An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

*This is a little gem of a book--the perfect Christmas gift for lovers of reading! Reading Pleasures is filled with gorgeous photographs and artworks, each paired*

*with an inspiring quotation. Book lover and host of The Book Club Jennifer Byrne introduces the book magnificently in her Foreword: 'Here are brief quotations and observations on the reading life, accompanied by illustrations from the National Library of Australia's own collection'. They 'amount to a celebration--and examination--of the lifelong, earthy, impossible-to-explain love affair between readers and their books.' We all read in different ways: some in a private moment revelling in the escape that reading allows, or some with an eye to sharing and discussing. Tim Winton sums up reading in one word: 'privacy'. But for others, reading is company. 'As long as you have the capacity to read,' says Elliot Perlman, 'you needn't be alone any more'. Or as Richard Flanagan puts it in The Narrow Road to the Deep North, when his hero Dorrigo Evans stands in his library: 'he was not alone'. And Miles Franklin wonderfully describes the place we go to when we are reading as 'book-land'. To return to Jennifer: 'As the chorus of voices in this book makes clear, there are as many ways to read as there are to live.'*

*Volkswagen's Golf (Rabbit) and Jetta models are popular and enduring cars. Well-known for their robustness and need for minimum maintenance, these vehicles often suffer from neglect by their owners. Restoration expert Lindsay Porter fills you in on VW history and development, tells you what to look for and what to avoid when buying an older model, and how to bring it back to first-class condition. Fully illustrated sequences guide you step-by-step through a mechanical overhaul and show you how to restore bodywork, interior and electrics. Includes soft-top mechanism replacement.*

*Every Haynes manual is based on a complete teardown and rebuild, contains hundreds of "hands-on" photos tied to step-by-step instructions, and is thorough enough to help anyone from a do-it-your-selfer to a professional.*

Dan Dare is easily the most famous British comic hero. His adventures appeared in the original Eagle magazine during the 1950s and 1960s, but he also featured briefly in 2000AD before returning in the re-launched Eagle of the 1980s. This innovative Haynes Manual takes a detailed look inside the spaceships, space stations and various other craft that played such a huge part in bringing the excitement of space travel to the stories. Beautifully illustrated with cutaway artwork by Graham Bleathman, and supported by fabulous contemporary comic-strip art, this is the ultimate technical guide to the spaceships of Dan Dare and a wonderful addition to every comic fan's bookshelf.

**Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.
