Covering New York, American & regional stock exchanges & international companies.

Bringing together original contributions from scholars across the world, this volume traces the history of travel writing from antiquity to the Internet age. It examines travel texts of several national or linguistic traditions, introducing readers to the global contexts of the genre. From wilderness to the urban, from Nigeria to the polar regions, from mountains to rivers and the desert, this book explores some of the key places and physical features represented in travel writing. Chapters also consider the employment in travel writing of the diary, the letter, visual images, maps and poetry, as well as the relationship of travel writing to fiction, science, translation and tourism. Gender-based and ecocritical approaches are among those surveyed. Together, the thirty-seven chapters here underline the richness and complexity of this genre.

Montgomery, Runger, and Hubele provide modern coverage of engineering statistics, focusing on how statistical tools are integrated into the engineering problem-solving process. All major aspects of engineering statistics are covered, including descriptive statistics, probability and probability distributions, statistical test and confidence intervals for one and two samples, building regression models, designing and analyzing engineering experiments, and statistical process control. Developed with sponsorship from the National Science Foundation, this revision incorporates many insights from the authors teaching experience along with feedback from numerous adopters of previous editions.

Is my enterprise really prepared for future business? What can I do to become more competitive? Ulf Pillekahn's book is directed at all of those seeking answers to these questions: executives in strategic positions, business analysts, consultants, trend scouts, marketing and product managers and research engineers. The book presents the two most powerful tools for future planning: environmental analysis, based on the use of trends, as well as the development of visions of the future through the use of scenarios. While scenarios are generally regarded as a classical management tool, it is expected that the importance of trends will gain tremendously in the coming years. Pillekahn demonstrates how to build robust strategies by aligning the results of environmental and enterprise scenarios, thereby offering entirely new insights. "Using Trends and Scenarios as Tools for Strategy Development" convincingly illustrates why efficient observation of the environment of an enterprise is an absolutely essential factor for strategy development, and why strategy development only works if it is institutionalized as a permanent enterprise process. It also addresses the issue of what information is needed to keep both processes running. The book further describes how trends can be categorized, and offers advice on how to glean the essential information from the vast variety of trends. Information is provided on how scenarios are used as a holistic instrument for creating visions and pictures of the future, and how the results of trend research and scenario techniques find their way into entrepreneurial strategy development. An optimized strategy development process is also outlined. Practical examples and real-life pictures of the future round off Pillekahn's insightful discussion of future business planning.

Widely acknowledged as a contemporary classic that has introduced thousands of readers to American literature, From Puritanism to Postmodernism: A History of American Literature brilliantly charts the fascinating story of American literature from the Puritan legacy to the advent of postmodernism. From realism and romanticism to modernism and postmodernism it examines and reflects on the work of a rich panoply of writers, including Poe, Melville, Fitzgerald, Pound, Wallace Stevens, Gwendolyn Brooks and Thomas Pynchon. Characterised throughout by a vibrant and engaging style it is a superb introduction to American literature, placing it thoughtfully in its rich social, ideological and historical context. A tour de force of both literary and historical writing, this Routledge Classics edition includes a new preface by co-author Richard Ruland, a new foreword by Linda Wagner-Martin and a fascinating interview with Richard Ruland, in which he reflects on the nature of American fiction and his collaboration with Malclolm Bradbury. It is published here for the first time.

Ker-SPLASH! is an up-to-date, comprehensive look at the hobby and sport of recreational boating and water skiing. It is intended as a guide for both the neophyte and the experienced recreational power boater. The book includes detailed instructions for: (1) Selecting and buying a boat; (2) Making an intelligent engine choice; (3) Selecting boating accessories; (4) Choosing skis, boards, and towables; (5) Selecting a personal slalom ski; (6) Learning to ski and towing a skier; (7) Learning to slalom ski; (8) Riding and towing other water toys; and (9) Maintenance and safety issues. The Comparative Survey of Freedom is an institutional effort by Freedom House to monitor the progress and decline of political rights and civil liberties in 191 nations and 59 related territories. These year-end reviews of freedom began in 1955, when they were called the Balance Sheet of Freedom and, still later, the Annual Survey of the Progress of Freedom. This program was expanded in the early 1970s, and has appeared in Freedom Review since 1973. It has also been issued in a more developed context as a yearbook since 1978. Since 1989, the Survey project has been a year-long effort produced by regional experts, consultants and human rights specialists. The Survey derives its information from a wide range of sources. Most valued of these are the many human rights activists, journalists, editors and political figures around the world who keep us informed of the human rights situation in their countries. Throughout the year. Freedom House personnel regularly conduct fact-finding missions to gain more in-depth knowledge of the vast political transformations affecting our world. During these week-to-month-long investigations, we make every effort to meet a cross-section of political parties and associations, human rights monitors, religious figures, representatives of both the private sector and trade union movement, academics and journalists. During the past year. Freedom House staff traveled to numerous countries throughout most of the world's geographical and political regions. The Survey project team also consults a vast array of published source materials, ranging from the reports of other human rights organizations to often rare, regional newspapers and magazines. This year's Survey team includes: Adrian Karatnycky, Martin Edwin Anderson, Kristen Guida, Marshall Freeman Harris, Thomas R. Lansner, Arch Puddington, Leonard R. Sussman, and George Zarycky. The general editor of Freedom in the World is Roger Kaplan; the managing editor is Tara Kelly. This year's research coordinator was Charles Graybow.

Universal Principles of Design, Revised and Updated

Words equal credibility. The more articulate a person is, the more seriously they will be taken—by everyone. On any given day, you might read “abrogate” used in a USA Today article; or “demagogue” or “fiduciary” used on CNN. You might hear “ensorcelled” and “torpor” in a TV drama; you’ll hear a political candidate described as “truculent.” You may hear “pedantic” used in a movie. How many of these words are part of most college students’ “arsenal of words”? Hopefully all of them, but if not, 499 Words Every College Student Should Know will provide them with what they need to become more articulate in their speaking and writing. It will also enhance their comprehension in their reading, ultimately culminating in what every student aspires to: earning better grades! 499 Words Every College Student Should Know teaches truly important vocabulary words and focuses on Professor Spignesi’s classroom-tested Trinity of Vocabulary Use. For each word, the vocabulary-enriched and educated student will be able to: Understand the word in their reading Use the word in their speaking Make good use of the word in their writing Using easy-to-understand, informative, and often humorous explanations of every word, 499 Words Every College Student Should Know also explores how to use the words in sentences, and in proper context. The majority of these words were individually chosen because they are fairly commonplace in media, books, online, and elsewhere, and students need to be able to understand them. Knowing them — in fact, using the words and making them part of their everyday language — will make any college student or those soon-to-be, more credible.

Routledge Handbook of Asian Regionalism

Garner's Modern American Usage

When first published, Marshall McLuhan's Understanding Media made history with its radical view of the effects of electronic communications upon man and life in the twentieth century.

The Routledge Handbook of Asian Regionalism is a definitive introduction to, and analysis of, the development of regionalism in Asia, including coverage of East Asia, Southeast Asia and South Asia. The contributors engage in a comprehensive exploration of what is arguably the most dynamic and important region in the world. Significantly, this volume addresses the region consequently organised thematically under the headings of: conceptualizing the region economic issues political issues strategic issues regional organizations As such, the Handbook presents some of the key elements of the competing interpretations of this important and highly contested topic, giving the reader a chance to evaluate not just where Asian regionalism is, but also analysing these trends and events. This book will be an indispensable resource for students and scholars of Asian politics, international relations and regionalism.

The Ghost of Graylock

Guide to GPS Positioning

The Annual Survey of Political Rights and Civil Liberties 1997-1998

Does an abandoned asylum hold the key to a frightful haunting? Everyone's heard the stories about Graylock Hall. It was meant to be a place of healing - a hospital where children and teenagers with mental disorders would be cared for and perhaps even cured. But something went wrong. Several young patients died under mysterious circumstances. Eventually, the hospital was shut down, the building abandoned and left to rot deep in the woods. As the new kid in town, Neil Cady wants to see Graylock for himself. Especially since rumor has it that the building is haunted. He's got fresh batteries in his flashlight, a camera to document the adventure, and a new best friend watching his back. Neil might think he's prepared for what he'll find in the dark and decrepit asylum. But he's certainly not prepared for what follows him home. . . . Scary, suspenseful, and surprising, Dan Poblocki's latest ghost story will keep you turning pages deep into the dead of night.

♥♥ Bartleby, The Scrivener Bartleby, the Scrivener: A Story of Wall Street, is a short story by the American writer Herman Melville. It first appeared anonymously in two parts in the November and December 1853 editions of Putnam's Magazine. It tells the story of Bartleby, a man hired to work in a law firm as a scrivener. As time goes on, Bartleby becomes stranger and stranger, refusing to do any work and taking up residence in the offices.

Provides an innovative theory of regime transitions and outcomes, and tests it using extensive evidence between 1800 and today.

Rules for Writers

This edition of "The Canadian Encyclopedia is the largest, most comprehensive book ever published in Canada for the general reader. It is COMPLETE: every aspect of Canada, from its rock formations to its rock bands, is represented here. It is UNABRIDGED: all of the information in the four red volumes of the famous 1988 edition is contained here in this single volume. It has been EXPANDED: since 1988 teams of researchers have been diligently fleshing out old entries and recording new ones; as a result, the text from 1988 has grown by 50% to over 4,000,000 words. It has been UPDATED: the researchers and contributors worked hard to make the information as current as possible. Other words apply to this extraordinary work of scholarship: AUTHORITATIVE, RELIABLE and READABLE. Every entry is compiled by an expert. Equally important, every entry is written for a Canadian reader, from the Canadian point of view. The finished work - many years in the making, and the equivalent of forty average-sized books - is an extraordinary storehouse of information about our country. This book deserves pride of place on the bookshelf in every Canadian Home. It is no accident that the cover of this book is based on the Canadian flag. For the proud truth is that this volume represents a great national achievement. From its formal inception in 1979, this encyclopedia has always represented a vote of faith in Canada; in Canada as a separate place whose natural worlds and whose peoples and their achievements deserve to be recorded and celebrated. At the start of a new century and a new millennium, in an increasingly borderless corporate world that seems ever more hostile to national distinctions and aspirations, this "Canadian Encyclopedia is offered in a spirit of defiance and of faith in our future. The statistics behind this volume are staggering. The opening sixty pages list the 250 Consultants, the roughly 4,000 Contributors (all experts in the field they describe) and the scores of researchers, editors, typesetters, proofreaders and others who contributed their skills to this massive project. The 2,640 pages incorporate over 10,000 articles and over 4,000,000 words, making it the largest - some might say the greatest - Canadian book ever published. There are, of course, many special features. These include a map of Canada, a special page comparing the key statistics of the 23 major Canadian cities, maps of our cities, a variety of tables and photographs, and finely detailed illustrations of our wildlife, not to mention the colourful, informative endpapers. But above all the book is "encyclopedic" - which the "Canadian Oxford Dictionary describes as "embracing all branches of learning." This means that (with rare exceptions) there is satisfaction for the reader who seeks information on any Canadian subject. From the first entry "A mari usque ad mare - "from sea to sea" (which is Canada's motto, and a good description of this volume's range) to the "Zouaves (who mustered in Quebec to fight for the beleaguered Papacy) there is the required summary of information, clearly and accurately presented. For the browser the constant variety of entries and the lure of regular cross-references will provide hours of fasionation. The word "encyclopedia" derives from Greek expressions alluding to a grand "circle of knowledge." Our knowledge has expandedimmeasurably since the time that one mnd could encompass all that was known.Yet now Canada's finest scientists, academics and specialists have distilled their knowledge of our country between the covers of one volume. The result is a book for every Canadian who values learning, and values Canada.

A cross-disciplinary reference of design. Pairs common design concepts with examples that illustrate them in practice.
