the practical side of working in the theatre, in visual arts and in education. Her art tells unexpected stories of

little-noticed people and émigré communities, and makes performance for diverse audiences from the unique experience of one's own life. Pamela Howard's dreams have led her to work across the globe and teach and inspire several generations of theatre makers, scenographers, designers and visual

artists. The Art of Making Theatre passes on that inspiration afresh and demonstrates that being an artist is not a one-off project but a way of life.
