Flash is a necessary and immensely creative tool that dramatically increases the opportunities of any amateur photographer. However, many amateurs find flash intimidating, unsure of where to begin. Instead, they continue limiting themselves to shooting only available light. Understanding Flash Photography is a guide to off-camera flash, helping free photographers from "auto" to get the images they want when natural light isn't

Online Library Guide Nikon Sb900

enough. If you've been afraid to venture past natural light, here is the book that will finally help you explore the exciting possibilities of artificial light. Author Bryan Peterson starts by breaking down how flash works, then dispels the widely held myth that automatic "TTL" flash exposure is easier, explaining how to quickly master manual flash exposure to control the quality, shape, and direction of light. For the hundreds of thousands who found Understanding Exposure an exciting tool in moving past "auto" exposure in

Creative Flash Photography at the Speed of Light

Providing readers with a study of learning how to turn poorly lit images into finely crafted, masterfully lit photographs, this guidebook instills photographers with the self-confidence to think on their feet and photograph any portrait subject anywhere.

Acclaimed photographer Neil van Niekirk presents seven distinctly different lighting scenarios—available light, exposure metering, a touch of flash, bounced on-camera flash, off-camera flash, video light, and hard sunlight—to show readers how to manipulate the direction and quality of light, the subject's and photographer's position, and numerous other variables so as to turn a bad image into a stunning, professional-level portrait. Packed with dozens of instructional, full-color photos, this

Online Library Guide Nikon Sb900

work also features 10 sample photo sessions, allowing readers the opportunity to see the seven lighting scenarios put to practice.

This guide to on- and off-camera flash picks up where Peterson's "Understanding Exposure" leaves off, helping free photographers from the limitations of auto to get the images they want when natural light isn't enough.

Brian & Janet Stoppee have incorporated their decades of daily, hands-on expertise at image-making plus their leading

Canon Speedlites and Nikon Speedlights are small, off-camera flashguns that can provide big results - if you know how to use them properly. Acclaimed Boston photographers Lou Jones, Bob Keenan and Steve Ostrowski guide you through the technical and creative aspects of how to get the most out of these powerful tools in this indispensable guide, packed full of inspirational images and comprehensive diagrams of the lighting set ups used to

Online Library Guide Nikon Sb900

capture them. They are significantly more advanced, lighter and considerably cheaper than a standard flashgun, and have many advantages. They are small (and cheap) enough that a number can be carried in your kit, and they can be used in combination, triggered wirelessly. They use through-the-lens (TTL) metering, which allows you to use the in-camera LCD and histograms to calculate the required power/direction, rather than having to use a light meter or trial and error. They use proprietary, dedicated technology (from

Online Library Guide Nikon Sb900

Canon and Nikon) that means there are no compatibility issues. Getting the most out of them, however, remains a mystery - most photographers still just use their speedlights in the same way as a standard flash gun. This is where this book comes in.
