Too many companies are managed not by leaders, but by mere role players and faceless bureaucrats. What does it take to be a real leader—one who is confident in who she is and what she stands for, and who truly inspires people to achieve extraordinary results? Rob Goffee and Gareth Jones argue that leaders don't become great by aspiring to a list of universal character traits. Rather, effective leaders are authentic: they deploy individual strengths to engage followers' hearts, minds, and souls. They are skillful at consistently being themselves, even as they alter their behaviors to respond effectively in changing contexts. In this lively and practical book, Goffee and Jones draw from extensive research to reveal how to hone and deploy one's unique leadership assets while managing the inherent tensions at the heart of successful leadership: showing emotion and withholding it, getting close to followers while keeping distance, and maintaining individuality while "conforming enough." Underscoring the social nature of leadership, the book also explores how leaders can remain attuned to the needs and expectations of followers. *Why Should Anyone Be Led By You?* will forever change how we view, develop, and practice the art of leadership, wherever we live and work.

Get your best work done, no matter where you do it. Video calls from your couch. Project reports in a coffee shop. Presentations at your kitchen table. Digital transformation is no longer news--it's a necessity. Despite the widespread threat of disruption, many large companies in traditional industries have succeeded at digitizing their businesses in truly transformative ways. The New York Times, formerly a bastion of traditional media, has created a thriving digital product behind a carefully designed paywall. Best Buy has transformed its business in the face of Amazon's threat. John Deere has formed a data-analysis arm to complement its farm-equipment business. And Goldman Sachs and many others are using digital technologies to reimagine their businesses. In *Driving Digital Strategy*, Harvard Business School professor Sunil Gupta provides an actionable framework for following their lead. For over a decade, Gupta has studied digital transformation at Fortune 500 companies. He knows what works and what doesn't. Merely dabbling in digital or launching a small independent unit, which many companies do, will not bring success. Instead you need to fundamentally change the core of your business and ensure that your digital strategy touches all aspects of your organization: your business model, value chain, customer relationships, and company culture. Gupta covers each aspect in vivid detail while providing navigation tips and best practices along the way. Filled with rich and illuminating case studies of companies at the forefront of

digital transformation, *Driving Digital Strategy* is the comprehensive guide you need to take full advantage of the limitless opportunities the digital age provides.

A Financial Times Best Business Book of the Year Named one of 10 Best New Management Books for 2022 by Thinkers50 "An advocate of sustainable capitalism explains how it's done" — The Economist "Polman's new book with the sustainable business expert Andrew Winston...argues that it's profitable to do business with the goal of making the world better." — The New York Times Named as recommended reading by Fortune's CEO Daily "...Polman has been one of the most significant chief executives of his era and that his approach to business and its role in society has been both valuable and path-breaking." — Financial Times The ex-Unilever CEO who increased his shareholders' returns by 300% while ensuring the company ranked #1 in the world for sustainability for eleven years running has, for the first time, revealed how to do it.

Teaming up with Andrew Winston, one of the world's most authoritative voices on corporate sustainability, Paul Polman shows business leaders how to take on humanity's greatest and most urgent challenges—climate change and inequality—and build a thriving business as a result. In this candid and straight-talking handbook, Polman and Winston reveal the secrets of Unilever's success and pull back the curtain on some of the world's most powerful c-suites. *Net Positive* boldly argues that the companies of the future will profit by fixing the world's problems, not creating them. Together the authors explode our most prevalent corporate myths: from the idea that business' only function is to maximise profits, to the naïve hope that Corporate Social Responsibility will save our species from disaster. These approaches, they argue, are destined for the graveyard. Instead, they show corporate leaders how to make their companies "Net Positive"—thriving by giving back more to the world than they take. Net Positive companies unleash innovation, build trust, attract the best people, thrill customers, and secure lasting success, all by helping create stronger, more inclusive societies and a healthier planet. Heal the world first, they argue, and you'll satisfy your investors as a result. With ambitious vision and compelling stories, *Net Positive* will teach you how to find the inner purpose and courage you need to embrace the only business model that will matter in the years ahead. You will learn how to lead others and unlock your company's soul, while setting and delivering big and aggressive goals, and taking responsibility for all of your company's impacts. You'll find out the secrets to partnering with others, including your competition and critics, to drive transformative change from which you will prosper. You'll build a company that serves your

people, your customers, your communities, your shareholders—and your children and grandchildren will thank you for it. Is this win-win for business and humanity too good to be true? Don't believe it. The world's smartest CEOs are already taking their companies on the Net Positive journey and benefitting as a result. Will you be left behind? Join the movement at netpositive.world

Driving Digital Strategy

From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. "Old power" is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. "New power" is made by many; it is open, participatory, often leaderless, and peer-driven. Like water or electricity, it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and #BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikelier victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions. In New Power, the business leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new world we live in--a world where connectivity has made change shocking and swift and a world in which everyone expects to participate. A data-driven assessment of what enables some companies to outperform over the long term in spite of comparable constraints analyzes the practices of thousands of high- and low-performing companies over a 45-year period to reveal unique thinking habits and counterintuitive strategies.

Put aside all the hypey new frameworks, the listicles, the "10 best things you need" to succeed as a leader today. The critical leadership practices--the ones that will allow a leader to make the biggest impact over time--are already well established. They're about how you relate to others. How you make difficult strategic choices. How you get results. How you scan the landscape around you, build a vision for the future, and inspire people to follow you. In fact, these fundamental skills are becoming more important today as organizations and teams become increasingly networked and fragmented and the nature of leadership hierarchies changes. What's hard is actually doing these things--and excelling at them. In this book, strategy and change experts Ron Ashkenas and Brook Manville distill the best proven ideas and frameworks about leadership from Harvard Business Review and from their careers in leadership development and transformation into a concise handbook that shows rising leaders how to have the most impact on their organizations. You'll learn how to build a unifying vision, set strategy, manage for results, hire and inspire great leaders and teams, drive innovation, and, finally, lead yourself on your own career journey. Each chapter of the book describes one of these six practices in depth, discussing the pitfalls that real leaders face and how to overcome them, with insights from well-known leaders such as Stanley McChrystal, Dominic Barton, Darren Walker, Jack Welch, and Ann Mulcahy. Each chapter also synthesizes the best Harvard Business Review thinking on the topic. This book gives you the tools you need to have more impact as a leader today, and into the future.

A Wall Street Journal Bestseller Named a Financial Times top title How to unleash "human magic" and achieve improbable results. Hubert Joly, former CEO of Best Buy and orchestrator of the retailer's spectacular turnaround, unveils his personal playbook for achieving extraordinary outcomes by putting people and purpose at the heart of business. Back in 2012, "Everyone thought we were going to die," says Joly. Eight years later, Best Buy was transformed as Joly and his team rebuilt the company into one of the nation's favorite employers, vastly increased customer satisfaction, and dramatically grew Best Buy's stock price. Joly and his team also succeeded in making Best Buy a leader in sustainability and innovation. In *The Heart of Business*, Joly shares the philosophy behind the resurgence of Best Buy: pursue a noble purpose, put people at the center of the business, create an environment where every employee can blossom, and treat profit as an outcome, not the goal. This approach is easy to understand, but putting it into practice is not so easy. It requires radically rethinking how we view work, how we define companies, how we motivate, and how we lead. In this book Joly shares memorable stories, lessons, and practical advice, all drawn from his own personal transformation from a hard-charging McKinsey consultant to a leader who believes in human magic. *The Heart of Business* is a timely guide for leaders ready to abandon old paradigms and lead with purpose and humanity. It shows how we can reinvent capitalism so that it contributes to a sustainable future.

When asked to define the ideal leader, many would emphasize traits such as intelligence, toughness, determination, and vision—the qualities traditionally associated with leadership. Often left off the list are softer, more personal qualities—but they are also essential. Although a certain degree of analytical and technical skill is a minimum requirement for success, studies indicate that emotional intelligence may be the key attribute that distinguishes outstanding performers from those who are merely adequate. Psychologist and author Daniel Goleman first brought the term "emotional intelligence" to a wide audience with his 1995 book of the same name, and Goleman first applied the concept to business with a 1998 classic Harvard Business Review article. In his research at nearly 200 large, global companies, Goleman found that truly effective leaders are distinguished by a high degree of emotional intelligence. Without it, a person can have first-class training, an incisive mind, and an endless supply of good ideas, but he or she still won't be a great leader. The chief components of emotional intelligence—self-awareness, self-regulation, motivation, empathy, and social skill—can sound unbusinesslike, but Goleman found direct ties between emotional intelligence and measurable business results. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact

on you today and for years to come.
