"The black experience in the antebellum South has been thoroughly documented. But histories set in the North are few. In the Shadow of Slavery, then, is a big and ambitious book, one in which insights about race and class in New York City abound. Leslie Harris has masterfully brought more than two centuries of African American history back to life in this illuminating new work."—David Roediger, author of The Wages of Whiteness In 1991 in lower Manhattan, a team of construction workers made an astonishing discovery. Just two blocks from City Hall, under twenty feet of asphalt, concrete, and rubble, lay the remains of an eighteenth-century "Negro Burial Ground." Closed in 1790 and covered over by roads and buildings throughout the nineteenth and twentieth centuries, the site turned out to be the largest such find in North America, containing the remains of as many as 20,000 African Americans. The graves revealed to New Yorkers and the nation an aspect of American history long hidden: the vast number of enslaved blacks who labored to create our nation's largest city. In the Shadow of Slavery lays bare this history of African Americans in New York City, starting with the arrival of the first slaves in 1626, moving through the turbulent years before emancipation in 1827, and culminating in one of the most terrifying displays of racism in U.S. history, the New York City Draft Riots of 1863. Drawing on extensive travel accounts, autobiographies, newspapers, literature, and organizational records, Leslie M. Harris extends beyond prior studies of racial discrimination by tracing the undeniable impact of African Americans on class, politics, and community formation and by offering vivid portraits of the lives and aspirations of countless black New Yorkers. Written with clarity and grace, In the Shadow of Slavery is an ambitious new work that will prove indispensable to historians of the African American experience, as well as anyone interested in the history of New York City.

Nature and the Formation of the United States

From pre-European contact to the present day, people living in what is now the United States have constantly manipulated their environment. The use of natural resources – animals, plants, minerals, water, and land – has produced both prosperity and destruction, reshaping the land and human responses to it. The Environment in American History is a clear and comprehensive account that vividly shows students how the environment played a defining role in the development of American society. Organized in thirteen chronological chapters, and extensively illustrated, the book covers themes including: Native peoples' manipulation of the environment across various regions The role of Old World livestock and diseases in European conquests Plantation agriculture and slavery Westward expansion and the exploitation of natural resources Environmental influences on the Civil War and World War II The emergence and development of environmental activism Industrialization, and the growth of cities and suburbs Ecological restoration and climate change Each chapter includes a selection of primary documents, and the book is supported by a robust companion website that provides further resources for students and instructors. Drawing on current scholarship, Jeff Crane has created a vibrant and engaging survey that is a key resource for all students of American environmental history.

**A longtime professor of Ethnic Studies at the University of California at Berkeley, Ronald Takaki was recognized as one of the foremost scholars of American ethnic history and diversity. When the first edition of A Different Mirror was published in 1993, Publishers Weekly called it "a brilliant revisionist history of America that is likely to become a classic of multicultural studies" and named it one of the ten best books of the year. Now Rebecca Stefoff, who adapted Howard Zinn's best-selling A People's History of the United States for younger readers, turns the updated 2008 edition of Takaki's multicultural masterwork into A Different Mirror for Young People. Drawing on Takaki's vast array of primary sources, and staying true to his own words whenever possible, A Different Mirror for Young People brings ethnic history alive through the words of people, including teenagers, who recorded their experiences in letters, diaries, and poems. Like Zinn's A People's History, Takaki's A Different Mirror offers a rich and rewarding "people's view" perspective on the American story.**

**An exploration of why we play video games despite the fact that we are almost certain to feel unhappy when we fail at them. We may think of video games as being "fun," but in The Art of Failure, Jesper Juul claims that this is almost entirely mistaken. When we play video games, our facial expressions are rarely those of happiness or bliss. Instead, we frown, grimace, and shout in frustration as we lose, or die, or fail to advance to the next level. Humans may have a fundamental desire to succeed and feel competent, but game players choose to engage in an activity in which they are nearly certain to fail and feel incompetent. So why do we play video games even though they make us unhappy? Juul examines this paradox. In video games, as in tragic works of art, literature, theater, and cinema, it seems that we want to experience unpleasantness even if we also dislike it. Reader or audience reaction to tragedy is often explained as catharsis, as a purging of negative emotions. But, Juul points out, this doesn't seem to be the case for video game players. Games do not purge us of unpleasant emotions; they produce them in the first place. What, then, does failure in video game playing do? Juul argues that failure in a game is unique in that when you fail in a game, you (not a character) are in some way inadequate. Yet games also motivate us to play more, in order to escape that inadequacy, and the feeling of escaping failure (often by improving skills) is a central enjoyment of games. Games, writes Juul, are the art of failure: the singular art form that sets us up for failure and allows us to experience it and experiment with it. The Art of Failure is essential reading for anyone interested in video games, whether as entertainment, art, or education.**

**We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The 'machine habitus' is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life.**

*The history of the South in this century has been obscured in the ever-growing mass of information about the region's rapid change and turbulent development. In this book, Volume X of A History of the South, the historical image of the modern South is brought into full focus for the first time. George Brown Tindall presents a thorough and well-balanced historical narrative of the region during the years 1913--1945 when the South underwent a transformation from a predominantly agricultural area to one of growing industrialization. The inauguration of President Woodrow Wilson ended a half century of political isolation for the South and ushered in an era of agrarian reforms, prohibition, woman suffrage, industrial growth, and recurring crises for Southern farmers. During the 1920's the South was caught in a contrast of urban booms and farm distress. There were flareups of racial violence, and the Ku Klux Klan was revived. Mr. Tindall devotes considerable attention to the Southern literary renaissance which produced William Faulkner, Thomas Wolfe, and many other notable writers and critics. The Emergence of the New South provides a new understanding of the changing political and social climate in the South under the stresses of depression, the New Deal, the labor movement, Negro unrest, and two world wars.*
