This classic series of duets for like instruments is recognizable to nearly everyone who has ever studied an instrument. The wealth of material supplements musical development and provides a rich experience for growing musicians. Duet playing is often a student's first form of ensemble experience - technique, tone quality, intonation and balance are introduced as students do one of the things they enjoy most - making music with a friend. And duet playing leads easily and naturally to competent performance in larger ensembles. (Vol. I - Easy to Medium, Vol. 2 - Medium to Advanced)

There are many books written for the Piano, Violin, etc., entirely devoted to Technic. This Work is especially written to enable the Student, by practice and application, to overcome any obstacle which may occur in musical passages written for the Cornet. By controlling the Wind Power to play these Exercises as written, in one breath, the Student will acquire ENDURANCE without strain or injury. Train the Muscles which control the Lips, to make them elastic and strong, as only a slight pressure is necessary, and not brute force. The highest as well as the lowest notes can be played with equal tone quality if practiced according to the instructions that precede each Study. Every Cornet Player should have reached a degree of excellence before attempting to play these Exercises. To become an Expert on the Cornet, one should be familiar with as many Cornet Methods as possible, and so gain the experience of each. Every Exercise in this Book is possible, and not so very difficult if practiced slowly at first, and not too long at a time. I have used them for my daily practice for years, and they have been the means of my reaching the highest notes after playing a two-hour Concert, also of preserving my lips so that they never tire, and what has been a help to me is surely good for other Cornet Players. You cannot expect to attain the highest point of

excellence without hard work and perseverance. Never be perfectly satisfied with yourself. Try to make some improvement each day, feeling that it is a pleasure to have conquered that which seemed an impossibility at first. Do not neglect to correct immediately the least fault you make. Bad habits are easily formed, but are difficult to remedy. There are few Celebrated Cornet Soloists, although thousands play the instrument. Most players abuse their practicing by not knowing the proper way, and neglecting to pay more attention to the elementary work. These Studies have been found to be excellent for Clarinet Players as well as Cornet Players. The Clarinet being a Wind Instrument also, all these Exercises will appeal to the Player of that Instrument by following the same instructions.

A massive research effort by leading professional tubists in 36 countries presents a comprehensive picture of the tuba. The "baby" of the orchestra, the tuba was "born" in 1835. The first major solo compositions for the instrument appeared only in the 1950s, but in the next forty years the body of literature for the tuba increased at an amazing pace. The first several chapters of The Tuba Source Book identify that literature by ensemble type. They provide bibliographic data and descriptions of 1,900 pieces for tuba and keyboard, 234 for tuba and band, 1,056 for tuba ensemble, 106 for tuba and strings, and 258 for unaccompanied tuba, as well as hundreds of works in

other categories and 456 methods and studies. The chapter entitled "Recommended Basic Repertoire" is subdivided by level, from high school through professional, and "Orchestral Excerpts," in addition to listing 146 works that every tubist should know, includes advice on how to audition. The Tuba Source Book also offers an extensive discography (400 entries), a very complete bibliography, biographies of professional tubists, career advice, guidelines for composing and arranging music for the tuba, and lists of instrument builders and sources of tuba equipment. This encyclopedic volume fills a need for tubists at all levels of study and accomplishment. It is invaluable for composers, music educators, conductors, administrators, librarians, historians, and everyone who enjoys the art of tuba performance.
