

Guided Reading Moving Toward Conflict Answer Key

Azerbaijan has set the course for the economy to reduce its dependence on oil by promoting new drivers of growth. By 2025, under the government’s Strategic Roads Maps, a more diversified economy should take shape led by three sectors: agriculture, tourism, and manufacturing. Bold reforms need to strengthen areas of the economy that could otherwise impede this transition, and policy makers must resolutely stay on the reform path. The core message of this publication is diversification toward non-oil sources of growth alongside efforts to reduce macroeconomic risks and the high cost of finance, make the education system responsive to the needs of the labor market, close infrastructure gaps, and help economically significant state-owned enterprises become more efficient.

In times of constant change, adaptive leadership is critical. This Harvard Business Review collection brings together the seminal ideas on how to adapt and thrive in challenging environments, from leading thinkers on the topic—most notably Ronald A. Heifetz of the Harvard Kennedy School and Cambridge Leadership Associates. The Heifetz Collection includes two classic books: *Leadership on the Line*, by Ron Heifetz and Marty Linsky, and *The Practice of Adaptive Leadership*, by Heifetz, Linsky, and Alexander Grashow. Also included is the popular Harvard Business Review article, “Leadership in a (Permanent) Crisis,” written by all three authors. Available together for the first time, this collection includes full digital editions of each work. Adaptive leadership is a practical framework for dealing with today’s mix of urgency, high stakes, and uncertainty. It has been used by individuals, organizations, businesses, and governments worldwide. In a world of challenging environments, adaptive leadership serves as a guide to distinguishing the essential from the expendable, beginning the meaningful process of adaption, and changing the status quo. Ronald A. Heifetz is a cofounder of the international leadership and consulting practice Cambridge Leadership Associates (CLA) and the founding director of the Center for Public Leadership at the Harvard Kennedy School. He is renowned worldwide for his innovative work on the practice and teaching of leadership. Marty Linsky is a cofounder of CLA and has taught at the Kennedy School for more than twenty-five years. Alexander Grashow is a Senior Advisor to CLA, having previously held the position of CEO.

Written by a distinguished scholar, this book explores themes of culture, identity, and power as they relate to conceptions of practice in conflict resolution and peacebuilding. Among the topics covered are ethnic and identity conflicts; culture, relativism and human rights; post-conflict trauma and reconciliation; and modeling varieties of conflict resolution practice. Context and Pretext in Conflict Resolution is the winner of the 2014 Conflict Research Society Book of the Year Prize.

Make workplace conflict resolution a game that EVERYBODY wins! Recent studies show that typical managers devote more than a quarter of their time to resolving coworker disputes. The Big Book of Conflict-Resolution Games offers a wealth of activities and exercises for groups of any size that let you manage your business (instead of managing personalities). Part of the acclaimed, bestselling Big Books series, this guide offers step-by-step directions and customizable tools that empower you to heal rifts arising from ineffective communication, cultural/personality clashes, and other specific problem areas—before they affect your organization’s bottom line. Let The Big Book of Conflict-Resolution Games help you to: Build trust Foster morale Improve processes Overcome diversity issues And more Dozens of physical and verbal activities help create a safe environment for teams to explore several common forms of conflict—and their resolution. Inexpensive, easy-to-implement, and proved effective at Fortune 500 corporations and mom-and-pop businesses alike, the exercises in The Big Book of Conflict-Resolution Games delivers everything you need to make your workplace more efficient, effective, and engaged.

The two volumes of the second edition of the International Handbook of Educational Change comprise a totally new, and updated collection of the most critical and cutting-edge ideas in educational change. Written by the most influential thinkers in the field, these volumes cover educational change at both the theoretical and practical levels. The updated handbook remains connected to the classical concerns of the field, such as educational innovation, reform, and change management, and also offers new insights into educational change that have been brought about by social change and shifting contexts of educational reform. Like the first best selling Handbook, this one will also undoubtedly become an essential resource for people involved in all spheres of education, from classroom teachers, teacher leaders and administrators to educational researchers, curriculum developers, and university professors. No other work provides such a wide-ranging and comprehensive examination of the field of educational change.

This encyclopaedia provides a comprehensive overview of major theories and approaches to the study of peace and conflict across different humanities and social sciences disciplines. Peace and conflict studies (PCS) is one of the major sub-disciplines of international studies (including political science and international relations), and has emerged from a need to understand war, related systems and concepts and how to respond to it afterward. As a living reference work, easily discoverable and searchable, the Palgrave Encyclopedia of Peace and Conflict Studies offers solid material for understanding the foundational, historical, and contemporary themes, concepts, theories, events, organisations, and frameworks concerning peace, conflict, security, rights, institutions and development. The Palgrave Encyclopedia of Peace and Conflict Studies brings together leading and emerging scholars from different disciplines to provide the most comprehensive and up-to-date resource on peace and conflict studies ever produced.

Conflict in relationships is inevitable. Like electricity, it can turn on a light, power change, or burn down the house. Over the past 30 years, Keith R Wilson has worked with thousands of people in his psychotherapy practice. They’ve all had problems with conflict. Either they stuff their feelings, or they’re outwardly angry, or they alternate between the two. However, he believes that conflict can signify the beginning of a real bond, not the end, provided that it’s well regulated. With disarming humor and refreshing directness, the author shows how you can manage your conflicts. You’ll be a better person and build better relationships if you do.

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council’s series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible impact on future international relations. Table of Contents: Introduction 1 Megatrends 6 Individual Empowerment 8 Poverty Reduction 8 An Expanding Global Middle Class 8 Education and the Gender Gap 10 Role of Communications Technologies 11 Improving Health 11 A MORE CONFLICTED IDEOLOGICAL LANDSCAPE 12 Diffusion of Power 15 THE RISE AND FALL OF COUNTRIES: NOT THE SAME OLD STORY 17 THE LIMITS OF HARD POWER IN THE WORLD OF 2030 18 Demographic Patterns 20 Widespread Aging 20 Shrinking Number of Youthful Countries 22 A New Age of Migration 23 The World as Urban 26 Growing Food, Water, and Energy Nexus 30 Food, Water, and Climate 30 A Brighter Energy Outlook 34 Game-Changers 38 The Crisis-Prone Global Economy 40 The Plight of the West 40 Crunch Time Too for the Emerging Powers 43 A Multipolar Global Economy: Inherently More Fragile? 46 The Governance Gap 48 Governance Starts at Home: Risks and Opportunities 48 INCREASED FOCUS ON EQUALITY AND OPENNESS 53 NEW GOVERNMENTAL FORMS 54 A New Regional Order? 55 Global Multilateral Cooperation 55 The Potential for Increased Conflict 59 INTRASTATE CONFLICT: CONTINUED DECLINE 59 Interstate Conflict: Chances Rising 61 Wider Scope of Regional Instability 70 The Middle East: At a Tipping Point 70 South Asia: Shocks on the Horizon 75 East Asia: Multiple Strategic Futures 76 Europe: Transforming Itself 78 Sub-Saharan Africa: Turning a Corner by 2030? 79 Latin America: More Prosperous but Inherently Fragile 81 The Impact of New Technologies 83 Information Technologies 83 AUTOMATION AND MANUFACTURING TECHNOLOGIES 87 Resource Technologies 90 Health Technologies 95 The Role of the United States 98 Steady US Role 98 Multiple Potential Scenarios for the United States’ Global Role 101 Alternative Worlds 107 Stalled Engines 110 FUSION 116 Gini-out-of-the-Bottle 122 Nonstate World 128 Acknowledgements 134 GT2030 Blog References 137 Audience: Appropriate for anyone, from businesses to banks, government agencies to start-ups, the technology sector to the teaching sector, and more. Culture, Identity, Power, and Practice

Strengthen family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students’ education, more students succeed in school. Based on 30 years of research and fieldwork, this fourth edition of a bestseller provides tools and guidelines to use to develop more effective and equitable programs of family and community engagement. Written by a team of well-known experts, this foundational text demonstrates a proven approach to implement and sustain inclusive, goal-oriented programs. Readers will find: Many examples and vignettes Rubrics and checklists for implementation of plans CD-ROM complete with slides and notes for workshop presentations

Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€”which includes all primary caregiversâ€”are at the foundation of children’s well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child’s brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents’ lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents’ use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

In this book, Robert Beck proposes to read Luke-Acts from the perspective of its implied reader. In making this reader a gentle sympathetic to Judaism, like the “God-fearing” centurions inscribed in his text, Luke reverses the empire-critical narrative perspectives of Mark and Matthew. And yet he profoundly challenges imperial cultural values. Luke launches his double narrative with Jesus’ proclamation in the Nazareth synagogue. In lieu of the tradition of Ezra with its safeguarding customs, this programmatic announcement promises a path to the gentiles in the tradition of Third Isaiah, with both its releases and its risks. Luke shows a way for the outsider to enter into the traditions of Israel, and not replace them. This reading regards the full narrative sweep of Luke’s double work. It yields a fresh look at his Gospel, as well as the largely neglected narrative structure of Acts.

Addresses “the systematic development of skills in listening for and interpreting auditory information. Listening skills are a crucial but often-overlooked area of instruction for children who are visually impaired and may have multiple disabilities; they relate to the expanded core curriculum for students and are essential to literacy, independent travel, and sensory and cognitive development.”--AFB website.

This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC’s previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

An instant New York Times Bestseller! “Consider this another vaccine against disaster. Fortunately, this dose won’t cause a temporary fever—and it happens to be a rippling good read.” —Wired “This crisply written and well-paced book reads like an all-caps warning for a world shackled to the machines we carry in our pockets and place on our laps . . .” —The Washington Post From two former military officers and award-winning authors, a chillingly authentic geopolitical thriller that imagines a naval clash between the US and China in the South China Sea in 2034—and the path from there to a nightmarish global conflagration. On March 12, 2034, US Navy Commodore Sarah Hunt is on the bridge of her flagship, the guided missile destroyer USS John Paul Jones, conducting a routine freedom of navigation patrol in the South China Sea when her ship detects an unflagged trawler in clear distress, smoke billowing from its bridge. On that same day, US Marine aviator Major Chris “Wedge” Mitchell is flying an F35E Lightning over the Strait of Hormuz, testing a new stealth technology as he flirts with Iranian airspace. By the end of that day, Wedge will be an Iranian prisoner, and Sarah Hunt’s destroyer will lie at the bottom of the sea, sunk by the Chinese Navy. Iran and China have clearly coordinated their moves, which involve the use of powerful new forms of cyber weaponry that render US ships and planes defenseless. In a single day, America’s faith in its military’s strategic pre-eminence is in tatters. A new, terrifying era is at hand. So begins a disturbingly plausible work of speculative fiction, co-authored by an award-winning novelist and decorated Marine veteran and the former commander of NATO, a legendary admiral who has spent much of his career strategically outmaneuvering America’s most tenacious adversaries. Written with a powerful blend of geopolitical sophistication and human empathy, 2034 takes us inside the minds of a global cast of characters—Americans, Chinese, Iranians, Russians, Indians--as a series of arrogant miscalculations on all sides leads the world into an intensifying international storm. In the end, China and the United States will have paid a staggering cost, one that forever alters the global balance of power. Everything in 2034 is an imaginative extrapolation from present-day facts on the ground combined with the authors’ years working at the highest and most classified levels of national security. Sometimes it takes a brilliant work of fiction to illuminate the most dire of warnings: 2034 is all too close at hand, and this cautionary tale presents the reader a dark yet possible future that we must do all we can to avoid.

Despite many education reform efforts, African American children remain the most miseducated students in the United States. To help you mend this critical problem, this collection of original, adapted, and previously published articles provides examples of research-based practices and programs that successfully teach African American students to read. Thoughtful commentary on historic and current issues, discussion of research-based best practices, and examples of culturally appropriate instruction help you examine the role of education, identify best practices, consider the significance of culture in the teaching-learning process, and investigate some difficult issues of assessment.

How the United States Abandoned Peace and Reinvented War

“The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come.” -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world’s future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow’s world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

NEW YORK TIMES BESTSELLER • Finalist for the PEN/USA Award in Creative Nonfiction, the Thurber Prize for American Humor, and the Audie Award in Biography/Memoir This Random House Reader’s Circle edition includes a reading group guide and a conversation between Firoozeh Dumas and Khaled Hosseini, author of *The Kite Runner*! “Remarkable . . . told with wry humor shorn of sentimentality . . . In the end, what sticks with the reader is an exuberant immigrant embrace of America.”—San Francisco Chronicle In 1972, when she was seven, Firoozeh Dumas and her family moved from Iran to Southern California, arriving with no firsthand knowledge of this country beyond her father’s glowing memories of his graduate school years here. More family soon followed, and the clan has been here ever since. Funny in Farsi chronicles the American journey of Dumas’s wonderfully engaging family: her engineer father, a sweetly quixotic dreamer who first sought riches on Bowling for Dollars and in Las Vegas, and later lost his job during the Iranian revolution; her elegant mother, who never fully mastered English (nor cared to); her uncle, who combated the effects of American fast food with an army of miraculous American weight-loss gadgets; and Firoozeh herself, who as a girl changed her name to Julie, and who encountered a second wave of culture shock when she met and married a Frenchman, becoming part of a one-couple melting pot. In a series of deftly drawn scenes, we watch the family grapple with American English (hot dogs and hush puppies?—a complete mystery), American traditions (Thanksgiving turkey?—an even greater mystery, since it tastes like nothing), and American culture (Firoozeh’s parents laugh uproariously at Bob Hope on television, although they don’t get the jokes even when she translates them into Farsi). Above all, this is an unforgettable story of identity, discovery, and the power of family love. It is a book that will leave us all laughing—without an accent. Praise for *Funny in Farsi* “Heartfelt and hilarious—in any language.”—Glamour “A joyful success.”—Newsday “What’s charming beyond the humor of this memoir is that it remains affectionate even in the weakest, most tenuous moments for the culture. It’s the brilliance of true sophistication at work.”—Los Angeles Times Book Review “Often hilarious, always interesting . . . Like the movie *My Big Fat Greek Wedding*, this book describes with humor the intersection and overlapping of two cultures.”—The Providence Journal “A humorous and introspective chronicle of a life filled with love—of family, country, and heritage.”—Jimmy Carter “Delightfully refreshing.”—Milwaukee Journal Sentinel “[*Funny in Farsi*] brings us closer to discovering what it means to be an American.”—San Jose Mercury News

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule’s purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Before the Ever After

Adolescence“beginning with the onset of puberty and ending in the mid-20s”is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one’s developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence”rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish.

The future of the Taiwan Strait is more wide open than at any other time in recent decades. Tensions between China and Taiwan have eased since 2008. But the movement toward full rapprochement remains fragile. Whether the two sides of the Strait can sustain and expand a cooperative relationship after years of mutual distrust and fear is still uncertain. The waters of the Strait are uncharted, and each side worries about shoals beneath the surface. The current engagement between Beijing and Taipei may make possible a solution to their six-decade-long dispute. Whether, when, and how that might happen is, however, shrouded in doubt. China fears the island’s permanent separation, by way of either an overt move to de jure independence or continued refusal to unify with the mainland. Taiwan fears subordination to an authoritarian regime that does not have Taipei’s interests at heart. And the United States worries about the stability of the East Asian region. Richard Bush, who studied issues surrounding Taiwan during almost twenty years in the U.S. government, explains the current state of relations between China and Taiwan, providing the details of what led to the current situation. And he extrapolates on the likely future of cross-Strait relations. Bush also discusses America’s stake, analyzing possible ramifications for U.S. interests in the critically important East Asia region and recommends steps to protect those interests. “At the heart of the [Taiwan conundrum] is a question of definition. Does the dispute stem from the protracted division of the Chinese state after World War II, or does the Republic of China on Taiwan in some sense constitute a successor state of the old Republic of China (ROC), one on a par with the People’s Republic of China on the Chinese mainland? Whether and how the unification of the two entities might occur hinges on the answer. Indeed, I have argued that the core of the dispute between the two sides has been their disagreement over whether the Republic of China—or Taiwan—is a sovereign entity for purposes of cross-Strait relations. It follows that if unification is a real option, the two sides must form a political union that bridges the disagreement over the island’s legal status. Is that possible?”—from the Introduction

It’s called the “Gettysburg of the West,” the battle for control of Glorieta Pass, near Santa Fe. At stake is a route to Colorado’s gold and San Francisco’s unblockable sea coast, two goals that would give the Confederate States a vital edge. General H.H. Sibley’s Texas Confederates are opposed by a Union army under Colonel E.R.S. Canby. Before the war, Sibley and Canby were on the same side. Now there’s just no winning in this bloody battle between countrymen torn apart by money, politics, and geography. History will ignore the fate of Lieutenant Franklin of New York, Captain O’Brien of the Colorado Volunteers, Jamie Russell of San Antonio, and Miss Laura Howland, recently arrived from Boston. They will be utterly changed, however, in the cauldron of battle where the fate of Glorieta Pass—and hundreds of lives—is decided.

NATIONAL BESTSELLER • PEN/HEMINGWAY AWARD WINNER • One of The New York Times 10 Best Books of the Year • A wondrous and shattering novel that follows twelve characters from Native communities: all traveling to the Big Oakland Powwow, all connected to one another in ways they may not yet realize. Among them is Jacque Red Feather, newly sober and trying to make it back to the family she left behind. Dene Oxendene, pulling his life together after his uncle’s death and working at the powwow to honor his memory. Fourteen-year-old Orvil, coming to perform traditional dance for the very first time. Together, this chorus of voices tells of the plight of the urban Native American—grappling with a complex and painful history, with an inheritance of beauty and spirituality, with communion and sacrifice and heroism. Hailed as an instant classic, There There is at once poignant and unflinching, utterly contemporary and truly unforgettable.

ZJ’s friends Ollie, Darry and Daniel help him cope when his father, a beloved professional football player, suffers severe headaches and memory loss that spell the end of his career.

This reference work examines how sophisticated cyber-attacks and innovative use of social media have changed conflict in the digital realm, while new military technologies such as drones and robotic weaponry continue to have an impact on modern warfare. • Provides fascinating information about cyber weapons that effectively strike through cyberspace to weaken and even cripple its target • Demonstrates how social media is employed in conflicts in innovative ways, including communication, propaganda, and psychological warfare • Explores potential technology avenues related to ensuring the continued military advantages of the United States • Identifies and describes nuclear, precision, and other technological capabilities that have historically been the preserve of superpowers but have been newly acquired by various states

The basis of this book is my initial introduction into combat in Vietnam as a 1st Lieutenant with the Vietnamese Ranger infantry. I was the Deputy Senior Advisor to the Vietnamese 52d Ranger Battalion located at Xuan Loc, Long Khanh Province, III Corps, South Vietnam. The book is 95 percent fact and 5 percent speculation regarding a major action the battalion fought in June of 1967 near the Dong Ngai River, War Zone D. The action begins with a Viet Cong (VC) soldier surrendering to U.S. elements in Long Khanh. He related that a VC company was building a base camp near the Dong Ngai along a stream named Suoi Long. The intelligence led the commanding general of the 18th ARVN Division to assign the task of finding and destroying the camp to the 52d Rangers. The Rangers deployed in less than 24 hours from initial notification to a Landing Zone approximately 2½ kilometers from the reported base camp. The Rangers were immediately engaged and ambushed by a full strength Main Force VC battalion backed by an entire VC regiment, which quickly engaged the trapped Rangers that night and early morning. No U.S. support was available other than long range artillery. In desperation, the Ranger battalion commander, the following morning at dawn, ordered a covering assault into the attacking VC by one company to be followed by a withdrawal under pressure of the remainder of the battalion aided by more than 72 tactical airstrikes within a 45 minute period. As I regrouped into our new perimeter at around 10 a.m., I counted a total of 32 Rangers left from an original assault force of 450. During the Christmas period in December 1967, a number of Ranger prisoners held by the VC during this action were released back to our control as a good will gesture. During the debrief of the ex-POWs, they independently related that they were told by their captors that the entire action was planned at the highest level in order to trap and destroy a major South Vietnamese unit. We had no reason to doubt the authenticity of the report and this book is based on the supposition that it is true. The character of Hu, the informant, and his actions are real. The death of Gen Do, COSVN commander, and the effect of the B-52 Arc Light strike with subsequent movement into Laos, is as the former POWs related to us. The portrayal of Do and his planning briefings are conjecture. The remainder of the description is as I saw the action, the players, and the effects. For this action, the 52d Ranger Battalion was awarded a second U.S. Presidential Unit Citation, one of the very few Vietnamese units to garner two of the highest awards the U.S. can proffer upon a military unit, U.S. or foreign.

"If a historian were allowed but one book on the American involvement in Vietnam, this would be it." — Foreign Affairs When first published in 1979, four years after the end of one of the most divisive conflicts in the United States, The Irony of Vietnam raised eyebrows. Most students of the war argued that the United States had "stumbled into a quagmire in Vietnam through hubris and miscalculation," as the New York Times’s Fox Butterfield put it. But the perspective of time and the opening of documentary sources, including the Pentagon Papers, had allowed Gelb and Betts to probe deep into the decisionmaking leading to escalation of military action in Vietnam. The failure of Vietnam could be laid at the door of American foreign policy, they said, but the decisions that led to the failure were made by presidents aware of the risks, clear about their aims, knowledgeable about the weaknesses of their allies, and under no illusion about the outcome. The book offers a picture of a steely resolve in government circles that, while useful in creating consensus, did not allow for alternative perspectives. In the years since its publication, The Irony of Vietnam has come to be considered the seminal work on the Vietnam War.

Teaching History with Museums, Second Edition provides an introduction and overview of the rich pedagogical power of museums and historic sites. With a collection of practical strategies and case studies, the authors provide educators with the tools needed to create successful learning experiences for students. The cases are designed to be adapted to any classroom, encouraging students to consider museums as historical accounts to be examined, questioned, and discussed. Key updates to this revised edition and chapter features include: New Chapter 9 captures the importance of art museums when teaching about the past. Updated Chapter 10 addresses issues of technology, focused on visitors’ experiences in both physical and virtual museums. New coverage of smaller, lesser known museums to allow readers to adapt cases to any of their own local sites. Specific pre-visit, during visit, and post-visit activities for students at each museum. Case reflections analyzing pitfalls and possibilities that can be applied more broadly to similar museums. A listing of resources unique to the museum and history content for each chapter. With this valuable textbook, educators will learn how to promote instruction in support of rigorous inquiry into the past and the goals of democratic values of tolerance and citizenship in the present.

"[A] brilliant new book . . . Humane provides a powerful intellectual history of the American way of war. It is a bold departure from decades of historiography dominated by interventionist bromides." —Jackson Lears, The New York Review of Books A prominent historian exposes the dark side of making war more humane In the years since 9/11, we have entered an age of endless war. With little debate or discussion, the United States carries out military operations around the globe. It hardly matters who’s president or whether liberals or conservatives operate the levers of power. The United States exercises dominion everywhere. In Humane: How the United States Abandoned Peace and Reinvented War, Samuel Moyn asks a troubling but urgent question: What if efforts to make war more ethical—to ban torture and limit civilian casualties—have only shored up the military enterprise and made it sturdier? To advance this case, Moyn looks back at a century and a half of passionate arguments about the ethics of using force. In the nineteenth century, the founders of the Red Cross struggled mightily to make war less lethal even as they acknowledged its inevitability. Leo Tolstoy prominently opposed their efforts, reasoning that war needed to be abolished, not reformed—and over the subsequent century, a popular movement to abolish war flourished on both sides of the Atlantic. Eventually, however, reformers shifted their attention from opposing the crime of war to opposing war crimes, with fateful consequences. The ramifications of this shift became apparent in the post-9/11 era. By that time, the US military had embraced the agenda of humane war, driven both by the availability of precision weaponry and the need to protect its image. The battle shifted from the streets to the courtroom, where the tactics of the war on terror were litigated but its foundational assumptions went without serious challenge. These trends only accelerated during the Obama and Trump presidencies. Even as the two administrations spoke of American power and morality in radically different tones, they ushered in the second decade of the “forever” war. Humane is the story of how America went off to fight and never came back, and how armed combat was transformed from an imperfect tool for resolving disputes into an integral component of the modern condition. As American wars have become more humane, they have also become endless. This provocative book argues that this development might not represent progress at all.

In this much needed resource, Maryellen Weimer—one of the nation’s most highly regarded authorities on effective college teaching—offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. Learner-Centered Teaching shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

A tour de force from acclaimed author Alan Gratz (Prisoner B-3087), this timely -- and timeless -- novel tells the powerful story of three different children seeking refuge. A New York Times bestseller!JOSEF is a Jewish boy living in 1930s Nazi Germany. With the threat of concentration camps looming, he and his family board a ship bound for the other side of the world . . . ISABEL is a Cuban girl in 1994. With riots and unrest plaguing her country, she and her family set out on a raft, hoping to find safety in America . . . MAHMOUD is a Syrian boy in 2015. With his homeland torn apart by violence and destruction, he and his family begin a long trek toward Europe . . . All three kids go on harrowing journeys in search of refuge. All will face unimaginable dangers -- from drownings to bombings to betrayals. But there is always the hope of tomorrow. And although Josef, Isabel, and Mahmoud are separated by continents and decades, shocking connections will tie their stories together in the end.This action-packed novel tackles topics both timely and timeless: courage, survival, and the quest for home.

A totalitarian regime has ordered all books to be destroyed, but one of the book burners suddenly realizes their merit.

Your essential guide to reading tarot cards seamlessly--with confidence and ease Each of us holds gifts deep within and, with tarot, we have the power to unlock those gifts and make transformative discoveries. For beginner tarot readers, learning the cards--all 78 of them--and understanding how to use spreads may seem daunting. Tarot expert Stefanie Caponi explains that interpreting the cards is a blend of knowing the card meanings, listening to your heart, and trusting your intuition. In her book, Guided Tarot,she offers easy exercises to nurture and grow your intuition, not only to understand the cards’ universal meanings, but to channel your own meanings. This comprehensive guide also shows you how to attune your energy to the deck for more accurate readings. Soon you’ll be confident in doing readings for yourself and even your friends. Guided Tarot features: □ Guided exercises to strengthen your intuition and tarot interpretation skills. □ Tarot card profiles with astrological, numerological, and elemental meanings, guidance for career, love, and spiritual life, and reverse card interpretations. □ Beginner’s tools offering step-by-step advice to prepare for and perform readings along with a variety of introductory spreads to try □ The Celtic Cross explained and deconstructed to help beginners master this popular spread with ease. □ Quick reference chart with card images and key upright and reversed meanings. With Guided Tarot as the companion to your deck, you’ll learn more about yourself, get divine guidance with life decisions, and overcome obstacles in your relationships--all while celebrating your unique gifts and honoring your higher self.
