***It is possible to overcome barriers to minority success in Canada. The stance of this book is that new immigrants, refugees and international students do not have to settle for underachievement despite the cultural and structural disadvantages they face in Canada. The fact is, the unequal social structure of Canada has some cracks, and many minorities have used strategic resources to open up these cracks and achieved tremendous upward social mobility in Canadian society from the margins. These documented minority successes in Canada in the face of systemic marginalization provide lessons and hope for new immigrants,***

***refugees and international students. The economic, political, social and cultural problems that minorities encounter in Canadian institutions, organizations, communities and from individuals overwhelm and break many of them. However, some minorities break records in the face of the frustrations they encounter. What accounts for the success of the latter group of immigrants, refugees and international students in Canada? Individual efforts and personal ambitions are not enough to explain these success stories. This book highlights strategies and support systems that facilitate minority strategic connections with Canadian mainstream institutions,***

**organizations and individuals to win from the margins of society. Although the book does not get into the theories of inequality, equity and diversity, it does acknowledge the structural and cultural barriers to minority success in Canada. That is, it does not blame individual minorities for not making it in Canada. Rather, it points to strategic resources that new immigrants, refugees and international students can use to help them overcome some of the barriers to success in Canada. This book outlines the unique challenges and opportunities of doing business in Africa, analysing how varying degrees of development across its countries affects entrepreneurship. Taking into account historical and cultural contexts, the authors approach the topic by evaluating the different possibilities of business opportunity in Africa.

Insightful contributions explore an extensive range of African countries,

discussing both formal and informal entrepreneurship, as well as the different factors that influence the growing economy of Africa. African Entrepreneurship will be of interest to anyone researching the potential of doing business in Africa, as well as entrepreneurs and policy-makers looking to expand their knowledge on how businesses are managed in this region.
