Winner of the 1st-place American Journal of Nursing Book of the Year award in nursing research/evidence-based practice for 2021! Burns & Grove's *The Practice of Nursing Research: Appraisal, Synthesis, and Generation of Evidence*, 9th Edition is the trusted resource for those to master the research methods that are foundational to evidence-based practice. This highly textbook covers how to appraise and apply existing research evidence, as well as how to par research and quality improvement projects. This new 9th edition has been extensively updated today's focus on online research in the digital era and includes clear, step-by-step guidelines t major quantitative and qualitative research approaches — including supporting examples from high-quality literature. There's also new content on translational research, coverage of the m research tools and techniques, and an increased use of illustrations, tables, and other visuals engage visually oriented readers of all levels. Coverage of quantitative, qualitative, and other r methodologies provides a solid foundation to conduct, appraise, and apply research evidence t realities of today's clinical practice. Balanced coverage of qualitative and quantitative method addresses the qualitative research methodologies that are often the starting point of researc particularly in magnet hospitals and DNP programs. Clear, comprehensive coverage is organize five units that include: an introduction to nursing research; coverage of the research process application for evidence-based health care; how to analyze data, determine outcomes, and dis research; and how to propose and seek funding for research. Strong emphasis on evidence-ba practice addresses this key graduate-level QSEN competency and reinforces how to generate evidence and appraise and synthesize existing research for application to clinical practice. examples from nursing literature bring research principles to life. Emphasis on the most current research methodologies focuses on the methods used in both quantitative research and qualitative research, as well as outcomes research and mixed-methods research. Coverage of digital data examines the use of online research tools. Quick-reference summaries include a table of research methods inside the front cover and a list of types of research syntheses (with definitions) inside the cover. Helpful user resources are included with each new text purchase on the companion Evolve website and feature 400 interactive review questions along with a library of 10 full-text research articles.

"Money and Class in America: Notes and Observations on Our Civil Religion was first published by Weidenfeld & Nicolson, New York, in 1988"--Title pages verso.

Presents the biography of the courageous Asian American activist who, on February 12, 1965, held Malcolm X in her arms as he died, although her role as a public servant and activist began much earlier than this pivotal public moment. Simultaneous.

During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most prominent exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1945 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover political and cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons.

the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—has become "a real contribution to popular understanding of the postwar period" (The Wall Street Journal). The story of covert cultural efforts to win hearts and minds continues to be relevant today.

*This book examines the current state of American health care using a social science lens to focus on the interdependent, intercultural, economic, and communication aspects of access and delivery. This text explores how the cultures of health care organizations, health professions, governments, and capitalism, as well as communication, all contribute to a disease-focused, economically driven, technology-centered health care system. It seeks to understand 21st century health care from a macro-level view based on historical realizations and the current plethora of interdependent, but self-serving realities that provide few, if any, incentives for organizational collaboration and change. The fact that the most expensive health care system*

*in the world does not provide the healthiest outcomes is a driving force in this exploration. By reflecting on American values and beliefs regarding health care from philosophical, clinical, communication, and cost perspectives, this text is designed to encourage an organizational transformation at every level, from government to providers to patients. This comprehensive survey is an important guide for those studying, or working in, health care professions, as well as health care policy and administration. It should also be of interest to any reader who seeks to better understand U.S. health care policy from social science, economic, and/or health communication perspectives.*

*Schema Therapy (ST) was developed to treat patients with complex disorders, especially personality disorders, with a powerful new set of interventions. Personality disorders, as well as more general problems stemming from early experience and addressed by schema therapy, are a key factor in many disturbed relationships, and as a result ST is now increasingly used for couples work. By dealing effectively with the past, ST offers a unique way to approach and address present difficulties in relationships, Couples who understand their individual patterns of thinking and behavior tend to find that their relationships make much more sense. *When Betty Friedan produced *The Feminine Mystique* in 1963, she could not have realized how the discovery and debate of her contemporaries' general malaise would shake up society. Victims of a false belief system, these women were following strict social convention by loyally conforming to the pretty image of the magazines, and found themselves forced to seek meaning in their lives only through a family and a home. Friedan's controversial book about these women - and every woman - would ultimately set Second Wave feminism in motion and begin the battle for equality. This groundbreaking and life-changing work remains just as powerful, important and true as it was forty-five years ago, and is essential reading both as a historical document and as a study of women living in a man's world. **The story of Christine Jorgensen, America's first prominent transsexual, famously narrated trans embodiment in the postwar era. Her celebrity, however, has obscured other mid-century trans narratives—ones lived by African Americans such as Lucy Hicks Anderson and James McHarris. Their erasure from trans history masks the profound ways race has figured prominently in the construction and representation of transgender subjects. In *Black on Both Sides*, C. Riley Snorton identifies multiple intersections between blackness and transness from the mid-nineteenth century to present-day anti-black and anti-trans legislation and violence.**

**Drawing on a deep and varied archive of materials—early sexological texts, fugitive slave narratives, Afro-modernist literature, sensationalist journalism, Hollywood films—Snorton attends to how slavery and the production of racialized gender provided the foundations for an understanding of gender as mutable. In tracing the twinned genealogies of blackness and transness, Snorton follows multiple trajectories, from the medical experiments conducted on enslaved black women by J. Marion Sims, the “father of American gynecology,” to the negation of blackness that makes transnormativity possible. Revealing instances of personal sovereignty among blacks living in the antebellum North that were mapped in terms of “cross dressing” and canonical black literary works that express black men’s access to the “female within,” Black on Both Sides concludes with a reading of the fate of Phillip DeVine, who was murdered alongside Brandon Teena in 1993, a fact omitted from the film Boys Don’t Cry out of narrative convenience. Reconstructing these theoretical and historical trajectories furthers our imaginative capacities to conceive more livable black and trans worlds.**

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when**

**scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.**

assemblages," taking race as a set of sociopolitical processes that discipline humanity into full humans, not-quite-humans, and nonhumans. This disciplining, while not biological per se, frequently depends on anchoring political hierarchies in human flesh. The work of the black feminist scholars Hortense Spillers and Sylvia Wynter is vital to Weheliye's argument. Particularly significant are their contributions to the intellectual project of black studies vis-à-vis racialization and the category of the human in western modernity. Wynter and Spillers configure black studies as an endeavor to disrupt the governing conception of humanity as synonymous with white, western man. Weheliye posits black feminist theories of modern humanity as useful correctives to the "bare life and biopolitics discourse" exemplified by the works of Giorgio Agamben and Michel Foucault, which, Weheliye contends, vastly underestimate the conceptual and political significance of race in constructions of the human. *Habeas Viscus* reveals the pressing need to make the insights of black studies and black feminism foundational to the study of modern humanity.

at the Johns Hopkins Medical Center in Baltimore, a few cells taken from her fatal tumor continued to live--to thrive, in fact. For reasons unknown, her cells, code-named "HeLa," grew more vigorously than any other cells in culture at the time. Long-time science reporter Michael Gold describes in graphic detail how the errant HeLa cells spread, contaminating and overwhelming other cell cultures, sabotaging research projects, and eluding detection until they had managed to infiltrate scientific laboratories worldwide. He tracks the efforts of geneticist Walter Nelson-Rees to alert a sceptical scientific community to the rampant HeLa contamination. And he reconstructs Nelson-Rees's crusade to expose the embarrassing mistakes and bogus conclusions of researchers who unknowingly abetted HeLa's spread.

profound insight into the ecology of ecosystems or into human demands and activity. The challenge is to bridge from empirical data and the knowledge of the past to the possibilities of the performance in the future. We assume that there is scope for more cooperation between the fields of ecology and practical philosophy or other social sciences in organising ecosystems and shaping the cultural future of humankind, and that such collaboration should be accorded considerably more priority. This book deals with environmental processes seen within a framework of the nature of ecosystems and human cultures. The future of the environment, the development of ecosystems and effective nature conservation management are the essentials of this book. Human nature and culture, and in particular their interactions, are interpreted as a set of rules and as given. The aim is not only to assess the significance of human influence on species composition and biodiversity but also to weigh up the subsequent potentials for action. In this book we will analyze the problems independently of one another, even if they are interconnected. This book focuses on perspectives and prognoses for the impacts of anthropogenic activity on ecosystems and thus on species conservation. Its goal is to improve assessments of the impacts of human activity on the environment. We are aware that prognoses have very often proven to be false. It is difficult to impossible to be able to predict with precision how evolution and ecosystems will change in future under anthropogenic influence. This strengthens our resolve to attempt to retain the highest possible degree of scientific integrity and professionalism and not to shy away from expressing the uncertainty of our own ideas and prognoses. We venture prognoses in this book and we will fail. However, we hope that we will be wrong on the right side.

testimonials, diaries, personal and open letters, and even poetry performance media of autobiographies, this book extends the definition of African American autobiography, revealing how people of African descent have created and defined the Black self in diverse print cultures and literary genres since their arrival in the Americas. It illustrates ways African Americans use life writing and autobiography to address personal and collective Black experiences of identity, family, memory, fulfillment, racism and white supremacy. Individual chapters examine scrapbooks as a source of self-documentation, African American autobiography for children, readings of African American persona poems, mixed-race life writing after the Civil Rights Movement, and autobiographies by African American LGBTQ writers. The definitive step-by-step resource for qualitative and ethnographic research *Qualitative Research Methods: Collecting Evidence, Crafting Analysis, Communicating Impact* is a comprehensive guide on both the theoretical foundations and practical application of qualitative methodology. Adopting a phronetic-iterative approach, this foundational book leads readers through the chronological progression of a qualitative research project, from designing a study and collecting and analyzing data to developing theories and effectively communicating the results—allowing readers to employ qualitative methods in their projects as they follow each chapter. Coverage of topics such as qualitative theories, ethics, sampling, interview techniques, qualitative quality, and advice on practical fieldwork provides clear and concise guidance on how to design and conduct sound research projects. Easy-to-follow instructions on iterative qualitative data analysis explain how to organize, code, interpret, make claims, and build theory. Throughout, the author offers her own backstage stories about fieldwork, analysis, drafting, writing, and publishing, revealing the emotional and humorous aspects of practicing qualitative methods. Now in its second edition, this thorough and informative text includes new and expanded sections on topics including post-qualitative research, phenomenology, textual analysis and cultural studies, gaining

A History of African American Autobiography

***This study demonstrates the importance of including narrative ethics in a construction of Old Testament ethics. The social identity approach is used as a lens through which to understand and derive ethics. This approach highlights the social emphases of a biblical text, and consequently assists in understanding a text's original ethical message. The book of Ruth is used as a test case, employing a social identity approach for understanding the narrative, but also to model the approach so that it can be implemented more widely in study of the Old Testament and narrative ethics. Each of the protagonists in the book of Ruth is examined in regards to their personal and social self-components. This study reveals that the narrative functions to shape or reinforce the identity of an ancient Israelite implied reader. A social identity approach can also highlight the social processes within a society. The social processes taking place in the Monarchic and Persian Periods are discussed, and it is found that the social emphases of the book of Ruth most closely correspond to the social undercurrents of the Persian Period.***

***Why does Western medicine fail to cure chronic physical and mental illness? Why do so many treatments and drugs work only for a limited time before eventually losing effectiveness or producing harmful side effects? Dr. Steven Goldsmith's answer is at once counterintuitive and commonsensical: the root of the problem is our combative approach. Instead of resisting and fighting our ailments, we should cooperate with and even embrace them. We should look for and apply treatments that are integrated with the causes of illness, not regard illness as an enemy to conquer. This "hair of the dog" principle is already widely evident in practice. Take, for example, vaccines and inoculations, which are small doses of the microbes that cause the diseases being prevented; the use of the stimulant Ritalin to calm and ground people with Attention Deficit Hyperactivity Disorder; and radiation, which is both a well-known cause of cancer and a well-known method of treating it. These are just a few of Goldsmith's many examples, which he relays in clear, evocative, and thought-provoking language. Perhaps most compelling of all, he explores reasons why this clearly effective principle is ignored by Western medicine. Drawing on fascinating case studies and personal experiences from his forty-year career as a medical doctor and psychiatrist—as well as abundant clinical, experimental, and public health data that support his seemingly paradoxical assertion—Dr. Goldsmith presents an exciting, revolutionary approach that***

In an extraordinary blend of narrative history, personal recollection, & oral testimony, the author presents a sweeping history of Asian Americans. He writes of the Chinese who laid tracks for the transcontinental railroad, of plantation laborers in the canefields of Hawaii, of "picture brides" marrying strangers in the hope of becoming part of the American dream. He tells stories of Japanese Americans behind the barbed wire of U.S. internment camps during World War II, Hmong refugees tragically unable to adjust to Wisconsin's alien climate & culture, & Asian American students stigmatized by the stereotype of the "model minority." This is a powerful & moving work that will resonate for all Americans, who together make up a nation of immigrants from other shores.

nonviolence has taken him from an Alabama sharecropper's farm to the halls of Congress, from a segregated schoolroom to the 1963 March on Washington, and from receiving beatings from state troopers to receiving the Medal of Freedom from the first African-American president. Now, to share his remarkable story with new generations, Lewis presents *March*, a graphic novel trilogy, in collaboration with co-writer Andrew Aydin and New York Times best-selling artist Nate Powell (winner of the Eisner Award and LA Times Book Prize finalist for *Swallow Me Whole*). *March* is a vivid first-hand account of John Lewis' lifelong struggle for civil and human rights, meditating in the modern age on the distance traveled since the days of Jim Crow and segregation. Rooted in Lewis' personal story, it also reflects on the highs and lows of the broader civil rights movement. Book One spans John Lewis' youth in rural Alabama, his life-changing meeting with Martin Luther King, Jr., the birth of the Nashville Student Movement, and their battle to tear down segregation through nonviolent lunch counter sit-ins, building to a stunning climax on the steps of City Hall. Many years ago, John Lewis and other student activists drew inspiration from the 1958 comic book *Martin Luther King and the Montgomery Story*. Now, his own comics bring those days to life for a new audience, testifying to a movement whose echoes will be heard for generations.

Student academic writing is at the heart of teaching and learning in higher education. Students are assessed largely by what they write, and need to learn both general academic conventions as well as disciplinary writing requirements in order to be successful in higher education. Teaching Academic Writing is a 'toolkit' designed to help higher education lecturers and tutors teach writing to their students. Containing a range of diverse teaching strategies, the book offers both practical activities to help students develop their writing abilities and guidelines to help lecturers and tutors think in more depth about the assessment tasks they set and the feedback they give to students. The authors explore a wide variety of text types, from essays and reflective diaries to research projects and laboratory reports. The book draws on recent research in the fields of academic literacy, second language learning, and linguistics. It is grounded in recent developments such as the increasing diversity of the student body, the use of the Internet, electronic tuition, and issues related to distance learning in an era of increasing globalisation. **The use of assisted reproductive technologies (ART)—in vitro fertilization, artificial insemination, and gestational surrogacy—challenges contemporary notions of what it means to be parents or families. Camisha A. Russell argues that these technologies also bring new insight to ideas and questions surrounding race. **New Critical Legal Thinking articulates the emergence of a stream of critical legal theory which is directly concerned with the relation between law and the political. The early critical legal studies claim that all law is politics is displaced with a different and more nuanced theoretical arsenal. Combining grand theory with a concern for grounded political interventions, the various contributors to this book draw on political theorists and continental philosophers in order to engage with current legal problematics, such as the recent global economic crisis, the Arab spring and the emergence of biopolitics. The contributions instantiate the claim that a new and radical political legal scholarship has come into being: one which critically interrogates and intervenes in the contemporary relationship between law and power.**

The forms taken by scientific writing help to determine the very nature of science itself. In this closely reasoned study, Charles Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists arguing for their findings. Examining such works as the early *Philosophical Transactions* and Newton's optical writings as well as *Physical Review*, Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists. The rhetoric of science is, Bazerman demonstrates, an embedded part of scientific activity that interacts with other parts of scientific activity, including social structure and empirical experience. This book presents a comprehensive historical account of the rise and development of the genre, and views these forms in relation to empirical experience. Examining international case studies including USA, Asia, Australia and New Zealand, Laurajane Smith identifies and explores the use of heritage throughout the world. Challenging the idea that heritage value is self-evident, and that things must be preserved because they have an inherent importance, Smith forcefully demonstrates that heritage value is not inherent in physical objects or places, but rather that these objects and places are used to give tangibility to the values that underpin different communities and to assert and affirm these values. A practically grounded

*practice, policy applications, and new perspectives on training and educating a critical nutrition and dietetic workforce. Contributing authors from around the globe also discuss the role of critical nutrition dietetics in industry, private practice, and consultancy, as well the role of critical dietetics in addressing the food, hunger, and health issues associated with the world economic crisis. The authors designed the volume to be a reference work for students enrolled in undergraduate and postgraduate courses in Critical Nutrition, Critical Food Studies, and Critical Dietetics. Each chapter offers concise aims and learning outcomes, as well as assignments for students and a concise chapter summary. These features enhance the value of the volume as a learning tool.*

*captivating style to explore how our high-stakes educational culture has spiraled out of control. During the year of her ten-year reunion, Robbins goes back to her high school, where she follows heart-tuggingly likeable students including "AP" Frank, who grapples with horrifying parental pressure to succeed; Audrey, whose panicked perfectionism overshadows her life; Sam, who worries his years of overachieving will be wasted if he doesn't attend a name-brand college; Taylor, whose ambition threatens her popular girl status; and The Stealth Overachiever, a mystery junior who flies under the radar. Robbins tackles teen issues such as intense stress, the student and teacher cheating epidemic, sports rage, parental guilt, the black market for study drugs, and a college admissions process so cutthroat that students are driven to suicide and depression because of a B. With a compelling mix of fast-paced narrative and fascinating investigative journalism, The Overachievers aims both to calm the admissions frenzy and to expose its escalating dangers.*

*An alien race calls on one woman to revive mankind after Earth's apocalypse in this science fiction classic from the award-winning author of Parable of the Sower. Lilith Iyapo has just lost her husband and son when atomic fire consumes Earth—the last stage of the planet's final war. Hundreds of years later Lilith awakes, deep in the hold of a massive alien spacecraft piloted by the Oankali—who arrived just in time to save humanity from extinction. They have kept Lilith and other survivors asleep for centuries, as they learned whatever they could about Earth. Now it is time for Lilith to lead them back to her home world, but life among the Oankali on the newly resettled planet will be nothing like it was before. The Oankali survive by genetically merging with primitive civilizations—whether their new hosts like it or not. For the first time since the nuclear holocaust, Earth will be inhabited. Grass will grow, animals will run, and people will learn to survive the planet's untamed wilderness. But their children will not be human. Not exactly. Featuring strong and compelling characters and*

*During the years 1500–1800, European performing arts reveled in a kaleidoscope of Otherness: Middle-Eastern harem women, fortune-telling Spanish 'Gypsies', Incan priests, Barbary pirates, moresca dancers, and more. In this prequel to his 2009 book Musical Exoticism, Ralph P. Locke explores how exotic locales and their inhabitants were characterized in musical genres ranging from instrumental pieces and popular songs to oratorios, ballets, and operas. Locke's study offers new insights into much-loved masterworks by composers such as Cavalli, Lully, Purcell, Rameau, Handel, Vivaldi, Gluck, and Mozart. In these works, evocations of ethnic and cultural Otherness often mingle attraction with envy or fear, and some pieces were understood at the time as commenting on conditions in Europe itself. Locke's*
