This book, first published in 1998, is an analysis of sixties radicalism and its impact on contemporary politics and theory.

No Free Speech for Fascists explores the choice of anti-fascist protesters to demand that the opportunities for fascists to speak in public places are rescinded, as a question of history, law, and politics. It explains how the demand to no platform fascists emerged in 1970s Britain, as a limited exception to a left-wing tradition of support for free speech. The book shows how no platform was intended to be applied narrowly, only to a right-wing politics that threatened everyone else. It contrasts the rival idea of opposition to hate speech that also emerged at the same time and is now embodied in European and British anti-discrimination laws. Both no platform and hate speech reject the American First Amendment tradition of free speech, but the ways in which they reject it are different. Behind no platform is not merely a limited range of political targets but a much greater scepticism about the role of the state. The book argues for an idea of no platform which takes on the electronic channels on which so much speech now takes place. It shows where a fascist element can be recognised within the much wider category of far-right speech. This book will be of interest to activists and to those studying and researching political history, law, free speech, the far right, and anti-

fascism. It sets out a philosophy of anti-fascism for a social media age.

The strange, illuminative true story of Tommy Nutter, the Savile Row tailor who changed the silhouette of men's fashion—and his rock photographer brother, David, who captured it all on film. From an early age, there was something different about Tommy and David Nutter. Growing up in an austere apartment above a café catering to truck drivers, both boys seemed destined to lead rather humble lives in post-war London—Tommy as a civil servant, David as a darkroom technician. Yet the strength of their imagination (plus a little help from their friends) transformed them instead into unlikely protagonists of a swinging cultural revolution. In 1969, at the age of twenty-six, Tommy opened an unusual new boutique on the “golden mile” of bespoke tailoring, Savile Row. While shocking a haughty establishment resistant to change, “Nutters of Savile Row” became an immediate sensation among the young, rich, and beautiful, beguiling everyone from Bianca Jagger to the Beatles—who immortalized Tommy's designs on the album cover of Abbey Road. Meanwhile, David's innate talent with a camera vaulted him across the Atlantic to New York City, where he found himself in a parallel constellation of stars (Yoko Ono, Elton John) who enjoyed his dry wit almost as much as his photography. House of Nutter tells the stunning true story of two gay men who influenced some of the most iconic styles and pop images of the twentieth century. Drawing on interviews with more than seventy people—and taking advantage of unparalleled access to never-before-seen pictures, letters, sketches, and diaries—journalist Lance

Richardson presents a dual portrait of brothers improvising their way through five decades of extraordinary events, their personal struggles playing out against vivid backdrops of the Blitz, an obscenity trial, the birth of disco, and the devastation of the AIDS crisis. A propulsive, deftly plotted narrative filled with surprising details and near-operatic twists, House of Nutter takes readers on a wild ride into the minds and times of two brilliant dreamers.

The University of New South Wales, from its gestation in the Sydney Technical College and its controversial beginnings in 1949, has grown into a diverse, innovative institution, one of Australia's premier universities - with, in 1999, a student population of 30,000 and a staff of 5,000. Since its foundation it has been a leading player in the redefining of traditional notions of university life and character in Australia, maintaining its contributions to public life and its continuing focus on the incorporation of change. The book sets out to capture the spirit and achievement of these first fifty years.

We are witnessing the birth of a new politics -- anti-capitalist, libertarian and anti-war. But where do today's dissidents come from? Dissident Marxism argues that their roots can be found in the life and work of an earlier generation of socialist revolutionaries, including such inspiring figures as the Soviet poet Mayakovsky, the Marxist philosopher Karl Korsch, Communist historians Edward Thompson and Dona Torr, the Egyptian surrealist Georges Henein, American New Left economists Paul Baran and Paul Sweezy, advocates of Third World liberation including Walter Rodney and Samir Amin, Harry Braverman, the author of Labor and Monopoly

Capital, and David Widgery, the journalist of the May '68 revolts. What these writers shared was a commitment to the values of socialism-from-below, the idea that change must be driven by the mass movements of the oppressed. In a world dominated by slump, fascism and war, they retained a commitment to total democracy. Dissident Marxism describes the left in history. Some readers will enjoy it as a history of revolutionary socialism in the years between Stalin's rise and the fall of the Berlin Wall. Others will find here a challenging thesis -- that the most enduring of left-wing traditions, and highly relevant to the times we live in today, were located in a space between the New Left and Trotskyism. Dissident Marxism explores the lives and thinking of some of the most creative and striking members of the twentieth century left, and asks if the new anti-capitalist movement might provide an opportunity for just such another left-wing generation to emerge?

From nineteenth-century broad arrows and black and white stripes to twenty first-century orange jumpsuits, prison clothing has both mirrored and bolstered the power of penal institutions over prisoners' lives. Vividly illustrated and based on original research, including throughout the voices of the incarcerated, this book is a pioneering history and investigation of prison dress, which demystifies the experience of what it is like to be an imprisoned criminal. Ash takes the reader on a journey from the production of prison clothing to the bodies of its wearers. She uncovers a history characterized by waves of reform, sandwiched between regimes that use clothing as punishment and discovers how inmates use their dress to surmount, subvert or survive these punishment cultures. She reveals the hoods, the masks, and pink boxer shorts, near nakedness, even twenty first-century 'civvies' to be not just other types of uniform but political embodiments of the surveillance of everyday life.

Larrikins, Rebels, and Journalistic Freedom is a cultural history of Australian journalism. In a democratic nation where a free news media is not guaranteed, Australian journalism has inherited what could be described as a 'Larrikin' tradition to protect its independence. This book mines Australian journalism's rebelliousness, humor and distinct disrespect for authority in various socio-historical contexts, to explore its determination to maintain professional independence. Beginning with a Larrikin analysis of Australian journalism's inherited

Enlightenment tradition, Dr Josie Vine takes the reader through the Colonial era's hardships, Federation, two World Wars, the Cold War's fear and suspicion, the swinging sixties, a Prime Minister's dismissal, 1980's neo-liberalism, post-9/11 and, finally, provides a conclusive synthesis of current Australian journalism culture. Throughout, the book highlights the audacious, iconoclastic and determined figure of the Larrikin-journalist, forever pushing boundaries to protect democracy's cornerstone – freedom of the news media. "Book-length histories of Australian journalism are still relatively rare, but what makes this new arrival particularly welcome is the way in which it is structured around an exploration of the 'Larrikin paradox'. This refers to the fact that although Australian journalism may profess to be 'professional' and 'reputable', it can also be raucous, unruly and disrespectful in pursuit of what it sees as its democratic purposes. The Larrikin may be a uniquely Australian figure but the paradox is far from confined to Australian journalism (not least because of the influence of erstwhile Australian Rupert Murdoch on journalism in the Anglosphere), and this book should be of considerable interest to those concerned with the means whereby journalism performs its democratic, Fourth Estate role in

modern democracies. This is an extremely very well-informed and highly insightful work which ought to appeal equally to those interested in journalism and in Australian politics." — Julian Petley, Professor, Brunel University London, UK
Re-creates the vibrant, cutting-edge, life-transforming environment of London during the 1960s, examining how the city's creative contributions to art, music, and fashion fueled the social, political, and sexual revolutions that turned the world upside down. Reprint.

Jerry White's *London in the Twentieth Century*, Winner of the Wolfson Prize, is a masterful account of the city's most tumultuous century by its leading expert. In 1901 no other city matched London in size, wealth and grandeur. Yet it was also a city where poverty and disease were rife. For its inhabitants, such contradictions and diversity were the defining experience of the next century of dazzling change. In the worlds of work and popular culture, politics and crime, through war, immigration and sexual revolution, Jerry White's richly detailed and captivating history shows how the city shaped their lives and how it in turn was shaped by them.

This is the first history of the Hippie Trail. It records the joys and pains of budget travel to Kathmandu, India, Afghanistan and other 'points east' in the 1960s and 1970s. Written in a clear,

simple style, it provides detailed analysis of the motivations and the experiences of hundreds of thousands of hippies who travelled eastwards. The book is structured around four key debates: were the travellers simply motivated by a search for drugs? Did they encounter love or sexual freedom on the road? Were they basically just tourists? Did they resemble pilgrims? It also considers how the travellers have been represented in films, novels and autobiographical accounts, and will appeal to those interested in the Trail or the 1960s counterculture, as well as students taking courses relating to the 1960s.

This book works with two contrasting imaginings of 1960s London: the one of the excess and comic vacuousness of Swinging London, the other of the radical and experimental cultural politics generated by the city's counterculture. The connections between these two scenes are mapped looking firstly at the spectacular events that shaped post-war London, then at the modernist physical and social reconstruction of the city alongside artistic experiments such as Pop and Op Art. Making extensive use of London's underground press the book then explores the replacement of this seemingly

materialistic image with the counterculture of underground London from the mid-1960s. *Swinging City* develops the argument that these disparate threads cohere around a shared cosmology associated with a new understanding of nature which differently positioned humanity and technology. The book tracks a moment in the historical geography of London during which the city asserts itself as a post-imperial global city. *Swinging London* it argues, emerged as the product of this recapitalisation, by absorbing avant-garde developments from the provinces and a range of transnational, mainly transatlantic, influences.

In the 1960s and 70s, a new youth consciousness emerged in Western Europe which gave this period its distinct character. This volume demonstrates how international developments fused with national traditions, producing specific youth cultures that became leading trendsetters of emergent post-industrial Western societies. The 1960s is one of the most heavily mythologised decades of the twentieth century. More than 50 years on, the era continues to capture the public's imagination. *The 1960s in Australia: People, Power and Politics* recognises the complexity of social and cultural change by presenting a broad range of contributions that acknowledge an often overlooked fact – that not everyone experienced the 1960s in the same way. The diversity of the time is confirmed by contributions from a number of expert Australian historians who each provide an insight into Australia in the 1960s, offering an understanding of the social realities of this period as well as the ebbs and flows of transnational influence. This collection includes a featured contribution by prominent Australian historian, Raymond Evans, who provides a personal insight into the 1960s. Other contributors also place 'the lived experience' at the centre of their analysis by considering the growth of modern flats, the impact of cosmopolitanism, and sex and sexuality in the 'Sixties'. The book also highlights the way power was deployed and deconstructed during this era by considering the psychiatric profession, the agenda of the counter-culture, and the role that

women's magazines played in reinforcing dominant gender paradigms. The complex politics of the era are also explored through the transnational impact of figures such as Anthony Crosland, the impact of the Vietnam War, and the multiplicity of motivations behind the anti-war protest and the Aboriginal rights movement of the era. *The 1960s in Australia: Power, People and Politics* is a fresh focus on a significant time in Australia's history. It brings together a collection of innovative and engaging explorations into the Australian 'Sixties', which underline the complexity of the time.

A million Australians went to Bali last year, following the millions of others who have made their way across Asia over the past century. Many travellers returned thinking they knew Asia and their personal experiences helped shape popular attitudes. This absorbing book unpacks their experiences, showing how their encounters changed the way Australians thought about themselves in the world. *Visiting the Neighbours* tells the story of Australian relations with Asia from the bottom up, examining the experiences of some of the millions of travellers and tourists who headed to the region over more than a hundred years. Merchants, missionaries, pilgrims, soldiers, hippies, diplomats, backpackers all had an impact on diplomacy and international relations. Agnieszka Sobocinska's book is a bold and important step in understanding the intersection between popular opinion, prejudice and international relations as Australia stands at the precipice of the Asian Century. 'Sets out a range of fascinating and different roles played by Australians in Asia.' – Michael Wesley, author of *There Goes the Neighbourhood: Australia and the rise of Asia.* '... Puts travel to Asia firmly on the 'Asia-literacy' map. This is not only a richly detailed, subtly argued and historically informed study of the Australian traveller in Asia. It is also smart, sharp and a very good read.' – David Walker, BHP Billiton Chair of Australian Studies, Peking University.

Surrealism is widely thought of as an artistic movement that flourished in Europe between the two world wars. However, during the 1960s, '70s, and '80s, diverse radical affinity groups, underground subcultures, and student protest movements proclaimed their connections to surrealism. Radical Dreams argues that surrealism was more than an avant-garde art movement; it was a living current of anti-authoritarian resistance. Featuring perspectives from scholars across the humanities and, distinctively, from contemporary surrealist practitioners, this volume examines surrealism's role in postwar oppositional cultures. It demonstrates how surrealism's committed engagement extends beyond the parameters of an artistic style or historical period, with chapters devoted to Afrosurrealism, Ted Joans, punk, the Situationist International, the student protests of May '68, and other topics. Privileging interdisciplinary, transhistorical, and material culture approaches, contributors address

surrealism's interaction with New Left politics, protest movements, the sexual revolution, psychedelia, and other subcultural trends around the globe. A revelatory work, Radical Dreams definitively shows that the surrealist movement was synonymous with cultural and political radicalism. It will be especially valuable to those interested in the avant-garde, contemporary art, and radical social movements. In addition to the editors, the contributors to this volume include Mikkel Bolt Rasmussen, Jonathan P. Eburne, David Hopkins, Claire Howard, Michael Löwy, Alyce Mahon, Gavin Parkinson, Grégory Pierrot, Penelope Rosemont, Ron Sakolsky, Marie Arleth Skov, Ryan Standfest, and Sandra Zalman.

The power of modernity to secularise has been a foundational idea of the western world. Both social science and church history understood that the Christian religion from 1750 was deeply vulnerable to industrial urbanisation and the Enlightenment. But as evidence mounts that countries of the European world experienced secularising forces in different ways at different periods, the timing and causes of de-Christianisation are now widely seen as far from straightforward. Secularisation in the Christian World brings together leading scholars in the social history of religion and the sociology of religion to explore what we know about the decline

of organised Christianity in Britain, Europe, the United States, Canada and Australia. The chapters tackle different strands, themes, comparisons and territories to demonstrate the diversity of approach, thinking and evidence that has emerged in the last 30 years of scholarship into the religious past and present. The volume includes both new research and essays of theoretical reflection by the most eminent academics. It highlights historians and sociologists in both agreement and dispute. With contributors from eight countries, the volume also brings together many nations for the first consolidated international consideration of recent themes in de-Christianisation. With church historians and cultural historians, and religious sociologists and sociologists of the godless society, this book provides a state-of-the-art guide to secularisation studies.

The dissident voice in US culture might almost be said to have been born with the territory. Its span runs from Roger Williams to Thoreau, Anne Bradstreet to Gertrude Stein, Ambrose Bierce to the New Journalism, The Beats to the recent Bad Subjects cyber-crowd. This new study analyses three recent literary tranches in the tradition: a re-envisioning of the whole Beat web or circuit; a consortium of postwar "outrider" voices - Hunter Thompson to Frank Chin, Joan Didion to Kathy

Acker; and a latest purview of what, all too casually, has been designated "ethnic" writing. The aim is to set up and explore these different counter-seams of modern American writing, those which sit outside, or at least awkwardly within, agreed literary canons.

By 1976, the National Front had become the fourth largest party in Britain. In a context of national decline, racism and fears that the country was collapsing into social unrest, the Front won 19 per cent of the vote in elections in Leicester and 100,000 votes in London. In response, an anti-fascist campaign was born, which combined mass action to deprive the Front of public platforms with a mass cultural movement. Rock Against Racism brought punk and reggae bands together as a weapon against the right. At Lewisham in August 1977, fighting between the far right and its opponents saw two hundred people arrested and fifty policemen injured. The

press urged the state to ban two rival sets of dangerous extremists. But as the papers took sides, so did many others who determined to oppose the Front. Through the Anti-Nazi League hundreds of thousands of people painted out racist graffiti, distributed leaflets and persuaded those around them to vote against the right. This combined movement was one of the biggest mass campaigns that Britain has ever seen. This book tells the story of the National Front and the campaign which stopped it.

Through rigorous research, the author shows how supporters of indigenous Australians and their struggles for equality pushed Australia into the 60s - literally and figuratively.

losing sight of what made the band so important, unique, and enjoyable. With a new introduction for the paperback. London is a supreme achievement of civilization. It offers fulfilments of body and soul, encourages discovery and invention. It is a place of freedom, multiplicity and co-existence. It is a Liberal city, which means it stands for values now in peril. London has also become its own worst enemy, testing to destruction the idea that the free market alone can build a city, a fantastical wealth machine that denies too many of its citizens a decent home or living. In this thought-provoking, fearless, funny and subversive book, Rowan Moore shows how London's strength depends on the creative and mutual interplay of three forces: people, business and state. To find responses to the challenges of the twenty-first century, London must rediscover its genius for popular action and bold public intervention. The global city above all others, London is the best place to understand the way the world's cities are changing. It could also be, in the shape of a living, churning city of more than eight million people, the most powerful counter-argument to the extremist politics of the present.

If the World Wars defined the first half of the twentieth century, the sixties defined the second half, acting as the pivot on which modern times have turned. From popular music to individual liberties, the tastes and convictions of the Western world are indelibly stamped with the impact of this tumultuous decade. Framing the sixties as a period stretching from 1958 to 1974, Arthur Marwick argues that this long decade ushered in nothing less than a cultural revolution - one that raged most clearly in the United States, Britain, France, and Italy. Marwick recaptures the events and movements that shaped life as we know it: the rise of a youth subculture across the West; the sit-ins and marches of the civil rights movement; Britain's surprising rise to leadership in fashion and music; the emerging storm over Vietnam; the Paris student uprising of 1968; the growing force of feminism, and much more. For some, it was a golden age of liberation and political

progress; for others, an era in which depravity was celebrated, and the secure moral and social framework subverted. The sixties was no short-term era of ecstasy and excess. On the contrary, the decade set the cultural and social agenda for the rest of the century, and left deep divisions still felt today. How did the concept of the secular state emerge and evolve in Australia and how has it impacted on its institutions? This is the most comprehensive study to date on the relationship between religion and the state in Australian history, focusing on the meaning of political secularity in a society that was from the beginning marked by a high degree of

religious plurality. This book tracks the rise and fall of the established Church of England, the transition to plural establishments, the struggle for a public Christian-secular education system, and the eventual separation of church and state throughout the colonies. The study is unique in that it does not restrict its concern with religion to the churches but also examines how religious concepts and ideals infused apparently secular political and social thought and movements making the case that much Australian thought and institution building has had a sacral-secular quality. Social welfare reform, nationalism, and emerging conceptions of citizenship and civilization were heavily influenced by religious ideals, rendering problematic traditional linear narratives of secularisation as the decline of religion. Finally the book considers present day pluralist Australia and new understandings of state secularity in light of massive social changes over recent generations. generation later, Richard Neville demythologises the 1960s in this hilarious, colourful and provocative memoir of the times."--Publisher description.

Though more than a generation has passed since the revolutionary fervor of the Summer of Love of 1967, the 1960s in many ways seem with us still. From recurring debates over the war in Vietnam to the perpetually appealing music of the Beatles and the Rolling Stone to the concern about youth drug use, the legacy of the 1960s is ubiquitous in contemporary life. The Summer of Love brings together an impressive group of historians, artists, and cultural critics to present a rich and varied interpretation of this seminal decade and its continuing influence on politics, society, and culture. The Summer of Love, which accompanies an exhibition at Tate Liverpool, pays particular attention to the wildly creative psychedelic art of the era. Perceptive essays on psychedelic comics, graphic design and typography, light shows, and film successfully

rescue psychedelic art from the fog of nostalgia and unjust critical neglect. Distinguished contributors also explore the role of 1960s fashion and architecture, and they consider anew the central influence of hallucinogenic drugs on the art of the era. Running throughout the essays are the elements of epochal change—from sexual liberation to student revolutions—that still form the backdrop of our collective consciousness of the 1960s. An incisive collection of writings on all aspects of 1960s art and culture, tempered by time and critical distance, *The Summer of Love* will be indispensable for those who wish they had been there—or for those who were, but can't remember it.

The "Arts" hold a revered and respected place within modern Western society—but what exactly defines "culture"? What gives it this enigmatic status? What influences its composition and propagation? What controls and limitations is it subject to? And what can it achieve within our world? Arthur Marwick tackles these issues head on, with a detailed and eclectic account of

the arts in the West since the Second World War. He looks at the full range of possible candidates for the category of "art", from both high and popular culture: from literature to pulp fiction, from art-house cinema to soap-opera, art music to rock and pop. The book also looks at the fascinating diversity of twentieth-century art in the context of the social, technological, and political events, movements, and developments that have shaped our history--such as the holocaust, television, and feminism. Marwick examines how these factors have affected the cultural output of Western society since 1945, and in turn how art has fed back its own agenda and priorities into society.

Following on from the success of the first edition, John Coveney traces our complex relationship with food and eating and our preoccupation with diet, self-discipline and food guilt. Using our current fascination with health and nutrition, he explores why our appetite for food pleasures makes us feel anxious. This up-to-date edition includes an examination of how our current obsession with body size, especially fatness, drives a national and international panic about the obesity 'epidemic'.

Focusing on how our food anxieties have stemmed from social, political and religious problems in Western history, *Food, Morals and Meaning* looks at: the ancient Greeks' preoccupation with eating early Christianity and the conflict between the pleasures of the flesh and spirituality scientific developments in eighteenth and nineteenth century Europe and our current knowledge of food the social organization of food in the modern home based on real interviews the obesity 'epidemic' and its association with moral degeneration. Based on the work of Michel Foucault, this fresh and updated edition explains how a rationalization of food choice – so apparent in current programmes on nutrition and health – can be traced through a genealogy of historical social imperatives and moral panics. *Food, Morals and Meaning* is essential reading for those studying nutrition, public health, sociology of health and illness and sociology of the body.

This landmark publication collects three decades of writing from one of the most original, provocative and consistently entertaining voices of our time. Anyone who cares about language and culture should have this book in their life. Thirty years ago, Jonathan Meades published a volume of reportorial journalism, essays, criticism, squibs and fictions called *Peter Knows What Dick Likes*. The critic James Wood was moved to write: 'When journalism is like this, journalism and literature become one.' *Peter and Ricky Come Again* is every bit as rich and catholic as its predecessor. It is bigger, darker, funnier, and just as impervious to taste and manners. It bristles with wit and pin-sharp eloquence, whether Meades is contemplating northernness in a German forest or hymning the virtues of slang. From the indefensibility of nationalism and the ubiquitous abuse of the word 'iconic', to John Lennon's shopping lists and the wine they call Black Tower, the work assembled here demonstrates Meades's unparalleled range and erudition, with pieces on cities, artists, sex, England, concrete, politics and much, much more.

Promise of a Dream is a moving, witty and poignant recollection of a time when young

women were breaking all the rules about sex, politics and their place in the world. Sheila Rowbotham, best known for *A Century of Women*, *Threads Through Time* and *Hidden From History*, turns her hand here to memoir. The result is a wryly amusing account of her younger self, and a sparkling portrait of the exhilaration and enthusiasm of the sixties. Paul Clements champions the creative underground and expressions of difference through visionary avant-garde and resistant ideas. This is represented by an admixture of utopian literature, manifestos and lifestyles which challenge normality and attempt to reinvent society, as practiced for example, by radicals in bohemian enclaves or youth subcultures. He showcases a range of 'art' and participatory cultural practices that are examined sociopolitically and historically, employing key theoretical ideas which highlight their contribution to aesthetic thinking, political ideology, and public discourse. A reevaluation of the arts and progressive modernism can reinvigorate culture through active leisure and post-work possibilities beyond materialism and its constraints, thereby presenting alternatives to established understandings and everyday cultural processes. The book teases out the

difficult relationship between the individual, culture and society especially in relation to autonomy and marginality, while arguing that the creative underground is crucial for a better world, as it offers enchantment, vitality and hope.

The dreams, the trips, the trials, the love-ins, the screw-ups... the sixties! He wanted to change the world, and all he had was a little magazine... As publisher of OZ magazine, the hippies' handbook and monument to psychedelia, Richard Neville was at the centre of the 1960s cyclone of idealists, rock musicians, radicals, artists, hustlers and high society. He almost managed to remain objective through it all, frequently startling even close admirers with his original views and witty candour. First published in 1996 to cult-like status, *Hippy Hippy Shake* demythologises the 1960s in a highly amusing, colourful and provocative memoir of the times. It was the dawning of the Age of Aquarius... and then the hash hit the fan. Working Title Films have bought the rights, and production has started on a feature film starring Cillian Murphy (who will play Richard Neville), Sienna Miller, Emma Booth and Max Minghella. Beeban Kidron is directing , whose previous credits include
