The Paper Mill and Wood Pulp News

Published annually, Brookings Papers on Education Policy (BPEP) analyzes policies intended to improve student performance. In each volume, some of the best-informed analysts in various disciplines review the current situation in education for reform. In this fourth annual issue of the series, prominent educators and other social scientists discuss standards in education. Contents include: "Incentives and Equity under Standards-Based Reform" Julian R. Betts and Robert M. Co Backs Education Standards" Milton Goldberg and Susan Traiman "State Academic Standards" Chester Finn Jr. and Marci Kanstoroom "Searching for Indirect Evidence for the Effects of Statewide Reforms" David Grissmer and Ann Flanagan "T over the National Assessment Governing Board Standards" Mark Reckase "The Role of End-of-Course Exams and Minimum Competency Exams in Standards-Based Reforms" John H. Bishop, Ferran Mane, Michael Bishop, and Joan Moriarty "A Analysis of Black-White GPA Disparities in Shaker Heights, Ohio" Ronald F. Ferguson

Otolaryngological conditions affect people of all ages from newborns to older members of society, and have serious consequences for daily functions such as breathing, taste, and communication. There is a constant desire to understand the best evidence for current practice in a constantly evolving field such as medicine, and key publications underpin this contemporary knowledge. Landmark Papers in Otolaryngology presents a distilled summary of 99 of the classic, ground-breaking, and significant publications in the field of otolaryngology that are of essential relevance to the speciality today. Each paper is described, critiqued, and brought into the context of modern-day practice by a carefully selected team of international authorities from each subspecialist area to provide the reader with a clear understanding of the key publications in otolaryngology. Whether your aim is to understand the origins of otolaryngology, to review advances in key areas, or to gain insight from experts, this book offers a wealth of knowledge for everyone in the field, from the new trainee to the senior clinician. Landmark Papers in Otolaryngology is an invaluable and easily accessible reference text for all practitioners in the field, as well as those in overlapping specialities such as maxillofacial surgery, neurology, and plastic surgery.

Solid Waste Recycling and Processing, Second Edition, provides best-practice guidance to solid waste managers and recycling coordinators. The book covers all aspects of solid waste processing, volume reduction, and recycling, encompassing typical recyclable materials (paper, plastics, cans, and organics), construction and demolition debris, electronics, and more. It includes techniques, technologies, and programs to help maximize customer participation rates and revenues, as well as to minimize operating costs. The book is packed with lessons learned by the author during the implementation of the most successful programs worldwide, and includes numerous case studies showing how different systems work in different settings. This book also takes on industry debates such as the merits of curbside-sort versus single-stream recycling and the use of advanced technology in materials recovery facilities. It provides key facts and figures, and brief summaries of legislation in the United States, Europe, and Asia. An extensive glossary demystifies the terminology and acronyms used in different sectors and geographies. The author also explains emerging concepts in recycling such as zero waste, sustainability, LEED certification, and pay-as-you-throw, and places waste management and recycling in wider economic, environmental (sustainability), political, and societal contexts. Covers single- and mixed-waste streams Evaluates the technologies and tradeoffs of recycling of materials vs. integrated solutions, including combustion and other transformational options Covers recycling as part of the bigger picture of solid waste management, processing and disposal

Parliamentary Papers

Orthopedic experts in their field have carefully chosen what they consider to be the key papers in their respective domains. Every paper is carefully described and evaluated by its strengths, weaknesses and its contribution to the field. Papers have been chosen by number of citations, academic importance, articles that have changed our whole way of thinking or that have simply stood the test of time.
