By his early thirties, Paul Allen was a world-famous billionaire-and that was just the beginning. In 2007 and 2008, Time named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and intellectual rigor-combined with the resources to launch and support new initiatives-have literally changed the world. In 2009 Allen discovered that he had lymphoma, lending

urgency to his desire to share his story for the first time. In this classic memoir, Allen explains how he has solved problems, what he's learned from his many endeavors-both the triumphs and the failures-and his compelling vision for the future. He reflects candidly on an extraordinary life. The book also features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With honesty, humor, and insight, Allen tells the story of a life of ideas made real.

This timeless classic is an exciting true story of survival against all odds.

Completely revised and updated to address changes in technology, this new edition is the definitive guide to the art and science of sailing. Since the publication of the widely hailed first edition in 1983, The Annapolis Book of Seamanship has set the standard by which other books on sailing are measured. Used throughout America as a textbook in sailing schools and Power Squadrons, The Annapolis Book of Seamanship thoroughly and clearly covers the fundamental

and advanced skills of modern sailing. This edition of Annapolis is a major overhaul. Over half the book has been revised; old topics and features have been updated, and many new ones have been introduced. The design has been modernized, and many color illustrations have been added. As big and detailed as Annapolis is, the wealth of technical information (including dozens of step-by-step instructions) is presented here in a way that is uniquely readable; it's both useful and easy to use. This is because John Rousmaniere and artist Mark Smith bring to Annapolis decades

of experience both as sailors and as professional communicators. Annapolis emphasizes the standard skills and proven methods that eliminate error and confusion, ensure security in emergencies, and allow every sailor more time for enjoyment on the water. Much has changed on the water since 1983 when this book was originally published. Black buoys are now green, the Global Positioning Satellite navigation system (GPS) is almost universally used, new types of anchors and sails have appeared, safety skills and gear are vastly improved, many more women are commanding boats,

Among the innovations in this edition are: * Basic skills in early chapters: Fundamental sailing and boat-handling skills and gear, which are introduced in chapters 1, 2, and 3. * "Hands On" segments: Three dozen*

Serious Ocean. And be warned, you'll very likely want to sail with John, perhaps across an ocean." -- DALLAS MURPHY, AUTHOR OF ROUNDING THE HORN After sailing 300,000 miles and weathering dozens of storms in all the world's oceans, John Kretschmer has plenty of stories and advice to share. John's offshore training passages sell out a year in advance and his entertaining presentations are popular at boat shows and yacht clubs all over the English speaking world. John's talent for storytelling enchants his audience as it soaks up the lessons he learned during his oftenchallenging voyages.

Now you can take a seat next to John--at a lesser cost--and get the knowledge you need to fulfill your own dream of blue-water adventure. In *Sailing a Serious Ocean*, John tells you what to expect when sailing the oceans and shows how to sail safely across them. His tales of storm encounters and other examples of extreme seamanship will help you prepare for your journey and give you confidence to handle any situation—even heavy weather. Through his personal stories, John will guide you through the whole process of choosing the right boat, outfitting with the right gear, planning your route,

navigating the ocean, and understanding the nuances of life at sea. Our oceans are beautiful yet unpredictable—water that is at one moment a natural mirror for the glowing sun can turn into a foamy, raging wall of fury. John knows our oceans, and he is one of the best teachers of taming and enjoying them. Before you set off across the big blue, turn to John for his inspirational stories and hard-learned advice and discover the serious sailor in you. Lin and Larry Pardey have now been cruising on board their own boats, racing, delivering, and repairing other people's boats for more

than 44 years. After west-to-east and east-to-west circumnavigations, and voyages to more than 75 countries, they have a breadth of knowledge that few other boating authors possess. Most of the voyaging has been done on an earn-as-you-go budget that could be well within the reach of the majority of those whose dream is to set sail. Their motto? "Go small, go simple, but go now!" The Pardeys' strengths are neatly symbolized by the boats they have built. Each one is romantically traditional, with swooping sheerlines, and is completely dependent on the wind. And yet each boat

carries the best, strongest, and most seamanlike gear. Like their vessels, the Pardeys' writings are founded on a marriage of the spirit of romantic adventure and the practical, up-to-date seamanship that keeps them and their boats safe. This revised and expanded third edition of a cruising classic includes 10 completely new chapters with such advice as: sixteen ways to encourage your lover (partner) to share your dream; strategies for turning sudden engine failure into a minor incident; choosing safety equipment; repairing rigging at sea. All of the original chapters have been updated to ensure that

the information will be helpful for everyone who dreams of cruising—whether now or soon. The Capable Cruiser is a logical extension of the Pardeys' The Self-Sufficient Sailor, with more emphasis on seamanship underway, including careful analysis of extreme anchoring situations and solutions for mitigating them. Underlying each and every chapter is the warmth and encouragement that spurred Herb McCormick, former editor of Cruising World magazine, to label Lin and Larry Pardey "the enablers."

thousands of miles from land. To dip into the pages of "The Hal Roth Seafaring Trilogy" is to throw open the doors and windows of your imagination on a vast, wild seascape, where any adventure is possible. Hal Roth is the Homer of our generation, a wandering storyteller who for years has sailed distant oceans in small boats. The tales he brings back are all the more incredible because they are true, and three of his all-time classics are gathered here, for the first time, between one set of covers. A journalist before he was a voyager, Roth combines a journalist's powers of

observation and flinty realism with the poetic insights of a long-distance sailor and a graceful phrasing all his own. His utterly distinctive voice can be confused with no other nautical storyteller. He hides vast stores of seagoing knowledge in simple descriptions. Sailors are advised to read each story twice: first for the pleasure of a great adventure, then for a wealth of insights on overcoming adversity at sea. In "Two on a Big Ocean," we accompany Hal and his wife, Margaret, on their first major sea trek from San Francisco to Japan by way of the South

Pacific islands, and back via the Aleutians, Alaska, and Canada. Hal's flowing narrative and vivid photographs reveal the many ways in which this dream passage became a voyage of discovery. The two sailors learned to cope with everything from equipping their 35-foot sloop "Whisper" for a voyage of nineteen months to the perils of scalpel-sharp coral reefs and opaque fog. Roth's gritty, authentic narrative underscores his singular ability to explore the quintessential aspects of the human condition as revealed in a small boat at sea. Not content with surviving and

thriving through 19,000 unpredictable miles at sea, Hal and Margaret decided to test their mettle against the most daunting stretch of water any sailor can face. "Two Against Cape Horn" tells two stories: a delightful tale of the couple's pioneering cruise down the Chilean coast, followed by a harrowing account of turmoil, shipwreck, and recovery in savage, storm-tossed seas. In "The Longest Race," Hal delivers a taut, crisply written account of the greatest sea adventure ever undertaken: the first solo, nonstop race around the world in small sailboats. Of the nine men who

undertook the challenge, only one would finish; all the others would drop out--or worse. Drawing from the sailors' firsthand accounts and his own understanding gained as a contestant in two later round-the-world solo races, Hal zeroes in on the essence of this competition: the ability to withstand a barrage of physical, mental, and emotional rigors over hundreds of days alone at sea. Here are three classic tales of crossing huge oceans in small boats, three irresistible invitations to escape a winter night or a fogbound anchorage for the wild heart of a distant sea. Hal

Roth and his wife, Margaret, have crossed all of the world's oceans and sailed to a thousand foreign ports. Hal has also raced twice around the world single-handed in the BOC Challenges of 1986-87 and 1990-91. A magazine writer and photographer (over 400 articles), Hal has written eight books about his adventures and two how-to books, including "How to Sail Around the World," also available from International Marine. Big adventures on the high seas--from one of the greatest seafaring writers of our age Hal Roth's vivid, authentic tales of the sea have riveted readers

around the world for forty years. Here, in one volume, are three of his classic sea stories, each one a white-knuckled, rail-down voyage into the unknown. A hard-working San Francisco husband and wife abandon their jobs, their security, and, some would say, their sanity to sail their 35-foot sloop to Japan and back--the long way! Over the next nineteen months, they discover exotic islands, fascinating people, and a whole new way of life. A few years later these intrepid voyagers decide to try their luck against Cape Horn, but they will need a lot more than luck to survive the vicious

storms, violent seas, and perilous shores of the world's most dangerous stretch of water. Then nine courageous sailors accept a challenge to do what has never been done before: to race alone, in a small sailboat, around the world--nonstop. Only one will complete the race; seven will be forced to withdraw, and one will simply disappear. SILVER "One of the more momentous books of the decade." —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can

distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the “prediction paradox”: The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek

truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the

competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate

Valerie's voice is as sweet as honey. She's the obvious choice to star in the Nativity. But this is Mississippi, 1964, and Valerie is the first black student to attend her school. Alice is torn between standing up for Valerie and being popular with the in-crowd. It takes a tragedy for Alice to find the courage to act. A truly resonant story about racism and doing the right thing, based on the author's own experiences. With internet links to recommended websites about the American Civil Rights Movement. the late 1970s, sudden brutal shark attacks began occurring. The attacks were so brutal, that the victim's bodies, if located, were stripped of all flesh and blood products down to the pulverizing of the victim's bones to get to the marrow. Meanwhile, many black, tannin-stained teeth are found washing up on nearby beaches. The Navy decides to remove a limestone mound found during a dredging operation and
