The Making of English

This book is designed for a mathematics for elementary school teachers course where instructors choose to focus on and/or take an activities approach to learning. It provides inductive activities for prospective elementary school teachers and incorporates the use of physical models, manipulatives, and visual images to develop concepts and encourage higher-level thinking. This text contains an activity set that corresponds to each

This paper studies growth determinants in 12 Latin American countries during the period 1950-85. In a simple growth accounting framework, the share of labor in income is found to be lower in the sample group than in developed countries, while factor productivity growth accounts for a larger proportion of growth in the fastest growing countries in the sample. Using panel data, macroeconomic stability is found to play, in addition to investment (physical and human), a crucial role in growth. To a lesser extent, growth is negatively correlated with government consumption and political instability. The terms of trade appear to have no significant effect on growth.

Art-Write

An Activity Approach

Linguistics and the Teacher is a collection of essays by linguists on different aspects of the relationship between linguistics and education. All the contributors are united in their belief that linguistics should be a central element in the education of teachers, and argue for principled and systematic analysis in the study of the role of language in learning. The essays range from theoretical accounts of the nature of language study in teacher education to practical examples of how linguistics can help the teacher in such diverse contexts as the assessment of difficulty in textbooks, the teaching of literature, and analysing children ' s writing. The book offers models for analysis, specific syllabus and course proposals, and, in a key essay, discussion of those areas relevant to language and learning upon which most
