

Handbook Of Interpersonal Communication Hb

First published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

This book, Applied Social Sciences: Communication Studies, is a collection of essays specific to the field of Verbal and Non-verbal Communication. It contains essays on the role of communication in the academic library (interculturality), IT (collaborative web, digitalisation), literary fiction (folktale, Romanian drama), management (conflict management, election campaign discourse, public relations, terrorism risk), marketing (advertising, brand, cultural events), mass-media (censorship, glossies, image fabrication, journalistic approach, manipulation, media events, metaphorisation of discourse, news, public opinion, public space, television), organisations (cyberspace), and sports (volleyball). This book will appeal to professionals working in the fields of community college teaching, corporate communications, entertainment, human resources, journalism, management, marketing, media literacy, media management and media criticism, non-profit work, PhD work in communication, public relations, strategic planning, and training and consulting. The types of academic readership it will appeal to include: researchers, students, teacher trainers, and teachers of all subjects and of all levels, who want to develop personally and professionally.

This book provides the tools needed to assess, monitor and evaluate the change and progress made by criminal justice clients at the beginning, during and after treatment

The Routledge Handbook of Health Communication brings together the current body of scholarly work in health communication. With its expansive scope, it offers an introduction for those new to this area, summarizes work for those already learned in the area, and suggests avenues for future research on the relationships between communicative processes and health/health care delivery. This second edition of the Handbook has been organized to reflect the goals of health communication: understanding to make informed decisions and to promote formal and informal systems of care linked to health and well-being. It emphasizes work in such areas as barriers to disclosure in family conversations and medical interactions, access to popular media and advertising, and individual searches online for information and support to guide decisions and behaviors with health consequences. This edition also adds an overview of methods used in health communication and the unique challenges facing health communication researchers applying traditional methods to efforts to gain reliable and valid evidence about the role of communication for health. It introduces the promise of translational research being conducted by health communication researchers from multiple disciplines to form transdisciplinary theories and teams to increase the well-being of not only humans but the systems of care within their nations. Arguably the most comprehensive scholarly resource available for study in this area, the Routledge Handbook of Health Communication serves an invaluable role and reference for students, researchers, and scholars doing work in health communication.

Communication Yearbooks Vols 6-33 Set

Theory and Research

The SAGE Handbook of Organizational Communication

Handbook of Relationship Marketing

Communication and Group Decision Making

Interpersonal Communication

Comparison of objects, events, and situations is integral to judgment; comparisons of the self with other people comprise one of the building blocks of human conduct and experience. After four decades of research, the topic of social comparison is more popular than ever. In this timely handbook a distinguished roster of researchers and theoreticians describe where the field has been since its development in the early 1950s and where it is likely to go next.

This volume is a comprehensive roadmap to the burgeoning area of affective sciences, which now spans several disciplines. The Handbook brings together, for the first time, the various strands of inquiry and latest research in the scientific study of the relationship between the mechanisms of the brain and the psychology of mind. In recent years, scientists have made considerable advances in understanding how brain processes shape emotions and are changed by human emotion. Drawing on a wide range of neuroimaging techniques, neuropsychological assessment, and clinical research, scientists are beginning to understand the biological mechanisms for emotions. As a result, researchers are gaining insight into such compelling questions as: How do people experience life emotionally? Why do people respond so differently to the same experiences?

What can the face tell us about internal states? How does emotion in significant social relationships influence health? Are there basic emotions common to all humans? This volume brings together the most eminent scholars in the field to present, in sixty original chapters, the latest research and theories in the field. The book is divided into ten sections: Neuroscience; Autonomic Psychophysiology; Genetics and Development; Expression; Components of Emotion; Personality; Emotion and Social Processes; Adaptation, Culture, and Evolution; Emotion and Psychopathology; and Emotion and Health. This major new volume will be an invaluable resource for researchers that will define affective sciences for the next decade.

Annotation As businesses increasingly stress the importance of cooperation and collaboration with suppliers and customers, relationship marketing is emerging as the `core' of all marketing activity. In recent years, there has been an explosive growth in business and academic interest in relationship marketing, yet no comprehensive book has been available to present key concepts, theories, and applications. The editors of this volume have assembled an authoritative and global cast of chapter contributors and crafted a volume that will become the seminal, founding work in this growing field. Their approach is eclectic, including a broad coverage of topics, diverse theoretical and conceptual paradigms, and global viewpoints.

Communication Yearbook 12

Frontiers of Theory and Research

Interpersonal relationships are the core of our societal system and have been since before the dawn of civilization. In today's world, friends, lovers, companions, and confidants make valuable contributions to our everyday lives. These are the relationships whose members are not automatically participants as a result of their birth and kin affiliations. The focus is on these relationships that must be forged from the sometimes indifferent, and sometimes hostile world. Yet, there is still much that is not known about how these relationships evolve, how partners communicate in on-going relationships, how people keep their relationships together, and how they cope when they fall apart. Primary to the focus of this book is the underlying theme of evolving interpersonal relationships from the initial encounter to the mature alliance. The contributors to this volume provide a contemporary perspective for the study of interpersonal relationships. Fresh areas of scholarly inquiry are presented and existing approaches are re-examined. Research in the introductory chapters breaks new ground, and appraises the ultimate question of what impact initial interactions have on further relational development. The mid-section of the volume concerns communication issues that confront the members of a relationship in process, focusing on how conflict and jealousy are communicated to a relational partner. This research considers relational development as well as obstacles and barriers to evolving relationships. The concluding chapters probe the question: Ultimately do all good things have to come to an end? Employing innovative techniques to examine maturing and disengaging relationships, the research presented here focuses on how interpersonal relationships become committed and mature.

This book discusses how people go about achieving their social goals through human symbolic interaction. The editors' collective presumption is that there are more or less typical ways that people attempt to obtain desired outcomes -- be they persuasive, informative, conflictive, or the like -- through communication. Representing a first summary of research done by scholars, primarily in the communication discipline, this volume seeks to identify and understand how it is that people achieve what they want through social interaction. Under the very broad label of strategies, this research has sought to: * identify critical social goals such as gaining compliance, generating affinity, resolving social conflict, and offering information; * specify, for each goal, the ways, or strategies, by which people can go about achieving these goals; * determine predictors of strategy selection -- that is, why does a person opt for one strategy over others to obtain the desired end? The research also reflects the attention the field of communication has given to strategy issues in the past 15 years. The chapters describe research on the ways in which people achieve different goals, and summarize existing research and theory on the attainment of social goals. Readers will gain insight into many of the issues that exist regardless of the strategy being discussed. Thus, this volume may not include chapters on topics such as ways people elicit or offer disclosure, ways people demonstrate anger, or ways people create guilt, but the issues that appear consistently throughout the various chapters should apply equally to these. Finally, the essays in this volume provide not only a summary of what has been accomplished to date, but also an initial theoretic map for future research concerning strategic interpersonal communication.

The Dark Side of Interpersonal Communication examines the multifunctional ways in which seemingly productive communication can be destructive and vice versa and explores the many ways in which dysfunctional interpersonal communication operates across a variety of personal relationship contexts. This second edition of Brian Spitzberg and William Cupach's classic volume presents new chapters and topics, along with updates of several chapters in the earlier edition, all in the context of surveying the scholarly landscape for new and important avenues of investigation. Offering much new content, this volume features internationally renowned scholars addressing such compelling topics

as uncertainty and secrecy in relationships; the role of negotiating self in cyberspace; criticism and complaints; teasing and bullying; infidelity and relational transgressions; revenge; and adolescent physical aggression toward parents. The chapters are organized thematically and offer a range of perspectives from both junior scholars and seasoned academics. By posing questions at the micro and macro levels, *The Dark Side of Interpersonal Communication* draws closer to a perspective in which the darker sides and brighter sides of human experience are better integrated in theory and research. Appropriate for scholars, practitioners, and students in communication, social psychology, sociology, counseling, conflict, personal relationships, and related areas, this book is also useful as a text in graduate courses on interpersonal communication, ethics, and other special topics.

Communities are composed of connected individuals. The communication that exists within, about, and between these communities is at the heart of *Communication Yearbook 28*. This book draws from the broad range encompassed by the communication discipline to review literature that has something to say about community and what the communication discipline has to contribute to understanding this human connection. Offering state-of-the-art research, *Communication Yearbook 28* presents: *an influence model addressing the most basic level of community--the personal relationship; *the literature on romantic and parent-child relationships at a distance; *community in terms of those working at home and telecommuting, running home-based businesses, and participating in online communities; *the communicative venue for community building and fragmentation; *social capital and tolerance; *the literature on collaboration, examining this communicative performance in community groups; *community as a foundation for the study of public relations theory and practice; *the visual images of community and what they suggest about these communities to those looking in from the outside; *the role new technology plays in maintaining community; and *community contexts. This book is an important reference on current research for scholars and students in the social sciences.

Strategic Interpersonal Communication

Language, Communication, and Intergroup Relations

The SAGE Handbook of Media Processes and Effects

Mediated Interpersonal Communication

The Third Edition of the Handbook of Interpersonal Communication includes eight new chapters and eleven revised from the second edition. Following an introductory chapter, the volume is organized into four parts covering perspectives on inquiry in interpersonal communication, fundamental units of interpersonal communication, processes and functions, and interpersonal contexts. Features include: · Each chapter reviews and updates research in its respective area · Part II examines methodological issues in the field · Includes articles by top scholars in the field of Interpersonal Communication

Reflecting advances in theory, research, and application in the discipline since the publication of the Handbook of Public Relations in 2001, this new volume is global in scope and unmatched in its coverage of both academic research and professional best practice. It presents major theories in the words of the leading advocates for each theory; positions public relations as a positive force to help make society more fully functional; and challenges academics and practitioners to identify best practices that can inform the work of those in the profession.

This volume on intraindividual processes is one of a set of four handbooks in the social psychology field and covers social cognition, attitudes, and attribution theory. Includes contributions by academics and other experts from around the world to ensure a truly international perspective. Provides a comprehensive overview of classic and current research and likely future trends. Fully referenced chapters and bibliographies allow easy access to further study. Now available in full text online via xreferplus, the award-winning reference library on the web from xrefer. For more information, visit www.xreferplus.com

The Routledge Handbook of Positive Communication

Language Structures and Social Interaction

Parents, Children, and Communication

Multidisciplinary Perspectives

A Narrative Approach to Achieving Productive Dialogue and Change

Clinical Handbook of Assessing and Treating Conduct Problems in Youth

Despite the importance of group communication processes, they remain elusive and difficult to understand, and the type of theory necessary to make sense of these processes differs from

those commonly found in the social sciences. This collection of essays advances a unique perspective on group decision-making which is complementary to approaches taken in management, psychology and sociology. As the new edition of this book demonstrates, a number of strong theoretical frameworks have developed over the past 15 years together with considerable empirical evidence. The essays are distinctive both in their explicit focus on communication processes and in their location in a unique intellectual tradition. As such the book serves

The study of media effects is one of the most central to the discipline of communication and encompasses a vast array of theoretical perspectives, methodological tools, and application to important social contexts. In light of this importance - as well as the rapid changes in the media environment that have occurred during the past 20 years - this Handbook of media effects theorizing and research explores where media effects research has been over the past several decades, and, equally important, where it would be most fruitful to go in the years ahead. In addition to providing a comprehensive framework for those interested in media effects, the Handbook also emphasizes the changing nature of the media landscape. Thus, new technologies not only provide new venues for research, but they also represent challenges to many existing media effects theories (that were formulated prior to the widespread adoption of the Internet). The contemporary diversity of the field and its research is seen in chapters addressing sociological, cultural, and organizational approaches and in chapters on specific approaches, domains, and context-related effects. Throughout the Handbook and within each chapter, authors address the following issues: (1) historical context on theory development/area of study; (2) theory explication and theoretical developments through to the present; (3) typical method of study/research approach/moderators; (4) conceptualization of the audience; (5) the impact of new media environments; (6) criticisms/controversies; and (7) directions for future research. Section I: Begins with an overview of the field, conceptualization of media effects, and the editors' goals for the volume and then focuses on the range of methodologies (both quantitative and qualitative methods) used in the study of media effects. Section II: Focuses on dominant theoretical approaches in the media effects area from a more societal perspective. Included here are some of the most dominant theoretical perspectives in the media effects realm (i.e., cultivation, agenda setting, framing) that relate to broad-reaching effects of both entertainment and news programming. The section then focuses on related theories that, though less developed, have received significant attention in the literature. To expand the horizon of this Handbook, a chapter on Cultural Studies is included to engage more qualitative views of media's societal effects. Section III: Focuses on issues of message selection and processing that are central to the mass media literature. These chapters cut across application contexts. For examples, the emotion chapter touches on entertainment, persuasion, and children's media; the Social Influence/Environmental Aspects chapter includes issues of co-viewing in families, among peers, etc. Section IV: Reflects a dominant trend in media effects literature - that related to persuasion and learning - and traces its theoretical perspectives (including major theories of persuasion and especially social cognitive theory) through the various contexts in which media have such effects, such as health, advertising, media literacy, and the like. Section V: Explores the contexts and audiences that have been traditional foci of media effects research - violence, children, body image, video games, sports, etc. In each chapter authors address the theories most applicable to those contexts, further expanding the theoretical offerings of this Handbook. The focus on how this sort of research is typically conducted methodologically and how it will need to change in light of new technologies and media advances make these chapters unique. Section VI: Expands on existing work by focusing on a concern central and unique to the communication discipline - message medium - and how it influences effects ranging from what messages are attended to (e.g., formal features), how we spend our time (e.g., displacement effects), and even how we think (e.g., medium theory).

Historically, the social aspects of language use have been considered the domain of social psychology, while the underlying psycholinguistic mechanisms have been the purview of cognitive psychology. Recently, it has become increasingly clear that these two dimensions are highly interrelated: cognitive mechanisms underlying speech production and comprehension interact with social psychological factors, such as beliefs about one's interlocutors and politeness norms, and with the dynamics of the conversation itself, to produce shared meaning. This realization has led to an exciting body of research integrating the social and cognitive dimensions which has greatly increased our understanding of human language use. Each chapter in this volume demonstrates how the theoretical approaches and research methods of social and cognitive psychology can be successfully interwoven to provide insight into one or more fundamental questions about the process of interpersonal communication. The topics under investigation include the nature and role of speaker intentions in the communicative process, the production and comprehension of indirect speech and figurative language, perspective-taking and conversational collaboration, and the relationships between language, cognition, culture, and social interaction. The book will be of interest to all those who study interpersonal language use: social and cognitive psychologists, theoretical and applied linguists, and communication researchers. Interpersonal communication is inexorable, irrevocable, complex and relative but ultimately necessary. Understanding this type of communication gives us a framework for successful and effective interaction with others in everyday situations. In this multivolume reference collection, subject specialists Mark L. Knapp and John A. Daly, explore the dimensions, dynamics and implications of interpersonal communication. Volume I covers the history and status of the field to various communicator characteristics ...

The Handbook of Global Health Communication

Handbook of Interpersonal Communication

Communication Yearbook 28

Conference Proceedings Trends in Business Communication 2020

The SAGE Handbook of Public Relations

The Dark Side of Interpersonal Communication

Handbook of Interpersonal CommunicationSAGE

International in scope, The Handbook of Global Health Communication offers a comprehensive and up-to-date analysis of the role of communication processes in global public health, development and social change Brings together 32 contributions from well-respected scholars and practitioners in the field, addressing a wide range of communication

approaches in current global health programs Offers an integrated view that links communication to the strengthening of health services, the involvement of affected communities in shaping health policies and improving care, and the empowerment of citizens in making decisions about health Adopts a broad understanding of communication that goes beyond conventional divisions between informational and participatory approaches

Communication Yearbook 31 continues the tradition of publishing rich, state-of-the-discipline literature reviews. This volume offers insightful descriptions of research as well as reflections on the implications of those findings for other areas of the discipline. Editor Christina S. Beck presents a diverse, international selection of articles that highlight empirical and theoretical intersections in the communication discipline. Chapters in this volume include reviews of literature on silence in dispute, communicating about cancer, interpersonal conflict, trauma, identity, work relationships, communication and community, and media content diversity. This volume will be valuable to scholars across the communication discipline. Communication Yearbook 31 will be particularly beneficial to scholars in the areas of interpersonal, health, organizational, family, and intercultural communication; language and social interaction, and media studies.

This revision of a classic volume presents state-of-the-art reviews of established and emerging areas of communication science and provides an intellectual compass that points the way to future theorizing about communication processes. In this Second Edition of The Handbook of Communication Science, editors Charles R. Berger, Michael E. Roloff, and David Roskos-Ewoldsen bring together an impressive array of communication scholars to explore and synthesize the varying perspectives and approaches within the dynamic field of communication science. After first addressing the methods of research and the history of the field, the Handbook then examines the levels of analysis in communication (individual to macro-social), the functions of communication (such as socialization and persuasion), and the contexts in which communication occurs (such as couples, families, organizations, and mass media). Key Features: Draws on the scholarship and expertise of leading communication scholars who explore different aspects of the field Covers all facets of communication science, from the historical and theoretical to the practical and applied Covers the latest theoretical developments in the field, as well as alternative methodologies and levels of analysis Explores key communication contexts of the 21st century, including interpersonal dimensions of health communication, the scientific investigation of marital and family communication, and computer-mediated communication Includes incisive analyses, literature reviews, bibliographies, and suggestions for future research The Handbook of Communication Science, Second Edition, is an essential reference resource for scholars, practitioners, and students. It is appropriate for upper-level undergraduate or graduate courses in Communication and Media Studies and Mass Communication.

Considering the Past, Contemplating the Future

Communication Yearbook 31

Evolving Interpersonal Relationships

Building Connections Together

The Handbook of Communication Science

Social and Cognitive Approaches to Interpersonal Communication

This volume is everything one would want from a one-volume handbook... Comprehensive in scope, authoritative, clearly written, and detailed... The volume is edited by two of the most prominent social psychologists in their own right, and the list of contributors is a veritable who's who of the discipline. No Library should be without this book' - "Choice " This is a comprehensive, scholarly, and up-to-date survey of the field of social psychology for the new millennium - a single 656 page Handbook containing 23 chapters by leading researchers from around the world. It is a state-of-the-art text with an eye to the future, in which rich integrative chapters are thorough analytic reviews. The chapters fall into five sections that reflect the scope of social psychology as a global scientific endeavour: history and nature of social psychology; individual processes, interpersonal processes; processes within groups, and intergroup processes and society. The book is edited by Michael A Hogg and Joel Cooper, with Dominic Abrams, Elliot Aronson and Shelley Taylor acting as advisory editors. The main features and benefits of this book include: single volume; international coverage of social psychology; international line-up of authors; basic and applied research are integrated within chapters, not exiled to the end of the book; traditional emphasis on individual and interpersonal processes is balanced with full emphasis on the study of group processes and intergroup relations; chapters on language and social psychology, culture and self.

The Handbook of Contemporary Families explores how families have changed in the last 30 years and speculates about future trends. Editors Marilyn Coleman and Lawrence H. Ganong, along with a multidisciplinary group of contributors, critique the approaches used to study relationships and families while suggesting modern approaches for the new millennium. The Handbook looks at how changes within the contemporary family have been reflected in family law, family education, and family therapy. The Handbook of Contemporary Families is an excellent resource for advanced undergraduate and graduate students, researchers, educators, and practitioners who study and work with families in several disciplines, including Family Science, Human Development and Family Studies, Sociology, Marriage & Family Therapy, and Social Work.

With applications ranging from conflict in one's own community to global conflict, Kellett and Dalton's textbook addresses the difficulties of managing conflict. The ideas in the book are based upon the authors' own tested methods and techniques.

Mediated interpersonal communication is one of the most dynamic areas in communication studies, reflecting how individuals utilize technology more and more often in their personal interactions. Organizations also rely increasingly on mediated interaction for their communications. Responding to this evolution in communication, this collection explores how existing and new personal communication technologies facilitate and change interpersonal interactions. Chapters offer in-depth examinations of mediated interpersonal communication in various contexts and applications. Contributions come from well-known scholars based around the world, reflecting the strong international interest and work in the area.

Advances in Theory, Research, and Methods

Interpersonal Communication: Forming and maintaining relationships

Handbook of Research on Discourse Behavior and Digital Communication: Language Structures and Social Interaction

The Sage Handbook of Social Psychology

Handbook of Social Comparison

Blackwell Handbook of Social Psychology

Conduct problems, particularly oppositional defiant disorder (ODD) and conduct disorder (CD), are the most common mental health problems affecting children and adolescents. The consequences to individuals, families, and schools may be severe and long-lasting. To ameliorate negative outcomes and ensure the most effective treatment for aggressive and antisocial youth, early diagnosis and evidence-based interventions are essential. Clinical Handbook of Assessing and Treating Conduct Problems in Youth provides readers with both a solid grounding in theory and a comprehensive examination of the evidence-based assessment strategies and therapeutic practices that can be used to treat a highly diverse population with a wide range of conduct problems. It provides professional readers with an array of evidence-based interventions, both universal and targeted, that can be implemented to improve behavioral and social outcomes in children and adolescents. This expertly written resource: Lays the foundation for understanding conduct problems in youth, including epidemiology, etiology, and biological, familial, and contextual risk factors. Details the assessment process, with in-depth attention to tools, strategies, and differential diagnosis. Reviews nine major treatment protocols, including Parent-Child Interaction Therapy (PCIT), multisystemic therapy (MST) for adolescents, school-based group approaches, residential treatment, and pharmacotherapy. Critiques the current generation of prevention programs for at-risk youth. Explores salient issues in working effectively with minority youth. Offers methods for evaluating intervention programs, starting with cost analysis. This volume serves as a one-stop reference for all professionals who seek a solid grounding in theory as well as those who need access to evidence-based assessment and therapies for conduct problems. It is a must-have volume for anyone working with at-risk children, including clinical child, school, and developmental psychologists; forensic psychologists; social workers; school counselors and allied professionals; and medical and psychiatric practitioners.

Providing a thorough review and synthesis of work on communication skills and skill enhancement, this Handbook serves as a comprehensive and contemporary survey of theory and research on social interaction skills. Editors John O. Greene and Brant R. Burleson have brought together preeminent researchers and writers to contribute to this volume, establishing a foundation on which future study and research will build. The handbook chapters are organized into five major units: general theoretical and methodological issues (models of skill acquisition, methods of skill assessment); fundamental interaction skills (both transfunctional and transcontextual); function-focused skills (informing, persuading, supporting); skills used in management of diverse personal relationships (friendships, romances, marriages); and skills used in varied venues of public and professional life (managing leading, teaching). Distinctive features of this handbook include: * broad, comprehensive treatment of work on social interaction skills and skill acquisition; * up-to-date reviews of research in each area; and * emphasis on empirically supported strategies for developing and enhancing specific skills. Researchers in communication studies, psychology, family studies, business management, and related areas will find this volume a comprehensive, authoritative source on communications skills and their enhancement, and it will be essential reading for scholars and students across the spectrum of disciplines studying social interaction.

The Routledge Handbook of Applied Communication Research provides a state-of-the-art review of communication scholarship that addresses real-world concerns, issues, and problems. This comprehensive examination of applied communication research, including its foundations, research methods employed, significant issues confronted, important contexts in which such research has been conducted, and overviews of some exemplary programs of applied communication research, shows how such research has and can make a difference in the world and in people's lives. The sections and chapters in this Handbook: explain what constitutes applied communication scholarship, encompassing a wide range of approaches and clarifying relationships among theoretical perspectives, methodological procedures, and applied practices demonstrate the breadth and depth of applied communication scholarship review and synthesize literature about applied communication areas and topics in coherent, innovative, and pedagogically sound ways set agendas for future applied communication scholarship. Unique to this volume are chapters presenting exemplary programs of applied communication research that demonstrate the principles and practices of such scholarship, written by the scholars who conducted the programs. As an impressive benchmark in the ongoing growth and development of communication scholarship, editors Lawrence R. Frey and Kenneth N. Cissna provide an exceptional resource that will help new and experienced scholars alike to understand, appreciate, and conduct high-quality communication research that can positively affect people's lives.

Language, Communication, and Intergroup Relations presents the current state of knowledge at the intersection of language, communication, and intergroup relations, drawing on interdisciplinary work from the fields of communication, social psychology, and sociolinguistics. Building from that existing work, it presents a series of provocative and innovative new directions in this area. The work is organized around a series of five themes: • Language and Culture • Intergroup Communication • Intergenerational Relations • Interpersonal Accommodation • Institutional Accommodation. Within each theme, prominent scholars present reviews of the literature, which are followed by responses, reactions, and extensions from a multidisciplinary group of researchers. These responses often move beyond typical academic prose and engage with the material in novel ways, including graphical theoretical models, short personal reflections, and creative prose. It is essential reading for students and academics in the interdisciplinary fields of communication, language, and social psychology.

The SAGE Handbook of Family Communication
Language and Communication in Old Age
Handbook of Contemporary Families
The SAGE Handbook of Interpersonal Communication
Handbook of Affective Sciences
Managing Conflict in a Negotiated World

The Communication Yearbook annuals originally published between 1977 and 2009 publish diverse, state-of-the-discipline literature reviews that advance knowledge and understanding of communication systems, processes, and impacts across the discipline. Topics dealt with include Communication as Process, Research Methodology in Communication, Communication Effects, Taxonomy of Communication and European Communication Theory, Information Systems Division, Mass Communication Research, Mapping the Domain of Intercultural Communication, Public Relations, Feminist Scholarship, Communication Law and Policy, Visual Communication, Communication and Cross-Sex Friendships Across the Life Cycle, Television Programming and Sex Stereotyping, InterCultural Communication Training, Leadership and Relationships, Media Performance Assessment, Cognitive Approaches to Communication.

Written in a conversational style for students living in today's world of ever-evolving media and new technology, this hands-on skills guide by Teri Kwal Gamble and Michael W. Gamble puts students at the center of interpersonal communication. To help them become better, more successful communicators, married author team Teri Kwal Gamble and Michael Gamble shed new light on the dynamics of students' everyday interactions and relationships, and give students the tools they need to develop and cultivate effective communication skills. Using an applied, case-study approach that draws from popular culture and students' own experiences, Gamble and Gamble go beyond skill building by encouraging readers to critically reflect on their own communication patterns and actively apply relevant theory to develop and maintain healthy relationships with family, friends, romantic partners, and co-workers. Designed to promote self-reflection and develop students' interpersonal communication skills, each chapter of this engaging text examines how media, technology, gender, and culture affect the dynamics of relationships and self-expression.

This is the first edited volume in the communication field to examine parent-child interaction. It creates a framework for future research in this growing area -- family communication, and more specifically, parent-child communication -- and also suggests new areas of communication research among parents and children -- cultural, work-related, taboo topics, family sex discussions, conflict, and abuse. Chapter authors provide thorough coverage of theoretical approaches, new methods, and emerging contexts including lesbian/gay parent-child relationships. In so doing, they bring a communication perspective to enduring problems of discipline, adolescent conflict, and physical child abuse. The text highlights various methodological approaches -- both quantitative and qualitative -- including conversation analysis, grounded theory, participant-observation, and phenomenological interviewing of children. It also introduces and surveys various theoretical approaches -- general systems, developmental, cultural, and intergenerational transmission.

The revised Fourth Edition of The SAGE Handbook of Interpersonal Communication delivers a clear, comprehensive, and exciting overview of the field of interpersonal communication. It offers graduate students and faculty an important, state-of-the-art reference work in which well-known experts summarize theory and current research. The editors also explore key issues in the field, including personal relationships, computer-mediated communication, language, personality, skills, nonverbal communication, and communication across a person's life span. This updated handbook covers a wide range of established and emerging topics, including: Biological and Physiological Processes Qualitative and Quantitative Methods for Studying Interpersonal Communication Interpersonal Communication in Work, Family, Intercultural, and Health Contexts Supportive and Divisive Transactions Social Networks Editors Mark L. Knapp and John A. Daly have significantly contributed to the field of interpersonal communication with this important reference work—a must-have for students and scholars.

Organizational communication as a field of study has grown tremendously over the past thirty years. This growth is characterized by the development and application of communication perspectives to research on complex organizations in rapidly changing environments. Completely re-conceptualized, The SAGE Handbook of Organizational Communication, Third Edition, is a landmark volume that weaves together the various threads of this interdisciplinary area of scholarship. This edition captures both the changing nature of the field, with its explosion of theoretical perspectives and research agendas, and the transformations that have occurred in organizational life with the emergence of new forms of work, globalization processes, and changing organizational forms. Exploring organizations as complex and dynamic, the Handbook brings a communication lens to bear on multiple organizing processes.

The Routledge Handbook of Positive Communication forms a comprehensive reference point for cross-disciplinary approaches to understanding the central role of communication in the construction of hedonic

and eudemonic happiness, or subjective and psychological well-being. Including contributions from internationally recognized authors in their respective fields, this reference uses as its focus five main scenarios where communication affects the life of individuals: mass and digital media, advertising and marketing communication, external and internal communication in companies and organizations, communication in education, and communication in daily life interactions.

A thorough exploration of the critical topics and issues facing family communication researchers today The Sage Handbook of Family Communication provides a comprehensive examination of family communication theory and research. Chapters by leading scholars in family communication expand the definition of family, address recent shifts in culture, and cover important new topics, including families in crisis, families and governmental policies, social media, and extended families. The combination of groundbreaking theories, research methods, and reviews of foundational and emerging research in family communication make this an invaluable resource that explores the critical topics and issues facing family communication researchers today.

The conference proceedings Trends in Business Communication 2020 presented here show a small selection of the wide range of current research topics in the field of marketing and communication. The spectrum of topics ranges from leadership communication, communication in agile organisations and tweeting CEOs to new developments in e-learning and current requirements for online shareholder meetings to sustainable consumer behaviour, communication in times of home office and new aspects of social media topics. All contributions were presented orally at the international online conference "Trends in Business Communication" on 4 December 2020, the full papers were subjected to a peer review process.
