This timely and innovative expose by contemporary Jungian psychoanalyst, Ken Kimmel, reveals a culturally and historically embedded narcissism underlying men's endlessly driven romantic projections and erotic fantasies, that has appropriated their understanding of what love is. Men enveloped in narcissism fear their interiority and all relationships with emotional depth that prove too overwhelming and penetrating to bear--so much so that the other must either be colonized or devalued. This wide-ranging work offers them hope for transcendence. After World War II, a powerful conviction took hold among American intellectuals and policymakers: that the United States could profoundly accelerate and ultimately direct the development of the decolonizing world, serving as a modernizing force around the globe. By accelerating economic growth, promoting agricultural expansion, and encouraging the rise of enlightened elites, they hoped to link development with security, preventing revolutions and rapidly creating liberal, capitalist states. In *The Right Kind of Revolution*, Michael E. Latham explores the role of modernization and development in U.S. foreign policy from the early Cold War through the present. The modernization project rarely went as its architects anticipated. Nationalist leaders in postcolonial states such as India, Ghana, and Egypt pursued their own independent visions of development. Attempts to promote technological solutions to development problems also created unintended consequences by increasing inequality, damaging the environment, and supporting coercive social policies. In countries such as Guatemala, South Vietnam, and Iran, U.S. officials and policymakers turned to modernization as a means of counterinsurgency and control, ultimately shoring up dictatorial regimes and exacerbating the very revolutionary dangers they wished to resolve. Those failures contributed to a growing challenge to modernization theory in the late 1960s and 1970s. Since the end of the Cold War the faith in modernization as a panacea has reemerged. The idea of a global New Deal, however, has been replaced by a neoliberal emphasis on the power of markets to shape developing nations in benevolent ways. U.S. policymakers have continued to insist that history has a clear, universal direction, but events in Iraq and Afghanistan give the lie to modernization's false hopes and appealing promises.

Comet Hale-Bopp defines a milestone event for cometary science: it is the first "really big" comet observed with modern equipment on the ground and from space and due to that; it is considered the new reference object in cometary sciences. At the beginning of a new era in spacecraft exploration of comets and five years after Hale-Bopp's perihelion passage these proceedings of invited and contributed papers for IAU Colloquium 186 "Cometary Science after Hale-Bopp" review the state-of-the-art knowledge on comets, the icy, dusty and most primordial left-overs of the formation disk of our own solar system. This is the first volume with invited review papers. A second volume with contributed papers is published in ISBN 1-4020-0978-X.

ON THE RUN Emma McKinnon must escape an unwanted suitor and his manipulative sister, who won't take no for an answer. Marriage might save her from destitution, but she'd only be trading one nightmare for another. As a penniless vicar's daughter, she has nothing to lose except ownership of her heart. Emma takes a position as a governess on Star Frost, an elusive island off the coast of Cornwall. From the moment of his birth, Calvin Stanley West, Duke of Renvere, was blessed. But none of his successes and wealth could have prepared him for the fire that killed his wife and left him and one of his daughters horrifically scarred. Worse still, the same glittering aristocratic society that had bowed in his presence now whispered cruel insults about his children. He abandoned his life, his prestige, and secreted his daughters away to a place where no whispered barbs would reach their precious ears. THEY CAN'T HIDE FOREVER Calvin's prayers are answered when a governess arrives on his doorstep, but this is no ordinary governess. She's young, beautiful, and she stirs a passion inside him he thought had been burned away forever. Emma swiftly becomes enamored with Star Frost and her new charges. But the duke, though scarred and intimidating, is also kind, dedicated to his children, and the most handsome man she'd ever seen. He makes her long for things she'd been raised to never feel. Is it a trick of the mysterious island or is the duke the one man her heart has yearned for all along? Just when she feels safe and the attraction between them ignites into a passionate affair, the people she ran from have hunted her down, shattering her hopes. Emma's instinct is to run again, but if she does, she will have to give up everything she loves or stay and fight for her heart's desire. The choice should be easy, but is desire enough for her? Can Calvin love her in return or will the memory of his wife turn their passionate affair to ash?

Cinthia - Goodreads Molly Trent is a passionate herbalist whose sorrow-filled childhood has driven her to a new mission in life—to make people feel better. Unfortunately, a series of burglaries at her wellness shop and a disgruntled customer put her in the path of a cynical and suspicious detective, who thinks she does more harm than good. What is the status of visual evidence in history? Can we actually see the past through images? Where are the traces of previous lives deposited? Michael Camille addresses these important questions in *Mirror in Parchment*, a lively, searching study of one medieval manuscript, its patron, producers, and historical progeny. The richly illuminated Luttrell Psalter was created for the English nobleman Sir Geoffrey Luttrell (1276-1345). Inexpensive mechanical illustration has since disseminated the book's images to a much wider audience; hence the Psalter's representations of manorial life have come to profoundly shape our modern idea of what medieval English people, high and low, looked like at work and at play. Alongside such supposedly truthful representations, the Psalter presents myriad images of fantastic monsters and beasts. These patently false images have largely been disparaged or ignored by modern historians and art historians alike, for they challenge the credibility of those pictures in the Luttrell Psalter that we wish to see as real. In the conviction that medieval images were not generally intended to reflect daily life but rather to shape a new reality, Michael Camille analyzes the Psalter's famous pictures as representations of the world, imagined and real, of its original patron. Addressed are late medieval chivalric ideals, physical sites of power, and the boundaries of Sir Geoffrey's imagined community, wherein agricultural laborers and fabulous monsters play a similar ideological role. The Luttrell Psalter thus emerges as a complex social document of the world as its patron hoped and feared it might be.

Undeservedly, you will atone for the sins of the father. Malcom O'Rourke doesn't want to want the gift his father gave him, but Ivy Clearwater is hard to ignore. He gives in to the passion and desire pulling them together, only to have the situation blow up in his face. After her father attempts to contact her through a friend, things get bad—for Malcom. Ian O'Rourke punishes him for the security breach. With Ivy's tender, loving care and her attention, he begins to heal from the latest beating. A night out ends in a nightmare.

Everything he feared is on the verge of coming true when his father's sworn enemies capture him with the intention of making Ivy pay for his sins. SIN will take you farther than you want to go, keep you longer than you want to stay, and cost you more than you want to pay. This book, by one of the most prominent interpreters of Leo Strauss's thought, was the first to address the problem that Leo Strauss himself said was the theme of his studies: the theologico-political problem or the confrontation with the theological and the political alternative to philosophy as a way of life. In his theologico-political treatise, which comprises four parts and an appendix, Heinrich Meier clarifies the distinction between political theology and political philosophy and reappraises the unifying center of Strauss's philosophical enterprise. The book is the culmination of Meier's work on the theologico-political problem. It will interest anyone who seeks to understand both the problem caused by revelation for philosophy and the challenge posed by political-religious radicalism. The appendix makes available for the first time two lectures by Strauss that are immediately

relevant to the subject of this book and that will open the way for future research and debate on the legacy of Strauss.

Development of the Leopard 1 can be traced back to November 1956, when the operational requirement for a new battle tank was formulated by the Federal German Armed Forces (Bundeswehr). Originally a Franco-German project, the tank under design was named the 'Standard-Panzer'. The French later dropped out, however, and on 1 October 1963 the 'Standard' tank was officially named 'Leopard', an appropriate choice considering Germany's wartime pedigree with the formidable Tiger and Panther. This book traces the development and service record of the Leopard 1, detailing its control systems, modifications and variants.

The Kabbalah has long languished in darkness, unknown outside the confines of Jewish Mysticism and the communities who practiced it. But today, the Kabbalah is well-known but often misunderstood. The story of Kabbalah is as old as Judaism itself, with many of the ideas present in the Hebrew Scriptures interpreted in the canon of Kabbalah. Applying Jewish theological premises and Neo-Platonist cosmology, the Kabbalists created a systematic interpretation of familiar Creation Narrative in the Book of Genesis, which today illuminates and serves Judaism. At the same time, Kabbalistic concepts have entered mainstream consciousness with great interest expressed in mainstream Christianity and even in modern science.
