Bella's Busy Day

All elementary schools in the Green Bay Area Public School District are now using the guided reading approach for reading instruction. Simply stated, guided reading involves teaching students at their instructional level. This means that in one classroom alone, a teacher may have five different reading groups in which students are all reading different books and focusing on different skills. Planning for numerous reading groups can take up the majority, if not all, of teacher's planning time. Due to the fact that planning for guided reading instruction takes so much time, teachers don't have time to meet their remaining job requirements within the allotted amount of time and are unable to collaborate effectively with their grade level peers. This advocacy project focuses on producing a resource of lesson plans that correspond to the books in Martin Elementary School's book room to minimize the amount of time teachers spend planning guided reading lessons in order to enable them to have more time to complete other job requirements during the work day. This project incorporates time for teachers to collaborate in order to produce quality lessons.

When a class leaves for recess, their just-baked Gingerbread Man is left behind. But he's a smart cookie and heads out to find them. He'll run, slide, skip, and (after a mishap with a soccer ball) limp as fast as he can because: "I can catch them! I'm their Gingerbread Man!" With help from the gym teacher, the nurse, the art teacher and even the principal, the Gingerbread Man does find his class, and he's assured they'll never leave him behind again. Teachers often use the Gingerbread Man story to introduce new students to the geography and staff of schools, and this fresh, funny twist on the original can be used all year long. Includes a poster with fun activities!

These days, it seems that everyone has a strong opinion about how to teach young children to read. Some may brush off the current tension as nothing more than one more round of "the reading wars." Others may avoid the clash altogether due to the uncivilized discourse that sometimes results. Certainly, sorting the signal from the noise is no easy task. In this leading-edge book, authors Jan Perkins and Kari Yates address this tension as a critical opportunity to look closely at the research, reevaluate current practices, and embrace new possibilities for an even stronger enactment of balanced literacy. From phonological processing to brain research to orthographic mapping to self-teaching hypothesis, Shifting the Balance cuts through the rhetoric (and the sciencey science) to offer readers a practical guide to decision-making about beginning reading instruction. The authors honor the balanced literacy perspective while highlighting common practices to reconsider and revise--all through a lens of what's best for the students sitting in front of us. Across six shifts, each chapter identifies a common instructional practice to reconsider explores various misunderstandings that establish and keep that practice in play shares scientific research to support its reconsideration proposes an instructional shift to apply a new perspective, and details several high-leverage instructional routines to support implementation of that shift. By pinpointing gaps and overlaps--as well as common misunderstandings and missed opportunities between the competing lines of thought--Jan and Kari offer busy educators direction and clarification for integrating science and balance into their daily instruction, while keeping meaningful experiences with text a priority.
