Based on documentation originating in the environmental sciences, history of science, philosophy and art, Architecture of Nature explores the materiality and the effects of the forces at play in the history of the earth through the architect's modes of seeing and techniques of representation. This book presents the research work developed for the past eight years in the Advanced Research graduate studio "Architecture of Nature/ Nature of Architecture," created and directed by Diana Agrest at the Irwin S. Chanin School of Architecture of the Cooper Union. Architecture of Nature departs from the traditional approach to nature as a referent for architecture and reframes it as its object of study. The complex processes of generation and transformations of extreme natural phenomena such as glaciers, volcanoes, permafrost, and clouds are explored through unique drawings and models, confronting a scale of space and time that expands and transcends the established boundaries of the architectural discipline.

The first volume in a series reprinting the Buz Sawyer strip reprints all of the daily strips published during WWII. Buz serves aboard an aircraft carrier, flies combat missions against the notorious Japanese Zeros, crash lands behind enemy lines and is captured by a Japanese submarine. Also includes a selection of the best of the Sunday strips, which feature Buz Sawyer's pal and gunner, Roscoe Sweeny. This volume showcases some of Crane's most atmospheric drawings, aided by his expert use of Craftint tones, luscious romance and exciting action.

Not illustrated. 1856 edition. Excerpt: ... observes, " Whom He will, He hardeneth." He would not have added this unless, under the expression " raised thee up," he had meant to comprehend that purpose of God, by which Pharaoh was ordained to magnify, by his obstinacy, the redemption of God's people, Israel. For if any one should say, that Pharaoh's being "raised up" signified his being raised from above to the summit of kingly honour; that indeed is some part, but not the whole, of the matter. For the LXX. Greek interpreters have here used the same expression as that by which they render the verb Hiphil, derived from the radical Kum "to arise." Moreover, God is said to "raise up" that, which He causes, by an outstretched arm, as it were, to accomplish the end He has ordained. The Scripture here principally looks at the beginning, or first-cause, of that which it is recording; that it may ascribe the whole to God alone. In this same manner, God is also said to "raise up " prophets, and ministers of salvation; that no man might claim any of these things to himself, on the ground of his own industry. Therefore, the meaning of Moses has been faithfully expressed by the term, "raised up," if you will but so receive it; nor did Paul receive it otherwise. And most certainly, the expression "raised up" comprehends, not less distinctly than summarily, what he had touched upon, both concerning the elect, and the reprobate; since he is claiming for God the right and the power to have mercy on whom He will, and to harden whom He will, according to his own pleasure and purpose. The apostle therefore maintains, that the right of hardening, and of showing mercy, is in the power of God alone; and that no law can be imposed on him as a rule for his works; because no law or rule can be thought of, ...

An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to love, or grieving over the loss of a friend.Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological aspects of canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives.This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

The Fifth Edition of A History of the Roman People continues to provide a comprehensive analytical survey of Roman history from its prehistoric roots in Italy and the wider Mediterranean world to the dissolution of the Roman Empire in Late Antiquity in A.D. 600. Clearly organized and highly readable, the text's narrative of major political and military events provides a chronological and conceptual framework for the social, economic, and cultural developments of the periods covered. Major topics are treated separately so that students can easily grasp key concepts and ideas.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Expected Miracles explores the world of surgeons from their own perspective—how they perceive themselves, their work, colleagues, and communities. Recognizing that surgery is an art, a craft, a science, and a business, Joan Cassell offers, through poignant, painful, and thrilling descriptions, a vivid portrayal of the culture of surgery. Cassell has entered a realm where laypersons are usually horizontal, naked, and anesthetized. Using the central metaphor of the surgical "miracle," she illuminates the drama of the operating room, where surgeons and patients alike expect heroic performance. She takes us backstage to overhear conversations about patients, families, and colleagues, observe operations, eavesdrop on gossip about surgeons’ performances, and examine the values, behavior, and misbehavior of surgeons at work. Said one Chief of Surgery, "You couldn’t have a good surgeon who didn’t believe in the concept of the Hero." Following this lead, Cassell explores the heroic temperament of those who perform surgical "miracles" and finds that the demands and pressures of surgical practice require traits that in other fields, or in personal interactions, are often regarded as undesirable. She observes, "surgeons must tread a fine line between courage and recklessness, confidence and hubris, a positive attitude and a magical one." This delicate balance and frequent imbalance is portrayed through several character sketches. She contrasts the caring attention and technical mastery of The Exemplary Surgeon with the theatrical posturing of The Prima Donna and the slick showiness and questionable morals of The Sleazy Surgeon. She also identifies the attributes that surgeons admire in each other. They believe that only peers can really evaluate each other, and, while doctors might not speak negatively about colleagues in public, the community of surgeons exerts considerable pressure on its members to perform competently. Unlike "doctor-bashing" chronicles, Expected Miracles seeks to understand the charismatic authority of surgeons, its instability, and its price—to surgeons and to patients.
