Inspiring, practical guide on integrating SEL into the curriculum, fostering positive behavior and leadership, and creating a culture of excellence in the classroom and school. Research shows that a socially and emotionally supportive setting is the solution to increasing student achievement. The SEL Solution: helps students and adults master critical social and emotional skills encourages student leadership provides effective and compassionate behavior management strategies increases student success Based on William Glasser's Choice Theory, the book shows educators how to integrate lessons on empathy, cooperation, self-regulation, leadership, and a range of other SEL (social and emotional learning) topics into the school day and into social studies and language arts curriculum. This book provides dozens of strategies that are classroom tested and proven successful. Both fun and easy-to-use, these lessons and activities help create and sustain a positive, thriving school culture. For use by teachers, counselors, coaches, principals, and other educators, the strategies in this book provide a plan for engaging the whole school community in identifying, celebrating, and sustaining its positive values. Digital content includes customizable forms from the book and a PDF presentation for professional development.

This second edition of The Human-Computer Interaction Handbook provides an updated, comprehensive overview of the most important research in the field, including insights that are directly applicable throughout the process of developing effective interactive information technologies. It features cutting-edge advances to the scientific Few faculty members in academic medical centers are formally prepared for their roles as teachers. This work is an introductory text designed to provide medical teachers with the core concepts of effective teaching practice and information about innovations for curriculum design, delivery and assessment. It offers brief, focused chapters with content that is assimilated easily by the reader. The topics are relevant to basic science and clinical teachers and the work does not presume readers possess prerequisite knowledge of education theory or instructional design. The authors emphasize the application of concepts to teaching practice. Topics include: Facilitating Student Learning; Teaching Large Groups; Teaching in Small Groups; Flipping the Classroom; Problem-Based Learning; Team-Based Learning; Teaching Clinical Skills; Teaching with Simulation; Teaching with Practicals and Labs; Teaching with Technological Tools; Teaching to Develop Scientific Engagement in Medical Students; Designing a Course; Establishing and Teaching Elective Courses; Designing Global

Health Experiences; Assessing Student Performance; Documenting the Trajectory of Your Teaching and Teaching as Scholarship. This is a complete revision of the first edition of this work with new chapters and up to date information. Similar to the first edition, chapters were written by leaders in medical education and research who draw upon extensive professional experience and the literature on best practices in education. Although designed for teachers, the work reflects a learner-centered perspective and emphasizes outcomes for student learning. The book is accessible and visually interesting and the work contains information that is current, but not time-sensitive. Each chapter concludes with references, many include recommendations for additional reading, and the work includes an appendix with resources for medical education.

The fifth edition of this critically acclaimed approach to curriculum planning continues to receive accolades for its balanced presentation, pertinent case studies, and advice from practicing educators. It skillfully interweaves the themes of multicultural education, constructivism, and education reform. The author documents the latest trends, such as e-learning, blended learning and flipped learning, the controversial Common Core State Standards, and the impact of technology in our schools, including the BYOD (bring your own device) movement, digital citizenship, and technological literacy. This well-researched text spotlights ways to involve parents, students, and teachers in the curriculum-planning process and engages the reader in critical thinking and analysis about curriculum planning and education reform.

This book constitutes the proceedings of the 15th International Conference on Web Information Systems Engineering, WISE 2014, held in Thessaloniki, Greece, in October 2014. The 52 full papers, 16 short and 14 poster papers, presented in the two-volume proceedings LNCS 8786 and 8787 were carefully reviewed and selected from 196 submissions. They are organized in topical sections named: Web mining, modeling and classification; Web querying and searching; Web recommendation and personalization; semantic Web; social online networks; software architectures and platforms; Web technologies and frameworks; Web innovation and applications; and challenge. First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

HIV/AIDS has been named the Sub Saharan disease. In countries that have achieved significant declines in HIV prevalence, young people have registered the biggest behavioural changes. It means they hold the keys not only to our understanding of the epidemic, but more importantly, to the efforts required to stem the tide of infections.

However, the majority of young people are ignorant of how to prevent transmission, have low compliance to condom use, which is in some cases accentuated by misconceptions about HIV/AIDS transmission and have insufficient knowledge regarding transmission and avoidance behaviours. As such, consensus on feasible preventive interventions target young people, particularly those in schools. It is on this premise that the book unlocks the key pillars in effective HIV/AIDS education policies and practices. The study has drawn upon the experiences of selected Urban Schools in Malawi to explore the needs of young people in classroom, the extent to which the classroom practices respond to the needs, and the factors influencing these using questionnaires, interviews, lesson observations, and document analysis. Malawi typically represents most Sub Saharan African countries in terms of challenges faced by education systems. Given the similar cultural settings of the people of Sub Saharan Africa, the findings and recommendations of the study generalises to the education systems of Sub Saharan Africa to a greater extent. The book shows the need for open discussion climates on HIV/AIDS issues despite a conservative cultural and religious adult world that is not open. It has also identified a need for explicit and accurate knowledge on HIV/AIDS issues, opportunities to acquire behavioural skills for HIV prevention, and involvement of external speakers in classroom HIV/AIDS education. Current classroom practice does not address the pupils' needs adequately. Factors influencing this can be linked to lack of policies responsive to culture and religion, ineffective and inadequate teaching policy guidelines, and lack of a policy prioritising HIV/AIDS education. The findings suggest that in future, effective HIV/AIDS Education needs to be informed by the pupils' needs. To address these needs, support from the wider society and related policies, coupled with appropriate management and classroom practice will be required. The book is therefore an indispensable tool for education systems in Sub Saharan Africa. It provides an effective model for [...]

Your culture and engagement initiatives are big change. Change requires coaching, and coaching requires conversation. The questions (and answers) in this handbook represent topics of conversation that you will need to address during your change journey. Most problems in the change journey remain hidden until they rise up to block process. These questions bring the problems to light and enable you to proactively develop solutions that fit your organization. Culture development and employee engagement can be difficult changes. But they doesn't need to be. We believe in keeping it simple. This group activity handbook examines questions using a simple brainstorming format. The solutions will tune your culture and refine your engagement strategy.

Designed for mid-level developmental readers, Academic Literacy combines a reading strategies handbook with discipline-specific readings. Part I, Handbook for Reading and Study Strategies, emphasizes active reading and the basics of comprehension: topics, main ideas, supporting details, patterns of organization, understanding vocabulary, and notetaking. The seven chapters in Part II, Discipline-Specific Readings, introduce students to readings typically encountered in seven different college disciplines.

The revised and updated tenth anniversary edition of the classic, beloved business fable that has changed millions of lives in organizations around the world. Our Iceberg Is Melting is a simple story about doing well under the stress and uncertainty of rapid change. Based on the award-winning work of Harvard Business School's John Kotter, it can help you and your colleagues thrive during tough times. On an iceberg near the coast of Antarctica, group of beautiful emperor penguins live as they have for many years. Then one curious bird discovers a potentially devastating problem threatening their home—and almost no one listens to him. The characters in the story—Fred, Alice, Louis, Buddy, the Professor, and NoNo—are like people you probably recognize in your own organization, including yourself. Their tale is one of resistance to change and heroic action, seemingly intractable obstacles and clever tactics for dealing with those obstacles. The penguins offer an inspiring model as we all struggle to adapt to new circumstances. Our Iceberg Is Melting is based on John Kotter's pioneering research into the eight steps that can produce needed change in any sort of group. After finishing the story, you'll have a powerful framework for influencing your own team, no matter how big or small. This tenth anniversary edition preserves the text of the timeless story, together with new illustrations, a revised afterword, and a Q&A with the authors about the responses they've gotten over the past decade. Prepare to be both enlightened and delighted, whether you're already a fan of this classic fable or are discovering it for the first time.

The book is the culmination of years of experience of a dedicated team of experts at the Triumphant Institute of Management Education (T.I.M.E.) Pvt. Ltd, an institute that has helped students in achieving their goal of making it into the IIMs and other premier B-schools in the country over the last 13 years. No other work on GDs and interviews is as comprehensive and path-breaking as the one in your hands. Features includes * What do moderators look for in the GDs? * How does one prepare for GDs? * How does one score more points in a GD? * How does one steer clear of the distractions during the course of a GD? * How does one `grab the initiative of others` while guarding one`s own? * What do interviewers look for? * How does one double one`s chances of selection? * How does one make a `stress interview` stress free?

The Understanding Research series focuses on the process of writing up social research. The series is broken down into three categories: Understanding Statistics, Understanding Measurement, and Understanding Qualitative Research. The books provide researchers with guides to understanding, writing, and evaluating social research. Each volume demonstrates how research should be represented, including how to write up the methodology as well as the research findings. Each volume also reviews how to appropriately evaluate published research. Focus Group Discussions addresses the challenges associated with conducting and writing focus group research. It provides detailed guidance on the practical and theoretical considerations in conducting focus group discussions including: designing the discussion guide, recruiting participants, training a field team, moderating techniques and ethical considerations. Monique Hennink describes how a methodology section is read

and evaluated by others, such as journal reviewers or thesis advisors. She provides readers with guidance on specific aspects of presenting research findings, such structuring narrative accounts, developing an argument, using quotations, reporting focus group interaction, visual presentation formats, and strategies for grounding study results. She describes the challenges in assessing focus groups and details practical strategies for assessing scientific rigor. The book includes case study examples of field research across a range of disciplines and international contexts. Hennink concludes the volume with an overview of current debates relating to the evaluation of qualitative research, suggesting ways to critique the research design, methodology and results of focus group research.

Each book in the 10 Performance-Based Projects series provides 10 ready-made projects designed to help students achieve higher levels of thinking and develop 21st-century skills. Projects are aligned to the Next Generation Science Standards, allowing students to explore and be creative as well as gain enduring understanding. Each project represents a type of performance assessment, including portfolios, oral presentations, research papers, and exhibitions. Included for each project is a suggested calendar to allow teacher scheduling, mini-lessons that allow students to build capacity and gain understanding, as well as multiple rubrics to objectively assess student performance. The lessons are presented in an easy-to-follow format, enabling teachers to implement projects immediately. Grades 3-5

A generally acknowledged characteristic of modern life, namely the temporalization of experience, inextricable from our intensified experience of contingency and difference, has until now remained largely outside psychology's purview. Wherever questions about the development, structure, and function of the concept of time have been posed – for example by Piaget and other founders of genetic structuralism – they have been concerned predominantly with concepts of "physical", chronometrical time, and related concepts (e.g., "velocity"). All the contributions to the present volume attempt to close this gap. A larger number are especially interested in the narration of stories. Overviews of the relevant literature, as well as empirical case studies, appear alongside theoretical and methodological reflections. Most contributions refer to specifically historical phenomena and meaning-constructions. Some touch on the subjects of biographical memory and biographical constructions of reality. Of all the various affinities between the contributions collected here, the most important is their consistent attention to issues of the constitution and representation of temporal experience.

This book explores the application of a significant discussion approach, Quality Talk, to English learning in Taiwanese college classrooms. Quality Talk has been found to successfully enhance students' reading comprehension and higher-level thinking in American contexts. It offers an introduction to Quality Talk and demonstrates how it can be implemented in college level English classes. It addresses students' three levels of English proficiency: elementary, intermediate, and advanced. The respective chapters discuss a range of aspects: students' language proficiency levels, students' own viewpoints on the discussion approach, students' academic backgrounds, teaching materials, and culture-based learning. Readers will gain valuable insights into the Quality Talk approach and how it can be implemented in the classroom.

Whilst there is no shortage of professional literature discussing the changing nature of libraries and information organizations in the digital age, words such as innovation, entrepreneurship and creativity make only occasional appearances. Considerable change and innovation has already been achieved, and a future in which all information resources, including books and archives, will be accessed in digital format poses even greater challenges for information professionals. The ability to move into uncharted territory, engage in and enjoy innovation, create radical new visions, and manage resources in risky environments will be essential. This groundbreaking book is the first to discuss and apply the rhetoric and theories of innovation and entrepreneurship in information organizations. It both celebrates existing examples of good practice, and promotes the development of innovative and entrepreneurial behaviour at all organizational levels. Key areas covered include: promoting innovation and entrepreneurship in information organizations the nature of innovation and entrepreneurship corporate and social entrepreneurship in public sector information services organizing for innovation: strategies, leadership and creative team-building innovation in practice and managing innovation projects collaborative and open innovation through networks and partnerships. The text makes plentiful use of features such as learning objectives, challenges, reflections, group discussion topics, review questions and summaries, making it suitable both for individual reflection and learning, and for group learning situations such as professional development and training courses. Readership: All information professionals and managers who wish to understand and engage creatively with innovation to achieve success, and to realise the professional and social benefits of entrepreneurial action in their organizations. In this one-stop resource for middle and high school teachers, Kristina J. Doubet and Jessica A. Hockett explore how to use differentiated instruction to help students be more successful learners--regardless of background, native language, learning style, motivation, or school savvy. They explain how to * Create a healthy classroom community in which students' unique qualities and needs are as important as the ones they have in common. * Translate curriculum into manageable and meaningful learning goals that are fit to be differentiated. * Use pre-assessment and formative assessment to uncover students' learning needs and tailor tasks accordingly. * Present students with avenues to take in, process, and produce knowledge that appeal to their varied interests and learning profiles. * Navigate roadblocks to implementing differentiation. Each chapter provides a plethora of practical tools, templates, and strategies for a variety of subject areas developed by and for real teachers. Whether you're new to differentiated instruction or looking to expand your repertoire of DI strategies, Differentiation in Middle and High School will show you classroom-tested ways to better engage students and help them succeed every day. Teaching and Learning in Physical Therapy: From Classroom to Clinic is a text seeking to guide the development of effective teaching strategies for use in both the classroom and the clinical setting. Margaret Plack and Maryanne Driscoll have developed this text with over 35 years of experience in teaching, research and clinical work. This experience has given them the opportunity to discover the best ways to students learn at different ages and stages of development. Teaching and Learning in Physical Therapy is grounded in current literature and has a theoretical basis in reflective practice, active learning strategies, and brain compatible instruction. Also included is practical information that allows students, educators, and clinicians, working with both students and patients, to develop instructional strategies that will work best in a variety of settings. Features included: • A user-friendly approach integrating theory and practical application throughout • References and suggested reading at the end of each chapter • Classroom and clinical vignettes to help reinforce concepts • Integrative problem solving activities and reflective questions Teaching and Learning in Physical Therapy: From Classroom to Clinic is applicable in both the classroom and clinical setting, making it ideal for physical therapy students, educators,

and clinicians as well as other health care practitioners and educators.

This book is open access under a CC BY 4.0 license. The book presents the Proceedings of the 13th International Congress on Mathematical Education (ICME-13) and is based on the presentations given at the 13th International Congress on Mathematical Education (ICME-13). ICME-13 took place from 24th- 31st July 2016 at the University of Hamburg in Hamburg (Germany). The congress was hosted by the Society of Didactics of Mathematics (Gesellschaft für Didaktik der Mathematik - GDM) and took place under the auspices of the International Commission on Mathematical Instruction (ICMI). ICME-13 brought together about 3.500 mathematics educators from 105 countries, additionally 250 teachers from German speaking countries met for specific activities. Directly before the congress activities were offered for 450 Early Career Researchers. The proceedings give a comprehensive overview on the current state-of-the-art of the discussions on mathematics education and display the breadth and deepness of current research on mathematical teaching-and-learning processes. The book introduces the major activities of ICME-13, namely articles from the four plenary lecturers and two plenary panels, articles from the five ICMI awardees, reports from six national presentations, three reports from the thematic afternoon devoted to specific features of ICME-13. Furthermore, the proceedings contain descriptions of the 54 Topic Study Groups, which formed the heart of the congress and reports from 29 Discussion Groups and 31 Workshops. The additional important activities of ICME-13, namely papers from the invited lecturers, will be presented in the second volume of the proceedings.

"Making Sense of the Social World, Fourth Edition is an engaging and student-friendly introduction to social research for students who need to understand methodologies and results, but who may never conduct research themselves. It provides a balanced treatment of qualitative and quantitative methods, integrating substantive examples and research techniques throughout. All essential elements of social research methods are covered, including validity, causation, experimental and quasi-experimental design, and techniques of analysis. Additionally, it is written in a less formal style to make concepts more accessible to students, and it includes wide-ranging, practical exercises drawn from every experience to help students get hands-on with the material."--pub. desc.

Globalization has brought in numerous opportunities for the teeming millions, with more focus on the students overall capability apart from academic competence. Many students, particularly those from non-English medium schools, find that they are not preferred due to their inadequacy of communication skills and soft skills, despite possessing sound knowledge in their subject area along with technical capability. Keeping in view their pre-employment needs and career requirements, the book will help the students to change their traditional mindsets from controlling to creativity; to employee empowerment and organizational learning; to gain skills in the language which has become the international lingua franca, a language of global economy. All the chapters are full of gems and rubies, but the chapters based on resume writing group discussion, conducting meetings, interview skills, grammar, etc., are the black pearls in the treasure trove. Also the chapters are dainty, detectable and delightful as part and parcel of your reading, writing, and speaking skills. This book will surely empower students with the language and life skills they need to carry out their career goals. It also provides ample opportunities for the students to build awareness and practice the language in real-life scenarios. Its integrated skills approach develops the students self-confidence to survive and succeed in professional and social encounters within the English speaking global community.

This book explores the broad view on child well-being and the quality of life research. It starts with a discussion of the origin of the social indicator movement and a review of literature on the concepts of quality of life, (subjective) well-being and resilience. It then discusses the force of culture on child development, and shows how two prototypical environments favor either the independent or interdependent self-model. After an exploration of the shifts and changes in the child well-being indicator movement and trends of child well-being measurements, the book turns to research on Tsunami-affected children. The first part of the study gives these children and their caregivers a voice, formulating in their words what constitutes child well-being for them in the given circumstances. The concepts provided are processed in detail, contrasted, and then made into indicators. The second part of the study describes the

There are no specific rules to prepare for a GD. And no one knows what the topic of GD is going to be. This book includes topics that are likely to be put by the Group Testing Officer before the candidates to gauge their personality and leadership qualities. It will be a good idea to keep yourself abreast with topics from: 1. Current Affairs - Current Affairs is something that you have to be thorough with.

Understand the recent crises affecting the world, latest developmental initiatives, and important national & global events. 2. Historical topics- Have a fair knowledge about the history of India and the world. Having historical information will help you cite examples and make references whenever needed. 3. Sports, Arts & Literature - In these topics, try to have a decent idea about what is popular, who are the leaders in each area, the latest that has happened in these areas. 4. Data crunching - Do familiarize yourself with important data.

Throwing in some data if required in your GD will definitely create an impression among the assessors. Speak with a measure of confidence on the given topic; and secure the nod of the evaluator.

*This highly readable text guides the reader through each stage of their research project, from getting started to writing up, with each chapter clearly explaining a step along the way. Based on the author's hugely popular *The Essential Guide to Doing Research*, this new book retains the warmth, wit and grounded nature of the first, while providing tools to help students through the ins and outs of their own projects, and addressing the key questions students need to tackle. This is an inspiring book full of down-to-earth advice, illuminating figures, and diagrams and engaging real life examples. With this book as your personal mentor, a successfully completed research project is well within reach.*

This comprehensive, engaging guide to applied research distills the expertise of the distinguished ethnographer and methodologist Pertti Pelto over his acclaimed 50-year career. Having written the first major text promoting mixed qualitative and quantitative methods in applied ethnography in the 1970s, Pelto now synthesizes decades of innovation, including examples from around the world that illustrate how specific methods yield immediate results for addressing social problems. Ideal for researchers, students, training programs, and technical assistance projects, this

thorough text covers the key topics and skills required: gaining entry, recording and organizing field data, a host of specialized techniques, integrating qualitative and quantitative methods, building and training research teams, rapid assessment and focused ethnographic studies, short- and long-term ethnography, writing up results, non-Western perspectives on research, and more.

This book will support you through each milestone of your research project with step-by-step instructions to doing qualitative research. Whatever type of data or data collection method you use, it will help you to navigate the nuts and bolts of qualitative research, from forming your research question to effectively writing up. Your roadmap and toolbox all in one, it helps you choose the best research tools for your project while managing any challenges you might encounter along the way. It includes:

- Guidance on putting different research designs into practice, including using technology for interviews, data management, and unobtrusive research
- Practical mapping tools, including checklists and quick tips
- Online case studies and further reading to deepen your knowledge and expand your bibliography
- Advice from experts on how to design and implement excellent qualitative research, including considerations of ethical issues.

This book is the perfect companion for social sciences students carrying out their first qualitative research project.

Business Communication: Concepts, Skills, Cases, and Applications builds on the strengths of the previous edition and has been updated to reflect the latest research and technological developments in business communication.
