A large number of
chemicals are used
on land at shore

Read Free Hazardous Materials

facilities, in the air in combat and reconnaissance aircraft, on seas around the world in surface vessels, and in submarine vessels by the navy and marine corps. Although the chemicals used are for the large part harmless, there is a

Read Free Hazardous Materials

significant amount of chemicals in use that can be health hazards during specific exposure circumstances. The Navy Environmental Health Center (NEHC) is primarily tasked with assessing these hazards. The NEHC completes its tasks

Read Free Hazardous Materials

by reviewing
toxicological and
related data and
preparing health-
hazard

assessments
(HHAs) for the
different chemicals.

Since the NEHC is
continually asked to
develop these
HHAs, the National
Research Council

Read Free Hazardous Materials

(NRC) was asked to
assess

independently the
validity and
effectiveness of
NEHC's HHA
process, in order to
determine whether
the process as
implemented
provides the Navy
with the best,
comprehensive,
