The Engineer

This is a reference work containing free association norms for over 2000 words in the English language collected over the last eight years from groups of 40-50 British English speakers aged between 17 and 45. These norms provide the information that, for example, 67% of people think of in response to the word cat, that 24% give the word society in response to the word pillar, and given the name Michael, 65% say Jackson, whereas less than 5% say Heseltine or Caine. These norms will be of use to researchers and students in many fields of psychology where the degree of association between pairs of words is often an important experimental variable. The main part of the book contains an alphabetical list of all associative responses and their frequency for each of the 2464 stimulus words. In addition, there is an index of stimulus words by semantic category to aid selection of experimental materials. Full methodological details of the collection and compilation of the data are also provided in the introduction.

Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

WBCS (West Bengal Civil Services) 25 Practice Sets Preliminary Exam 2022

Transport Phenomena in Material Processing

This text is meant to fill a long felt need for a comprehensive and authoritative book on heat and mass transfer for students of Mechanical/Chemical/Aeronautical/Production/ Metallurgical engineering. The dual objective of understanding the physical phenomena involved and the ability to formulate and solve typical problems by an average student has been kept in mind while writing this book. In this text, an effort has been made to identify the similarities in both qualitative and quantitative approach, between heat transfer and mass transfer. This gives a better understanding of the phenomena of mass transfer. The subject matter has been developed to a sufficiently advanced stage in a logical and coherent manner with neat illustrations along with an adequate number of solved examples. A large number of problems (with answers) at the end of each chapter assist in the pedagogy. The book has been appended with a set of selected MCQs. The role of experimentation in the teaching of Heat and Mass Transfer is well established. Properly designed experiments reinforce the teaching of basic principles more thoroughly.

Keeping this in mind one full chapter comprising 12 typical experiments forms another special feature of this text. Contents: Basic Concepts Fundamental Equations of Conduction One-Dimensional Steady State Heat Conduction Multi-Dimensional Steady State Conduction Transient Heat Conduction Fundamentals of Convective Heat Transfer Forced Convection Systems Natural Convection Thermal Radiation - Basic Relations Radiative Heat Exchange Between Surfaces Boiling and Condensation Heat Exchangers Diffusion Mass Transfer Convective Mass Transfer Experiments in Engineering Heat and Mass Transfer.

The Literary Digest

The Journal of Education

This new edition updated the material by expanding coverage of certain topics, adding new examples and problems, removing outdated material, and adding a computer disk, which will be included with each book. Professor Jaluria and Torrance have structured a text addressing both finite difference and finite element methods, comparing a number of applicable methods.

Technical Literature Abstracts

1. WBCS Cracker 25 Practice Sets is designed for WBCS Prelims 2. Solved Papers are provided from [2020-2017] to understand the paper pattern 3. 25 practice Sets are given for thorough practice 4. Level of Preparedness can be checked after every practice sets 5. Well detailed answers are provided to understand concepts The revised and updated edition of "WBCS CRACKER 25 Practice sets 2022" is, specially designed to serve as a complete test series for the candidates who aspire to crack West Bengal state Preliminary Examination in their first attempt. For the latest exam pattern, this book provides Previous Years' Solved Papers [2021-2017] right in the beginning of the book. Enclosed with 25 practice papers, it ensures that aspirants get to touch with every topic and question. After practicing each practice sets, you can easily check your level of preparation as each set has been designed by the expert team analysis. Strictly based on the latest pattern along with detailed explanation of question, this book proves to be a must have practice package before exam. TOC Solved Papers [2021-2017], Practice Sets (1-25)
