It’s the revolutionary English language arts study guide just for middle school students from the brains behind Brain Quest. Everything You Need to Ace English Language Arts . . .takes students from grammar to reading comprehension to writing with ease, including parts of speech, active and passive verbs, Greek and Latin roots and affixes; nuances in word meanings; textual analysis, authorship, structure, and other skills for reading fiction and nonfiction; and writing arguments, informative texts, and narratives. The BIG FAT NOTEBOOK™ series is built on a simple and irresistible conceit—borrowing the notes from the smartest kid in class. There are five books in all, and each is the only book you need for each main subject taught in middle school: Math, Science, American History, English Language Arts, and World History. Inside the reader will find every subject’s key concepts, easily digested and summarized: Critical ideas highlighted in neon colors. Definitions explained. Doodles that illuminate tricky concepts in marker. Mnemonics for memorable shortcuts. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and state history standards, and are vetted by National and State Teacher of the Year Award-winning teachers. They make learning fun, and are the perfect next step for every kid who grew up on Brain Quest.

Since its original landmark publication in 1980, A People’s History of the United States has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the street, the home, and the, workplace. Known for its lively, clear prose as well as its scholarly research, A People’s History is the only volume to tell America’s story from the point of view of -- and in the words of -- America’s women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country’s greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women’s rights, racial equality -- were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus’s arrival through President Clinton’s first term, A People’s History of the United States, which was nominated for the American Book Award in 1981, features insightful analysis of the most important events in our history. Revised, updated, and featuring a new after, word by the author, this special twentieth anniversary edition continues Zinn’s important contribution to a complete and balanced understanding of American history.

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

Textbooks are symbols of centuries-old education. They’re often outdated as soon as they hit students’ desks. Acting "by the textbook" implies compliance and a lack of creativity. It’s time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

'Home Education' Series?Volume VI and final book in the Home Education Series. This volume provides an overview of Charlotte Mason’s educational philosophy and includes the final version of her 20 principles. Mason also discusses the practical application of her philosophy in the latter half of the book. This volume is directed to parents (and future parents) of children ages 12 and up.?First published in 1922, this edition is derived from the original book and follows the original pagination and formatting for easy reference when using PNEU articles.

Are the stars of the Civil Rights firmament yesterday’s news? In Living Black History scholar and activist Manning Marable offers a resounding “No!” with a fresh and personal look at the enduring legacy of such well-known figures as Malcolm X, Martin Luther King, Jr., Medgar Evers and W.E.B. Du Bois. Marable creates a “living history” that brings the past alive for a generation he sees as having historical amnesia. His activist passion and scholarly memory bring immediacy to the tribulations and triumphs of yesterday and reveal that history is something that happens everyday. Living Black History dismisses the detachment of the codified version of American history that we all grew up with. Marable’s holistic understanding of history counts the story of the slave as much as that of the master; he highlights the flesh-and-blood courage of those figures who have been robbed of their visceral humanity as members of the historical cannon. As people comprehend this dynamic portrayal of history they will begin to understand that each day we-the average citizen-are “makers” of our own American history. Living Black History will empower readers with knowledge of their collective past and a greater understanding of their part in forming our future.

It’s the revolutionary math study guide just for middle school students from the brains behind Brain Quest. Everything You Need to Ace Math . . . covers everything to get a student over any math hump: fractions, decimals, and how to multiply and divide them; ratios, proportions, and percentages; geometry; statistics and probability; expressions and equations; and the coordinate plane and functions. The BIG FAT NOTEBOOK™ series is built on a simple and irresistible conceit—borrowing the notes from the smartest kid in class. There are five books in all, and each is the only book you need for each main subject taught in middle school: Math, Science, American History, English Language Arts, and World History. Inside the reader will find every subject’s key concepts, easily digested and summarized: Critical ideas highlighted in neon colors. Definitions explained. Doodles that illuminate tricky concepts in marker. Mnemonics for memorable shortcuts. And quizzes to recap it all. Perfect for use at home or in school, and a favorite of parents, homeschoolers, and teachers worldwide, Spectrum is the learning partner students need for complete achievement.

Living in a "perfect" world without social ills, a boy approaches the time when he will receive a life assignment from the Elders, but his selection leads him to a mysterious man known as the Giver, who reveals the dark secrets behind the utopian facade.

The real Timon of Athens lived there in the fifth century BCE, making him a contemporary of Socrates and Pericles. Shakespeare presents Timon as a figure who suffers such profound disillusionment that he becomes a misanthrope, or man-hater. This makes him a more interesting character than the caricature he had become to Shakespeare’s contemporaries, for whom “Timonist” was a slang term for an unsociable man. Shakespeare’s play includes the wealthy, magnificent, and extravagantly generous figure of Timon before his transformation. Timon expects that, having received as gifts all that he owned, his friends will be equally generous to him. Once his creditors clamor for repayment, Timon finds that his idealization of friendship is an illusion. He repudiates his friends, abandons Athens, and retreats to the woods. Yet his misanthropy arises from the destruction of an admirable illusion, from which his subsequent hatred can never be entirely disentangled. The authoritative edition of Timon of Athens from The Folger Shakespeare Library, the trusted and widely used Shakespeare series for students and general readers, includes: -The exact text of the printed book for easy cross-reference -Hundreds of hypertext links for instant navigation -Freshly edited text based on the best early printed version of the play -Full explanatory notes conveniently placed on pages facing the text of the play -Scene-by-scene plot summaries -A key to the play’s famous lines and phrases -An introduction to reading Shakespeare’s language -An essay by a leading Shakespeare scholar providing a modern perspective on the play -Fresh images from the Folger Shakespeare Library’s vast holdings of rare books -An annotated guide to further reading Essay by Coppélia Kahn The Folger Shakespeare Library in Washington, DC, is home to the world’s largest collection of Shakespeare’s printed works, and a magnet for Shakespeare scholars from around the globe. In addition to exhibitions open to the public throughout the year, the Folger offers a full calendar of performances and programs. For more information, visit Folger.edu.

Up-to-date content, focus on skills This program makes required U.S. history content accessible for all students as they make the important connections between social studies and their own lives. The manageable content includes our nation’s most recent events, such as Operation Iraqi Freedom, and helps students successfully meet curriculum requirements and improve their performance on standardized tests. Everything You Need to Ace American History in One Big Fat Notebook

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Bring Science Alive! is an Integrated program built from the ground up to align to the Next Generation Science Standards (NGSS). Bring Science Alive! embodies the new vision for how science should be taught in schools--focusing on big picture concepts and teaching students

how to "do science"--rather than memorize facts. [from publisher's website]

A "week one, day one" kind of teacher?s manual with daily geography drills and numerous weekly assignment choices that include: mapping activities, atlas usage, research, notebooking and culture. Daily drills at 3 different levels for versatility and multi-year usage. Students learn to recognize important characteristics and traits of each continent, read and create maps, identify key geographical terms and more. Finish up the year by reading Around the World in 80 Days, by Jules Verne. This course lays a solid foundation of world geography for students 2nd grade and up.
