Introduction to Chemistry is a 26-chapter introductory textbook in general chemistry. This book deals first with the atoms and the arithmetic and energetics of their combination into molecules. The subsequent chapters consider the nature of the interactions among atoms or the so-called chemical bonding. This topic is followed by discussions on the nature of intermolecular forces and the states of matter. This text further explores the statistics and dynamics of chemistry, including the study of equilibrium and kinetics. Other chapters cover the aspects of ionic equilibrium, acids and bases, and galvanic cells. The concluding chapters focus on a descriptive study of chemistry, such as the representative and transition elements, organic and nuclear chemistry, metals, polymers, and biochemistry. Teachers and undergraduate chemistry students will find this book of great value.

Developments of International Trade Theory offers the life-long reflections of a distinguished Japanese scholar who pioneered the application of general equilibrium theory to international trade. Written in a style that makes it easily accessible to scholars and students, the book covers standard topics on international trade with a discussion of the evolution of the theory and as well as recent discussions on topics such as immiserizing growth. This book consists of two parts. Part I examines the historical progression of international trade theory, and Part II addresses the modern theory and recent developments of international trade. In this way the book offers a comprehensive evaluation of monetary problems of international economics. Taking advantage of the publication of this new edition, the author includes two new chapters, "Adam Smith and Disequilibrium Economic Theory" and "Complete Specialization in Classical Economics," which readers will profit from reading after they have studied the basic theories of international trade in the main part of the book.

Today, along with those Ethiopians who have been recognized as Jews by the State of Israel, many who are called Feres Mura, the descendants of Ethiopian Jews who have now reasserted their Jewish identity, still await full acceptance in Israel. Since the 1990s, they have sought homecoming through Israel's Law of Return, but have been met with reticence and suspicion on a variety of fronts. This book documents this tenuous relationship and the challenges facing the Feres Mura.

This volume contains 23 state-of-the-art papers presented at the Dolomieu Conference on Carbonate Platforms and Dolomitization held in September 1991 in Ortisei, Italy. The conference was co-sponsored by the International Association of Sedimentologists (IAS) and the Society for Sedimentary Geology (SEPM), and marked the 200th anniversary of the 1791 paper by Deodat de Dolomieu describing dolomite in detail for the first time. The papers presented do not aim to give a complete review of the current state of the dolomitic art, but rather discuss important advances and gaps in our knowledge of dolomitization. State-of-the-art papers from worldwide experts. Includes basic science and economic applications.
