

## Hells Mouth

When the Benedictine Reform movement reached Britain in the ninth century, it brought with it not only monastic reform, but also an enthusiasm for the arts as a way of broadening the appeal of the Christian message. While one aspect of this emphasis was the decoration of the church in order to create a place whose beauty suited the beauty of God, another was the creation of images that were readily accessible to a populace that depended upon oral and visual texts. The mouth of hell, which medievalist Gary D. Schmidt describes in this volume, was one such image, created in order to express vividly and dramatically the abstract concept of spiritual damnation. The mouth of hell combined several different images, drawn from several different traditions that were still active in Anglo-Saxon culture. The leonine features of the mouth were drawn from Scriptural imagery, while the dragon-like aspects were combined from both the Scriptures and Anglo-Saxon visions of the draco. The notion of being swallowed into hell, ultimately drawn from the imagery of the Psalms, was linked to the activities of the dragon, which swallowed souls into torment. The hell mouth was an almost perfect coalescence of these very diverse images. Painted on church walls, crafted into manuscript illuminations, and sculpted on friezes, the mouth of hell was a lively, dramatic form, occurring in many different guises and with remarkably different emphases. The mouth could function as a leveller of society as monks, bishops, kings, and peasants alike marched into it. It could function as a torment itself, holding within its jaws a red-hot cauldron in which the damned simmer. It could become decorative, as artists began to multiply the mouth so that mouths appeared inside each other, suggesting torment upon torment. When these functions came together in medieval drama, they combined to form a lively, ribald, and rowdy seat for dramatic action.

*Thomas Middleton and Early Modern Textual Culture* is a comprehensive companion to *The Collected Works of Thomas Middleton*, providing detailed introductions to and full editorial apparatus for the works themselves as well as a wealth of information about Middleton's historical and literary context. It will be indispensable to scholars of Renaissance literature as well as essential reading for anyone interested in the history of the book in early modern Europe.

Monsters, grotesque creatures, and giants were frequently depicted in Italian Renaissance landscape design, yet they have rarely been studied. Their ubiquity indicates that gardens of the period conveyed darker, more disturbing themes than has been acknowledged.

In *The Monster in the Garden*, Luke Morgan argues that the monster is a key figure in Renaissance culture. Monsters were ciphers for contemporary anxieties about normative social life and identity. Drawing on sixteenth-century medical, legal, and scientific texts, as well as recent scholarship on monstrosity, abnormality, and difference in early modern Europe, he considers the garden within a broader framework of inquiry. Developing a new conceptual model of Renaissance landscape design, Morgan argues that the presence of monsters was not incidental but an essential feature of the experience of gardens.

Isaiah: A Bible Commentary By: Charles R. Sabo God's Holy Spirit had caused Charles R. Sabo to immerse himself into daily biblical studies. In 2013, he found himself called to further his education in order to acquire accepted status as a theologian among various social groups. In 2015, he acquired his Bachelors of Science in Religion, while taking online classes with Liberty University of Lynchburg, Virginia. Realizing that the Holy Spirit had gifted him with the spiritual gifts of knowledge and teaching, he continued his education online with Liberty University Baptist Theological Seminary from 2015-2018 and acquired his Masters of Divinity in Biblical Studies.

My mother, her sisters and offspring are known as Nereids, or sea nymphs. Most of them live in the ocean, but some mother and a few others, choose to live in the forest. My name is Eunice. Every fifty years my Nereid family has to sacrifice a nineteen - year old princess to Lamia, the child-eating demon. Unfortunately for me, the fifty-year pact is this year, the only princess who is going to be the required age soon. Will handsome-brave Khasius from Helios help me escape? Or will Lamia claim him as well.

**Seeking salvation, Nye is caught up in intrigue and danger that may end his quest for redemption and the life of the woman he is destined to love. Former slave Nye ended his life in 1859 after losing his love. The angel Gabriel has offered Nye a chance at redemption by hunting demons as a member of the Frozen. With less than seven years left until his salvation, Nye is staying on the straight and narrow – until a woman gets caught in the crossfire during a demon hunt. After receiving devastating news, Kiriana Kladshon moves across the country, only to get caught up in the world of The Frozen. Nye and Kiriana are pulled into an attraction neither can control. Will it be their ultimate demise or their greatest salvation? Damarion is leading a group of female demons on a mission. During his punishment on Earth, Damarion learns of dangers within his coven trying to stop him from returning to his love, still trapped in Hell and a love he was so sure was true...**

**A native of Afghanistan, Saber Azam left Kabul at the age of 22 for Switzerland to study at the prestigious "École Polytechnique Fédérale de Lausanne" where he obtained a degree in Mechanical Engineering and a Ph.D. in the field of advanced nuclear technology. Following the invasion of Afghanistan by the Soviet Union in 1979, he engaged in mobilizing support for the Afghan Resistance, refugees, and internally displaced persons while pursuing his academic endeavors. He contributed significantly to sensitizing Western capitals on the deplorable plight of Afghan people under the Red Army occupation and advocated a wide-range discussion on Afghanistan's post-Soviet withdrawal scenarios. He also presided over the "Comité Afghan d'Aide Humanitaire" in Geneva and promoted Swiss public and private sectors' involvement in reconstructing war-torn countries. In 1994, he joined the United Nations (UN), devoting his life to peace and security of the world and humankind's well-being. He served with the UN High Commissioner for Refugees (UNHCR) in Côte d'Ivoire and Kenya before becoming the Deputy Special Envoy of this world body for Southeast Europe. In 2001, he moved to the UN Department for Peace Keeping Operations (DPKO) and assumed senior functions in the Office of the Special Representative of the Secretary-General for Kosovo. In 2006, he returned to UNHCR and served as Representative of the organization in Côte d'Ivoire, Bangladesh, and Rwanda and Regional Representative and Coordinator for Central Asia. In determining the response of offshore structures, it is of utmost importance to determine, in the most correct manner, all factors which contribute to the total force acting on these structures. Applying the Morison formula (Morison et. al. , 1950) to calculate forces on offshore slender structures, uncertainties related to the understanding of the wave climate, the hydrodynamic force coefficients and the kinematics of ocean waves represent the most important contributions to the uncertainties in the prediction of the total forces on these structures (Haver and Gudmestad, 1992). Traditional calculation of forces on offshore structures involves the use of regular waves with the following non-linearities incorporated use of regular wave theories incorporating higher order terms use of Morison equation having a nonlinear drag term inclusion of the effect of the free surface by integrating all contributions to total forces and moments from the sea floor to the free surface of the waves In order to describe the sea more realistically, the ocean surface is to be described as an irregular sea surface represented by its energy spectrum. The associated decomposition of the sea surface is given as a linear sum of linear waves. The total force is found by integrating the contribution from all components in the wave spectrum to the free surface. The kinematics of each component must therefore be determined.

'Very beautiful and illuminating' Mariella Frostrup Edward Brooke-Hitching, author of the international bestseller The Phantom Atlas

delivers an atlas unlike any other. The Devil 's Atlas is an illustrated guide to the heavens, hells and lands of the dead as imagined throughout history by cultures and religions around the world. Packed with colourful maps, paintings and captivating stories, the reader is taken on a compelling tour of the geography, history and supernatural populations of the afterworlds of cultures around the globe. Whether it 's the thirteen heavens of the Aztecs, the Chinese Taoist netherworld of ' hungry ghosts ' , or the ' Hell of the Flaming Rooster ' of Japanese Buddhist mythology (in which sinners are tormented by an enormous fire-breathing cockerel), The Devil 's Atlas gathers together a wonderful variety of beliefs and representations of life after death. These afterworlds are illustrated with an unprecedented collection of images, ranging from the marvellous ' infernal cartography ' of the European Renaissance artists attempting to map the structured Hell described by Dante and the decorative Islamic depictions of Paradise to the various efforts to map the Garden of Eden and the spiritual vision paintings of nineteenth-century mediums. The Devil 's Atlas accompanies beautiful images with a highly readable trove of surprising facts and narratives, from the more inventive torture methods awaiting sinners, to colourful eccentric catalogues of demons, angels and assorted death deities. A traveller 's guide to worlds unseen, The Devil 's Atlas is a fascinating study of the boundless capacity of human invention, a visual chronicle of man 's hopes, fears and fantasies of what lies beyond.

In this highly researched and comprehensive book, the author argues for Coventry's Roman past, long doubted, and explores its Saxon roots as home to the monastic houses of St Osburg. He throws new light on Leofric and Godiva, including their involvement in the foundation or endowment of St Mary's Priory, and using recent excavation work he reveals the most up-to-date ideas on its appearance and its destruction. The city's later medieval past is explained in detail, including its rise to power in the Wars of the Roses, when the royal court moved to the city, and the connection with Henry VI and his cult. Details of the imprisonment of Mary, Queen of Scots, are given for the first time, while previously unused documents are used to tell the real story of life in Parliamentary Coventry and its famous Siege. Every aspect of daily life in the city is described in the well-illustrated narrative - how Coventry folk earned their living, from weaving to motor-cars, their health, education, religious life, entertainments and crime and punishment. No one who knows the city can fail to be intrigued by this classic book. It is a fund of fascinating information and has become the standard work on Coventry.

**"Anyone who has had any success in researching their Welsh ancestry will know that a grasp of specialized Welsh genealogical methods and sources is only one of several factors that contributed to that success. They will know, for example, how important it is in Welsh research to have some understanding of the social, cultural, religious, and economic background of the communities in which those ancestors lived. This book attempts to broaden that understanding, especially for the period prior to 1800 when most researchers begin to experience difficulties. In addition, it aims to make readers more aware of some little-known sources and the special uses that may be applied to the information found in these sources. The book follows the format of the Rowlands' highly successful Welsh Family History and is a compendium of contributions by experts in different fields. Both books have their origins in the residential courses in family history offered at the University of Wales, Aberystwyth, since 1986, and, although there is some overlap in the time periods considered within the two books, there is virtually no duplication of content. Apart from chapters dealing with aspects of community life, there are chapters relating to different occupations, surnames, old documents, maps, estate records, and family histories (the Vaughans of Trawsgoed, the Pugh family of Llanfair and Llanbedr, the Lloyds of Ty Newydd, Moris Reignald, Titus Jones, and "Baron" Lewis Owen). The book contains several case studies and is rounded off with examples of work done as part of the accreditation process on some more recent university courses. Other chapters cover Catholics in Wales, Urban Growth and Development, People in Mining and Metals, Bartrum's Welsh Genealogies, Homes of Surnames, English Settlement in Montgomeryshire, and Religion and Society in 19th-century Wales."--Publisher description.**
