

Guided Practice Activities Math

Yes, you can really help your child succeed in math! Even If You Think, You Cannot. Inspire your child to learn and love math with this book that provides parents with simple, hands-on activities for their children-learning math at home. It will be very helpful for parents to know how to help their children succeed in math. Repetition is the path to mastery, and so the logic goes with timed math drills. Maybe you're home schooling, or maybe you're in a district that's gone full speed into Mad Minutes, Math workbook or some other type of timed testing. Either way, your kid needs practice and lots of it. Nobody learns math by osmosis. You learn math by burning up pencils and paper. For that, we offer you this book, which contains a growing collection of more than 100 math worksheets with answer keys that I created while teaching math to my daughters. There are also educational calculators that help illustrate how problems are solved, not just provide answers. All of this has done wonders for my children. And I hope it will do the same for yours.

Differentiate math instruction using Guided Math Made Easy for grade K. This 96-page book includes large-group lessons that are paired with smaller, individualized mini-lessons at three levels of difficulty. The lessons support NCTM standards, which allows for easy integration into an existing math curriculum. The book includes reproducibles and aligns with state, national, and Canadian provincial standards.

Combine math and literacy instruction with these literature-based number activities. Perfect for beginning learners in PreK, K and Grade 1, and includes a literature connection, guided practice and student activity: Read Aloud, Talk About and Kids Create. Developmentally appropriate content combines with practical, manageable lessons for learning success you can count on! An ideal companion to Mrs. E's Extraordinary Alphabet Activities.
