In Understanding Dogs, Clinton R. Sanders explores the day-to-day experience of living and working with canine companions. Based on a decade of research in obedience

classes, veterinary offices, and guide dog training schools, Sanders examines how dog owners come to understand their animals as thinking, emotional individuals--and explains how dogs serve as social facilitators as well as adornments to personal identity. Sanders shows dog owners how--while we try to teach and shape our dogs' behavior--they often teach us how to more thoughtfully enjoy physical warmth, a nourishing meal, a walk in the woods, or the simple joys of the immediate moment. Book jacket.

"The first comprehensive book to cover both raw and home-cooked diets specifically for dogs, written by an expert in dog food research and development"--Provided by publisher.

When Homo sapiens sapiens met Canis lupus lupus millennia ago, the result was Canis lupus familiaris, the domestic dog. Since that fateful encounter, the dog has become, arguably, humankind's greatest creation. The domestic dog is the most widely distributed species (other than ourselves) in the world, being found virtually wherever people live, and is also the most diversified of species, with literally hundreds of recognized breeds. While we have shaped the dog, it, too, has helped shape human history in innumerable ways. Our Debt to the Dog is a critical historical and cross-cultural examination, through the use of case studies, of this most improbable 15,000-year relationship and an exploration of how this relationship shaped the history of the world. It is also very much an apology to the dog because over the course of the

partnership horrific acts were perpetrated against it intentionally and otherwise. Our Debt to the Dog enriches our understanding of the dog and extends our appreciation for the profound complexity of past and present human-canine relationships and the dog's contributions to our lives and our world.

Best-selling author Gordon Korman's middle-grade favorite, now with a fresh look! Wallace Wallace won't lie, even if it means detention. And after he handed in a scorching book report of the classic novel, Old Shep, My Pal, detention is just what he's been handed. He is sure he's done nothing wrong: he hated every

minute of that book, especially when the dog dies in the end! Why do dogs always die at the end? Wallace refuses to do a rewrite of his report, so his English teacher, who happens to be directing the school play of Old Shep, My Pal, forces him go to the rehearsals to teach him a lesson on why the story is the way it is. Surrounded by theater kids who are apprehensive of him, Wallace sets out to prove himself. But not by changing his mind. Instead, he changes the play into a rock-and-roll rendition, complete with Rollerblades and a moped!

From preparing for the very first lesson to mastering fiendish fingering and performance anxiety, this inspirational guide helps teachers nurture and support students at every level and develop a love of the piano. With musical communication at its heart, The Piano Teacher's Survival Guide tackles universal issues and common frustrations faced by all pianists as well as improving and developing teaching skills and piano technique. In a nation where our love of dogs keeps growing and dog ownership has reached an all-time high, confusion about dogs and their behavioral problems is skyrocketing. Many dogs are out of control, untrained, chewing up furniture, taking medication for

anxiety, and biting millions of people a year. Now, in this groundbreaking new guide, Jon Katz, a leading authority on the human-canine bond, offers a powerful and practical philosophy for living with a dog, from the moment we decide to get one to the sad day when one dies. Conventional training methods often fail dog owners, but Katz argues that we know our dogs better than anyone else possibly could, and therefore we are well suited to train them. It is imperative, he says, that we think rationally and responsibly about how we choose, train, and live with the dogs we love, and the more we learn about ourselves, the better we can recognize their wonderful animal natures. Misinterpreting dogs is a profound obstacle to understanding them. Katz believes that both people and dogs are unique—a chow differs from a Lab just as a city dweller differs from a farmer—and he describes how such individuality isn't addressed by even the best and most popular training methods. Not every training theory is for everyone, notes Katz, but almost anyone can train a dog and live with him comfortably. Katz on Dogs is filled with no-nonsense advice and answers to such key questions as:

- *What kind of dog should I have? Is there is a specific*

breed or kind of dog for my personality, family, or living situation? • What is the best way to train a dog? • Can I trust my vet? • How often (and for how long) can a dog be left alone? • Is it preferable to have only one dog, or are more better? • What are the secrets to successful housebreaking? • What are my dogs thinking, if anything? • How can I walk my dog instead of having her walk me? • Is it ever okay to give away a dog you love? • When is it time to put my dog down? Katz draws from his own experience, his interactions with thousands of dog owners, vets, breeders, dog rescue workers, trainers, and behaviorists, and he has tested his approach with volunteer dog owners around the country. Their helpful and often inspiring stories illustrate how all of us can live well with our dogs. You can do it, Katz contends. You can live a loving and harmonious life with your dog.

A bestselling modern classic—both poignant and funny—narrated by a fifteen year

old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.
