This book provides a comprehensive, authoritative, and thought-provoking examination of the ethical issues encountered by accountants working in the industry, public practice, nonprofit service, and government. Gordon Klein's, Ethics in Accounting: A Decision-Making Approach, helps students understand all topics commonly prescribed by state Boards of Accountancy regarding ethics literacy. Ethics in Accounting can be utilized in either a one-term or two-term course in Accounting Ethics. A contemporary focus immerses readers in real world ethical questions with recent trending topics such as celebrity privacy, basketball point-shaving, auditor inside trading, and online dating. Woven into chapters are tax-related issues that address fraud, cheating, confidentiality, contingent fees and auditor independence. Duties arising in more commonplace roles as internal auditors, external auditors, and tax practitioners are, of course, examined as well. Engineering Economics: Financial Decision Making for Engineers, is designed for teaching a course on engineering economics to match engineering practice today. It recognizes the role of the engineer as a decision maker who has to make and defend sensible decisions. Such decisions must not only take into account a correct assessment of costs and benefits, they must also reflect an understanding of the environment in which the decisions are made. The 5th edition has new material on project management in order to adhere to the CEAB guidelines as well the new edition will have a new spreadsheet feature throughout the text. Garrison - Your guide through the challenging waters of managerial accounting. For centuries, the lighthouse has stood as a beacon of guidance for mariners at sea. More than an aid to navigation, the lighthouse symbolizes safety, permanence, reliability, and the comforts of the familiar. For this reason, we have chosen to illustrate the Canadian eighth edition of Managerial Accounting by Garrison, Chesley, Carroll and Webb with an image that encapsulates the greatest strengths of this market leading text. Garrison is your guide through the challenging waters of managerial accounting. It identifies the three functions managers must perform within their organizations—plan operations, control activities, and make decisions—and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it. Managerial Accounting 8e focuses, now as in the past, on three qualities: Relevance, Balance and Clarity. The authors' steady focus on these core elements has led to tremendous results! As seafarers look to the lighthouse for direction along unfamiliar shore, so too can Garrison act as a compass for students seeking to master this course.

Assessing Aid determines that the effectiveness of aid is not decided by the amount received but rather the institutional and policy environment into which it is accepted. It examines how development assistance can be more effective at reducing global poverty and gives five main recommendations for making aid more effective: targeting financial aid to poor countries with good policies and strong economic management; providing policy-based aid to demonstrated reformers; using simpler instruments to transfer resources to countries with sound management; focusing projects on creating and transmitting knowledge and capacity; and rethinking the internal incentives of aid agencies.

Management Accounting in a Dynamic Environment

Whether students pursue a professional career in accounting or in other areas of management, they will interact with accounting systems. In all organizations, managers rely on management accounting systems to provide information to deal with changes in their operating environment. This book provides students and managers with an understanding and appreciation of the strengths and limitations of an organization's accounting system, and enables them to be intelligent and critical users of the system. The text highlights the role of management accounting as an integral part of the organization's strategy and not merely a basis for evaluating proposed changes to the system. With international examples that bring the current business environment to the forefront, problems and cases to promote critical thinking, and online support for students and instructors, Management Accounting in a Dynamic Environment is no mere introductory textbook. It prepares readers to use accounting systems intelligently to achieve organizational success. The authors have identified several cases to accompany each chapter in the textbook. It also discusses the aftermath of the fallout and our current state.
